NEWS RELEASE

SDAI launches anti-ageing dietary supplement SDAI BioAge™ Core in Singapore

- First controlled-release Ca-AKG dietary supplement formulated for Asian consumers
- Researched and developed by Professor Brian Kennedy, with its patented proprietary controlled-release technology
- Controlled-release technology designed to release Ca-AKG gradually in the body, over 6 hours or longer
- Tailored for Asians aged 40 and above, available in men's and women's formulations
- Launched in Singapore, with China, Hong Kong and Macau to follow, subject to regulatory approval

SINGAPORE, 6 November 2026 – SDAI Limited ("**SDAI**" or the "**Company**", and together with its subsidiaries, the "**Group**") today unveiled ***SDAI BioAge™ Core*** (the "**Product**"), its flagship consumer product under its SDAI BioAge™ platform. The Product is a dietary supplement, researched and developed by longevity scientist Professor Brian Kennedy and is formulated for the Asian population. The Product is officially launched in Singapore today, with roll-outs to follow in China, Hong Kong and Macau, subject to the relevant regulatory approval.

For more information in relation to ***SDAI BioAge™ Core*****,** please refer to www.sdaibioage.com[1].

The launch comes against the backdrop of Singapore's growing public health focus on healthy longevity. The Ministry of Health of Singapore has placed healthy ageing at the centre of its agenda, with efforts aimed at closing the gap between the country's life expectancy, among the highest in the world and its healthy life expectancy, the number of years lived in good health.[2]

What is SDAI BioAge™ Core?

SDAI BioAge™ Core is a dietary supplement with controlled-release Calcium Alpha-Ketoglutarate ("**Ca-AKG**") as its core ingredient. The Product is supplied in two variants, a men's formulation and a women's formulation, intended for adults aged 40 and above, as part of a longer-term health-management plan. The controlled-release Ca-AKG is identical across both, with supporting cofactors adjusted for male and female physiologies.

With its patented proprietary controlled-release technology, ***SDAI BioAge™ Core*** is designed to release Ca-AKG gradually in the body over a period of more than six hours. This is in contrast with other AKG-based formulations which are typically fully metabolised and may be eliminated from the body within about thirty minutes of ingestion. The Product features a high-purity Ca-AKG formulation with a manufacturing process that delivers a purity exceeding 98%.

SDAI BioAge™ Core is designed as the first controlled-release Ca-AKG dietary supplement specially formulated for Asian consumers.

Please see the Appendix to this press release for further information on the Product.

Platform Strategy

SDAI BioAge™ Core is the Group's flagship product to be introduced under the SDAI BioAge™ platform, a science-led healthy longevity platform intended to connect longevity science, scientific expertise, health technologies and consumer applications. The platform launch reflects the Group's strategic shift towards commercialising longevity and biological age management solutions, as it scales down its earlier business of distributing high-end kitchen systems and appliances.

Liu Ting, Executive Director and Chief Executive Officer of SDAI Limited said, "*With the launch of our flagship product* ***SDAI BioAge™ Core****, and the establishment of our Scientific Board, the Group's core business and pillars in the anti-ageing and longevity segment are now established. We are building towards a sustainable business model and are looking to apply for a resumption of trading in due course. We will continue to keep shareholders updated of any material developments and progress made, as may be appropriate from time to time.*"

End.

About SDAI Limited

Listed on the Catalist board of the Singapore Exchange since 22 July 2011, **SDAI Limited** (the "**Company**", and together with its subsidiaries the "**Group**") is a biotechnology company focused on anti-ageing, longevity and biological age management solutions. Its SDAI BioAge™ platform brings together longevity science, health technologies and consumer applications, translating emerging research into practical products, services and long-term health management solutions.

The Company's other products and business initiatives include, amongst others:

- **Bluecode Biotech B-III skincare series ("B-III Series")**, a plant stem cell-based range developed in-house. The B-III Series combines advanced bioengineering with next-generation plant stem cell technology for anti-ageing and regenerative skincare.

- In January 2026, the Group entered into a joint venture with Hubei Qiai Group Co., Ltd. to expand the market for **mugwort and moxibustion-related products** across the ASEAN region.

As the Group shifts its focus to its longevity and healthcare business, it has significantly scaled down its business of distributing high-end kitchen systems and appliances. By continuously engaging with developments in global longevity science and combining them with the health needs and lifestyles of Asian consumers, the Group aims to bring credible and commercially sustainable longevity solutions to markets across Asia.

Appendix: *SDAI BioAge™ Core* Product Information

How it Works

SDAI BioAge™ Core is built around controlled-release Calcium Alpha-Ketoglutarate (Ca-AKG). Alpha-ketoglutarate is a naturally occurring metabolic compound that forms part of the TCA (tricarboxylic acid) cycle, the pathway that cells use to produce usable cellular energy, and is involved in amino-acid metabolism and nitrogen balance.

Formulation Highlights

Non-GMO, vegan and gluten-free, with no artificial stimulants. Supporting micronutrients include vitamins A, B2, B6, B12, D3 and folate, with dose levels calibrated for regional dietary patterns. The manufacturing process delivers a purity exceeding 98%.

How to Consume

Two tablets each morning with warm water, preferably on an empty stomach for best effect. The Company recommends a continuous six-month course of use alongside balanced nutrition, exercise, sleep and other healthy lifestyle practices before reviewing relevant health or biological-age measures.

Not Recommended For

Pregnant or breastfeeding women or people under 18. Anyone with kidney disease, calcium-metabolism conditions or other relevant medical conditions should consult a healthcare professional before use.
