Key Highlights

- Distributable income[1] for 1Q 2017 was $21.8 million, 47.6% higher than 1Q 2016, contributed by a $1.7 million one-off capital distribution in relation to the Keppel DC Singapore 3 acquisition, income from the acquisitions announced last year as well as lower property-related and other expenses.
- Portfolio occupancy rate of 95.1%
- Portfolio weighted average lease expiry (WALE) of 9.2 years by leased lettable area
- Aggregate leverage of 27.9%
- Interest coverage ratio of 11.6 times

($'000)	1Q 2017	1Q 2016	+/(-) %

Property Expenses	(3,380)	(3,585)	(5.7)
Net Property Income	28,844	21,186	+36.1
Distributable Income to Unitholders[1]	21,766	14,747	+47.6
Distribution per Unit[2,3] (DPU)(cents)	1.89	1.67	+13.2
Annualised Distribution Yield[3] (%)			
- At 1Q 2017 closing price of $1.200	6.01	5.60	+41bps
- At 1Q 2016 closing price of $1.060	6.80	6.34	+46bps

(1) Arising from the later completion of Keppel DC Singapore 3 on 20 January 2017 and where the vendor had agreed that all the rights and obligations shall pass to the REIT as if completion had occurred on 1 December 2016, the distributable income included a one-off capital distribution of approximately $1.7 million for the month of December 2016. Pursuant to the lease agreement entered into for Keppel DC Singapore 3, the distributable income would also include an amount of capital expenditure that had been set aside for this asset (the Capex Reserves).

(2) The DPU was computed based on the distributable income to Unitholders and had excluded the Capex Reserves. Keppel DC REIT declares distributions on a half-yearly basis. No distribution has been declared for the quarter under review.

(3) Excluding the one-off capital distribution of approximately $1.7 million (equivalent to 0.15 cents per Unit), 1Q 2017's DPU would have been 1.74 cents per Unit and the adjusted annualised distribution yield would have been 5.88% and 6.66% based on closing prices of 1Q 2017 and 1Q 2016 respectively.

Financial Review

Keppel DC REIT Management Pte. Ltd. (the Manager) is pleased to announce that Keppel DC REIT's distributable income had increased from $14.7 million in 1Q 2016 to $21.8 million in 1Q 2017, translating to a 47.6% growth year-on-year.

The year-on-year increase in distributable income was contributed by the one-off capital distribution in relation to the Keppel DC Singapore 3 acquisition, income from the acquisitions announced last year, as well as lower property-related and other expenses. The one-off capital distribution of approximately $1.7 million for the month of December 2016 arose from the later completion of Keppel DC Singapore 3 on 20 January 2017 and where the vendor had agreed that all the rights and obligations shall pass to the REIT as if completion had occurred on 1 December 2016. Year-on-year, there were lower rental income arising from a client downsizing its requirements in Keppel DC Dublin 1 in 1Q 2016, as well as lower variable income from Keppel DC Singapore 1 and Keppel DC Singapore 2 due to lower recurring and power revenue.

Based on 1Q 2017's market closing price of $1.200 per Unit, Keppel DC REIT's annualised distribution yield was 6.01%, up from 5.60% when compared to the same period last year. Excluding the one-off capital distribution of approximately $1.7 million (equivalent to 0.15 cents per Unit), the adjusted annualised distribution yield would have been 5.88%. Keppel DC REIT declares distributions on a half-yearly basis. No distribution has been declared for the quarter under review.

As at 31 March 2017, Keppel DC REIT was trading at a 26.8% premium to its Net Asset Value per Unit of $0.946.

Portfolio Performance

Keppel DC REIT's portfolio remains resilient with a diversified geographical reach, well-established clientele and a long portfolio WALE.

On 20 January 2017, Keppel DC REIT completed the acquisition of 90% interest in Keppel DC Singapore 3, adding a third asset in Singapore and strengthening its presence in this key data centre hub. The REIT has also obtained tax transparency treatment for its share of the taxable income arising from the 90% interest, similar to that which was granted for Keppel DC Singapore 1 and Keppel DC Singapore 2.

Portfolio occupancy rate rose from 94.4% as at 31 December 2016 to 95.1% as at 31 March 2017, while portfolio WALE remained long at 9.2 years. A major contract at one of the Singapore colocation assets, which was expiring in 2017, was renewed for five years. The Manager will continue to manage existing leases proactively and engage with prospective clients to optimise returns from the REIT's portfolio.

The portfolio remains balanced by a mix of master-leased facilities on long leases, and colocation facilities which provide diversity in terms of client profile and lease expiry. The REIT's income stability is also supported by its diversified clientele of high value-added industries.

Capital Management

The Manager has been consistently adopting a prudent capital management approach to mitigate the effects of interest rate and foreign currency fluctuations. This has proven to be beneficial amidst market volatility, enabling the Manager to provide Unitholders with regular and stable distributions.

As at 31 March 2017, interest rates of the long-term loans have been substantially locked in with interest rate swaps, while the REIT's forecasted foreign-sourced distribution has been hedged up to 2H 2018 with foreign currency forward contracts. There is also natural hedging in place with borrowings in currencies that match the corresponding investments.

Keppel DC REIT's balance sheet remains healthy. The REIT's low aggregate leverage of 27.9% provides the REIT with a comfortable debt headroom and financial flexibility to pursue growth opportunities. All of the REIT's borrowings are unsecured with an average annualised cost of debt of 2.2% per annum and a weighted average debt maturity of 2.9 years. Interest coverage ratio was 11.6 times.

Outlook

The global economy is expected to grow modestly in 2017 and 2018, amidst potential market volatility and policy uncertainties, according to the Organisation for Economic Cooperation and Development's Global Interim Economic Outlook released on 7 March 2017. Against this backdrop, the increasing demands of the digital economy and data centre outsourcing requirements will continue to underpin growth opportunities in the data centre industry. With a global client base and the Manager's established track record, Keppel DC REIT is well positioned to tap the potential of the industry.

The Manager remains confident of the data centre market's growth potential although near-term pressure on rental rates is expected with data centre supply coming online in Singapore. The addition of Keppel DC Singapore 3 to the REIT's portfolio earlier this year further strengthened the REIT's foothold in Singapore.

The Manager will maintain its focused investment strategy through a combination of proactive asset management and prudent capital management approach to capture value from the data centre industry.

Notes (2017 and 2016):

1 In 1Q 2017, higher other income was mainly due to a rental top up provided by the vendor of a newly acquired overseas asset and higher ad hoc service income, partially offset by lower power-related revenue for the recovery of power costs as compared to 1Q 2016.

2 Included as part of the property operating expenses were the following:

	1Q 2017 $'000	1Q 2016 $'000
Property-related taxes	**(455)**	(867)
Facility management costs	**(1,484)**	(1,276)
Repairs and maintenance	**(355)**	(534)
Other property-related costs	**(1,086)**	(908)
	(3,380)	(3,585)

3 Included in finance costs were interest expense, amortisation of debt related transaction costs from borrowings and finance lease charges recognised.

4 Included in other trust income / (expenses) in 1Q 2017 were net higher unrealised foreign exchange gains on the revaluation of borrowings mainly due to the depreciation of EUR and GBP against SGD quarter-on-quarter as compared to 1Q 2016, offset by higher appreciation of AUD against SGD quarter-on-quarter, as well as the amortisation expense of intangible asset.

5 Tax expenses comprised (i) tax in relation to the taxable income that are not accorded full tax transparency treatment, (ii) tax expense of the Group's overseas properties, and (iii) net deferred tax expenses recognised on tax losses carried forward and fair value changes in investment properties.

6 Included in the net tax and other adjustments were the following:

	1Q 2017 $'000	1Q 2016 $'000
Trustee's fees	**54**	45
Rental income adjustment on a straight-line basis	**(491)**	(366)
Amortisation of capitalised transaction costs	**99**	89
Unrealised foreign exchange (gains) / losses	**(2,417)**	1,068
Deferred tax	**308**	111
Amortisation of an intangible asset	**493**	-
Capital distribution [7]	**2,705**	-
Other net adjustments	**(1,917)**	(821)
Net tax and other adjustments	**(1,166)**	126

Included in other net adjustments were dividends and distribution income, finance lease charges, other non-taxable income and non-deductible expenses.

7 Arising from the later completion of KDC SGP 3 and where the vendor had agreed that all the rights and obligations shall pass to the REIT as if completion had occurred on 1 December 2016, the DI included a one-off capital distribution of approximately $1.7 million (equivalent to 0.15 cents per Unit) and $1.0 million (equivalent to 0.09 cents per Unit) for the month of December 2016 and for the period from 1 January to 19 January 2017 respectively. Pursuant to the lease agreement entered into for KDC SGP 3, the DI would also include an amount of capital expenditure that had been set aside for KDC SGP 3 (Capex Reserves).

Higher DI in the current financial quarter was mainly contributed by KDC SGP 3, which included the one-off capital distribution for KDC SGP 3 for the month of December 2016, as well as lower property expenses in relation to KDC SGP 1, KDC SGP 2 and KDC DUB 1. These were partially offset by lower variable income from KDC SGP 1 and KDC SGP 2, a client downsizing its requirements in KDC DUB 1 in 1Q 2016, higher finance costs and tax expenses arising from contributions from new acquisitions.

8 The DPU was computed based on DI (Note 7) and had excluded the Capex Reserves. No distribution has been declared for the financial period under review.

Cash flow analysis (1Q 2017 vs 1Q 2016)

Cash generated from operating activities for the quarter was $33.8 million, $9.5 million higher than $24.3 million for the corresponding quarter last year. This was mainly due to higher operational cash inflow and lower working capital requirements during the quarter.

Net cash used in investing activities for the quarter was $198.7 million. This was mainly due to the completion of the acquisition of the 90.0% interest in KDC SGP 3 during the quarter.

Net cash used in financing activities was $38.0 million, $6.4 million higher as compared to $31.6 million for the corresponding quarter last year. This was mainly due to the higher distribution paid and repayment of borrowings during the quarter.

8 REVIEW OF PERFORMANCE

Review of the Performance between 2017 and 2016 results

(1Q 2017 vs 1Q 2016)

Gross rental income for 1Q 2017 was $31.6 million, an increase of $7.0 million or 28.6% from 1Q 2016 of $24.6 million. The higher rental income was mainly contributed by the acquisition of the 90.0% interest of KDC SGP 3, Milan DC and Cardiff DC as well as the appreciation of AUD against SGD. At KDC DUB 1, there was lower rental income arising from a client downsizing its requirements in 1Q 2016. There was a drop in the variable income from KDC SGP 1 and KDC SGP 2 due to lower recurring and power revenue. In addition, overseas contribution declined due to the depreciation of GBP, EUR and MYR against SGD. Other income was $0.6 million arising mainly from the rental top up income as well as ad hoc service revenue charged to clients.

Property operating expenses for 1Q 2017 was $3.4 million, a decrease of $0.2 million or 5.7% from 1Q 2016 of $3.6 million. This was largely due to lower property tax expenses at KDC SGP 1 and KDC SGP 2 and lower repairs and maintenance costs incurred at KDC DUB 1, partially offset by the property-related expenses for KDC SGP 3.

As a result, net property income of $28.8 million for 1Q 2017 was $7.6 million or 36.1% higher than 1Q 2016.

Total return after tax for 1Q 2017 was $23.5 million, an increase of $8.9 million or 60.6% as compared to 1Q 2016 of $14.6 million. This was mainly due to higher net property income, higher net unrealised foreign exchange gains and higher realised gains on settlement of foreign exchange contracts. These were partially offset by higher finance costs, higher Manager's fees, other expenses and higher current tax expenses arising from KDC SGP 3, Milan DC and Cardiff DC as compared to 1Q 2016.

10 PROSPECTS

A commentary at the date of announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months

The global economy is expected to grow modestly in 2017 and 2018, amidst potential market volatility and policy uncertainties, according to the Organisation for Economic Cooperation and Development's Global Interim Economic Outlook released on 7 March 2017. Against this backdrop, the increasing demands of the digital economy, massive-scale cloud providers and data centre outsourcing requirements will continue to underpin growth opportunities in the data centre industry. With a global client base and the Manager's established track record, Keppel DC REIT is well positioned to tap the potential of the industry.

The Manager remains confident of the data centre market's growth potential although near-term pressure on rental rates is expected with data centre supply coming online in Singapore. The addition of KDC SGP 3 to the REIT's portfolio earlier this year further strengthened the REIT's foothold in Singapore.

The Manager will maintain its focused investment strategy through a combination of proactive asset management and prudent capital management approach to capture value from the data centre industry.

11 RISK FACTORS AND RISK MANAGEMENT

The Manager ascribes importance to risk management and constantly takes initiatives to systematically review the risks it faces and mitigates them. Some of the key risks that the Manager has identified are as follows:

Interest rate risk

The Manager constantly monitors its exposure to changes in interest rates for its interest-bearing financial liabilities. Interest rate risk is managed on an on-going basis with the primary objective of limiting the extent to which net interest expense can be affected by adverse movements in interest rates through financial instruments or other suitable financial products.

Liquidity risk

The Manager monitors and maintains Keppel DC REIT's cash flow position and working capital to ensure that there are adequate liquid reserves in terms of cash and credit facilities to meet short-term obligations. Consideration has been given to funding and expense requirements so as to manage the cash position at any point of time.

11 RISK FACTORS AND RISK MANAGEMENT

Credit risk

Credit risk assessments of prospective clients are carried out by way of evaluation of information from corporate searches conducted prior to the signing of lease agreements. In addition, the Manager also monitors the property portfolio's client trade sector mix to assess and manage exposure to any potentially volatile trade sector.

Currency risk

The Group's foreign currency risk relates mainly to its exposure from its investments in Australia, Europe and Malaysia, and the distributable income and interest income from progressive payments related to such foreign investments. The Group maintains a natural economic hedge, whenever possible, by borrowing in the currency of the country in which the property or investment is located or by borrowing in currencies that match the future revenue stream to be generated from its investments.

The Manager monitors the Group's foreign currency exposure on an on-going basis and will manage its exposure to adverse movements in foreign currency exchange rates through financial instruments or other suitable financial products.

Operational risk

Measures have been put in place to ensure sustainability of net property income. These measures include steps taken to negotiate for favourable terms/covenants, manage expenses, and actively monitor rental payments from the clients and continuously evaluate the Group's counter-parties.

In addition, the Manager also continuously reviews disaster and pandemic business continuity plans and modifies them, when necessary. The Manager manages such risks through multiple layers of redundancy and back-up systems supported by detailed operational procedures and maintenance programmes. However, the Manager notes that no system of risk management can provide absolute assurance against all potential risks.

Competition risk

The Manager will actively manage the properties and grow strong relationships with its clients by providing value-added property-related services. Through such active asset management and enhancements, the Manager seeks to maintain high client retention and occupancy levels and achieve stable rental growth, as well as minimise the costs associated with marketing and leasing space to new clients.

The Manager will work with the facility managers (where applicable) to actively manage (i) contract and colocation renewals and (ii) new contracts and colocation arrangements to maintain high client retention levels and minimise vacancy periods. The Manager also intends to leverage on its relationship with existing data centre clients as well as data centre brokers to secure new clients for the Group's new and existing data centre facilities.
