FOR IMMEDIATE RELEASE

TeleChoice International Named Small Cap Value Unlock Champion at The Edge Billion Dollar Club 2026

Regional info-communications solutions provider recognised for its transformation, restored profitability and focus on sustainable shareholder value

SINGAPORE, 16 November 2026 – TeleChoice International Limited ("TeleChoice" or the "Group") has been named the Small Cap Value Unlock Champion at The Edge Singapore Billion Dollar Club 2026. The award was presented at the inaugural Value Unlock Champions Awards which recognise SGX-listed companies that create and unlock shareholder value.

For TeleChoice, the recognition comes at an important point in its "*Renew, Rebuild and Transform*" journey. The transformation has seen the Group strengthen its business mix, reinstate dividends and position itself for its next phase of growth.

Ms Pauline Wong, President and CEO of TeleChoice International, said: "We are grateful to be named the Small Cap Value Unlock Champion. This award reflects the progress we have made in restoring profitability, rebuilding confidence and transforming our business.

"Over the past two years, we made deliberate choices about where we compete, which opportunities we pursue and how we deploy our resources. These choices have strengthened our business and allowed us to resume dividends.

"Last month, U Mobile renewed our contract at an estimated S$1.3 billion. This gives us a strong base for the next phase of growth. I thank our employees for their hard work, and our shareholders, customers and partners for their trust."

After three consecutive years of losses from FY2021 to FY2023, TeleChoice returned to profitability in FY2024, with profit attributable to shareholders of S$4.2 million. This increased to S$6.6 million in FY2025, while revenue grew 36.2% to S$518.0 million. All three divisions contributed operating profit, and the Group subsequently exited the SGX watchlist in July 2025.

A key milestone was the U Mobile 4PL managed services contract in Malaysia, which marked an important evolution in TeleChoice's business model. The first contract, worth S$500 million, was signed in 2024. It expanded TeleChoice's role beyond distribution to cover procurement, warehousing, inventory management

and customer experience. In October, U Mobile extended the partnership with a new contract estimated at S$1.3 billion, with an expanded scope. The partnership has strengthened TeleChoice's managed services business and increased the contribution of recurring revenue to the Group.

Separately, TeleChoice is expanding into digital infrastructure, with data centre-related opportunities emerging as an important area of growth. The Group has secured a sizeable liquid cooling project for a data centre in Indonesia and is pursuing similar opportunities in the region. In Malaysia, TeleChoice is participating in a tender for a data centre development. These opportunities could broaden the Group's business mix and contribute to future earnings growth.

The Group has also returned value to shareholders as its performance improved. Following its return to profitability, TeleChoice reinstated dividends and adopted a formal dividend policy under which it intends to pay at least 30% of net profit after tax, subject to cash flow and capital requirements.

Year to date, TeleChoice's share price has risen by approximately 26%, from 17.4 cents at the start of the year to 22.0 cents.

The Group has continued to strengthen its engagement with shareholders and the investment community, providing regular updates on its strategy, financial performance and business priorities through its corporate website, news alerts and LinkedIn. Together, these developments demonstrate the progress TeleChoice has made in strengthening its business and creating long-term value for shareholders.

The Value Unlock Champions Awards recognise SGX-listed companies that have demonstrated strong initiatives in creating and unlocking shareholder value through areas including capital allocation, corporate actions, business transformation, governance and investor engagement. The assessment considers the quality of corporate decisions, leadership and governance, execution, sustainable value creation and future value-unlocking potential.
