**SINGAPORE, 19 November 2026 –**Oiltek International Limited (**优特科技国际有限公司**) (“**Oiltek**” or the “**Company**”, and together with its subsidiaries, the “**Group**”), an SGX Mainboard-listed technology

company serving the food security and energy security segments, has won three of the four awards in the Industrials sector at The Edge Singapore's Centurion Club Awards 2026, including the sector's top honour, the Overall Sector Award. This is the second year in a row that Oiltek has received an award from The Edge Singapore.

The three accolades – the **Overall Sector Award**, the **Highest Returns to Shareholders Over Three Years Award** and the **Highest Return on Equity Over Three Years Award** – recognise Oiltek's consistent performance across shareholder returns, profitability and capital efficiency over the past three years. Together they place Oiltek at the top of the Industrials sector on the combined measure of returns to shareholders, profit growth and return on equity.

*(L to R) Mr Henry Yong, ED & CEO of Oiltek and Mr Terence Goh, CFO of Oiltek with the three Awards.*

This marks the second consecutive year that Oiltek has been recognised at The Edge Singapore's Centurion Club Awards. In 2025, Oiltek was also the winner of the **Highest Returns to Shareholders Over Three Years Award** for the Industrials sector. Winning this award two years in a row underlines the sustained value the Group has created for shareholders since its listing on the Catalist of the SGX-ST in March 2022 and its transfer to the SGX Mainboard in June 2025.

Established by The Edge Singapore, the Centurion Club recognises the achievements of SGX-listed companies with market capitalisations of more than S$100 million but less than S$1 billion. The awards celebrate companies demonstrating strong financial performance and shareholder value creation across

various industry sectors, based on published and measurable financial metrics over a three-year evaluation period based on the last trading day in March 2026.

The assessment methodology for the three awards received by Oiltek is summarised as follows:

1. **The Highest Returns to Shareholders Over Three Years Award** is presented to the company with the highest returns to shareholders compounded annual growth rate ("**CAGR**"), comprising growth in share price and dividends received and reinvested over the past three years. The share prices are adjusted for any rights/bonus issues, distribution of treasury shares, dividend in specie, capital repayment and dividends received and reinvested within the specified period. The Returns to Shareholders CAGR is further subject to trading volume and liquidity considerations.

2. **The Highest Return on Equity Over Three Years Award** is presented to companies that report a profit before tax; profit after tax and minority interest (PATMI); and net profit throughout the evaluation period. Companies that make losses (pre-tax and/or after tax) and have negative shareholders' funds in any of the four financial years under evaluation will not be eligible. The return on equity ("**ROE**") over the past three financial years is weighted to recognise the importance of sustainable and improvement in ROE.

3. **The Overall Sector Award** is presented to companies with the highest scores within each sector based on a weightage for the evaluation components of Returns to Shareholders, Growth in Profit After Tax, and Weighted ROE, over three years.

Please refer to https://bdc.theedgesingapore.com/cc-methodology for more details.

**Mr Henry Yong Khai Weng (杨淳麟), Executive Director and CEO of Oiltek**, commented, *"Winning three of the four Industrials awards, including the Overall Sector Award, is a proud moment for everyone at Oiltek. Being recognised for the highest returns to shareholders for a second year running shows that our strategy is working, and that we are delivering consistent, sustainable value rather than one-off results. These achievements belong to our management team and employees, and to the shareholders, customers and business partners who have placed their confidence in us. Building on more than 45 years of engineering heritage, we will continue to strengthen our process technology and engineering capabilities and expand in the global vegetable oils processing and renewable energy sectors. Our goal is clear: to reinforce Oiltek's position as one of the world's leading providers of process technologies, integrated engineering solutions and sustainable innovations for the global oils and fats industry, while creating long-term value for our shareholders and other stakeholders."*

End.

**ABOUT OILTEK INTERNATIONAL LIMITED**

Oiltek International Limited ("**Oiltek**" and together with its subsidiaries, the "**Group**"), is an established integrated process technology and renewable energy solutions provider, contributing towards global food security and energy security through its innovative and comprehensive range of processing and engineering solutions across the global vegetable oils, food processing and renewable energy industries. The Group's technological capabilities and integrated solutions support agricultural value creation, food processing and the development of sustainable energy solutions, addressing the evolving needs of the global food and energy sectors.

The history of the Group can be traced back to its principal operating subsidiary, Oiltek Sdn. Bhd., which was incorporated in Malaysia on 1 December 1980. With over 45 years of track record, Oiltek has successfully designed, built and commercialised plants in more than 37 countries across 5 continents.

Oiltek was formerly listed on the Catalist of the Singapore Exchange Securities Trading Limited ("**SGX-ST**") on 3 March 2022 and has completed the transfer of its listing from Catalist to the Mainboard of the SGX-ST on 6 June 2025.

The Group operates three key businesses – Edible & Non-Edible Oil Refinery, Renewable Energy, and Product Sales and Trading.

For its Edible & Non-Edible Oil Refinery segment, the Group provides engineering, procurement, designing, construction and commissioning ("**EPCC**") services for edible and non-edible oil refining plants, downstream specialty products and processing plants; upgrading and retrofitting of existing facilities; and turnkey inside-battery-limits ("**ISBL**") and outside-battery-limits ("**OSBL**") infrastructure engineering.

For the Group's Renewable Energy segment, Oiltek provides services for renewable energy industries including EPCC of multi-feedstock biodiesel, enzymatic biodiesel, winter fuel, HVO feedstock (treated and refined POME oil) and palm oil mill effluent ("**POME**") biogas methane recovery plants; upgrading and retrofitting of existing facilities; and turnkey ISBL and OSBL infrastructure engineering which includes environmental solutions and integration into steam and power generation.

Oiltek's Product Sales and Trading segment generates recurring income for the Group, and its services include engineering component sales, agency and distributorship, and specialty chemical product trading.
