INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At all times, the UCITS is 60% exposed to at least one foreign equity market or to the equity markets of several countries, possibly including the French market.

The MF is index-based fund of the UCITS ETF type.

Terms of determination and allocation of amounts available for distribution:

<u>Units C-EUR and C-USD:</u> Capitalisation of all the amounts available for distribution.

Management objective:

The MF's management objective is to replicate the MSCI India Net Total Return index (see section "Benchmark Indicator" hereinafter), regardless of its evolution, while insofar as possible minimizing the tracking error between the MF's performances and those of the MSCI India Net Total Return index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.1%.

Benchmark indicator:

The benchmark indicator is the MSCI India Net Total Return index (net dividends reinvested), listed in US Dollars (USD) (the "Benchmark Indicator"). The Benchmark Indicator is an equity index calculated and published by the supplier of international indices, MSCI.

The Benchmark Indicator is made up exclusively of Indian equities (India) and retains the fundamental characteristics of the MSCI indices, i.e.: Adjustment of the stock market capitalization of the securities in the Benchmark Indicator on the basis of the float, and sector classification according to the GICS (Global Industry Classification Standard) classification.

The objective of the Benchmark Indicator is to represent 85% of the capitalization adjusted on the basis of the float, of each group of industries of the Indian market.

By targeting 85% of the representativeness of each industry group, the Benchmark Indicator measures 85% of the market capitalization of the Indian market, while also reflecting the market's economic diversity.

The MSCI methodology and its calculation method entail the Benchmark Indicator being made up of a variable number of companies.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as the information on the composition and on the respective importance of components of the Benchmark Indicator will be available on MSCI website: www.mscibarra.com.

The monitored performance is that of the closing prices of the Benchmark Indicator. The Benchmark Indicator is weighted by market capitalisation.

Benchmark indicator revision

The Benchmark indicator is reviewed quarterly, in order to take into account changes affecting a stock's market capitalisation (number of securities and free float) or its classification by sector. The principal changes in a company's capital structure may be implemented in real time (merger or acquisition, large rights issues or IPOs).

The MSCI rules for Benchmark indicator revision are published by MSCI and are available on MSCI website: www.mscibarra.com.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment strategy.

Benchmark Indicator publication

The official MSCI indices are calculated on a daily basis at closing prices using the official closing stock market prices for the constituent stocks. The Benchmark Indicator is also calculated in real time every banking day.

The Benchmark Indicator is available in real time via Reuters and Bloomberg.

Reuters code: .dMIIN0000NUS

Bloomberg code: NDEUSIA

The Benchmark Indicator's closing price is available on MSCI website: www.mscibarra.com.

Investment strategy:

1. Strategy employed

The MF will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the MF will reach its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to reach its investment objective. The objective of these swap contracts will be to exchange (i) the value of the MF's assets, which will consist of balance sheet assets (excluding any securities received as guarantees), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the MF will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small caps markets.

The basket of equities held may be adjusted daily so that its value will be superior or equal to 100% of the Fund's net assets in most cases. When necessary, this adjustment will be made to ensure that the market value of the forward swap contract mentioned above is inferior or equal to zero which will neutralize the counterparty risk arising from the swap contract.

As part of the management of its exposure, the MF can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each of equities of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The MF may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including within the small cap markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
- \circ $\;$ Subordination to the main market indices or to the Benchmark Indicator,
- o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent).
- of diversification, notably:
- Issuer (application of ratios applicable to the eligible assets of an UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the MF's portfolio and (ii) the market value of the future exchange operation entered into by the MF are available on the page dedicated to the MF on the Internet site www.lyxoretf.com.

The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment in undertakings for collective investment in transferable securities ("UCITS") compliant with the Directive 2009/65/EC is limited to 10% of the assets of the MF. As part of these investments, the MF can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds established on the basis of foreign laws.

When the MF receives securities as guarantee under the conditions and limits of this section's paragraph 8 below, they will also constitute balance sheet assets received in full ownership by the MF, given that they are received by the MF in full ownership.

As part of a future optimisation of the MF's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The MF will use Index-linked swaps traded over the counter, thereby swapping the value of the MF's assets (or of any other financial instrument or asset held by the MF, where appropriate) against the value of the Benchmark Indicator (in compliance with the description contained in this section's paragraph 1 above).

As part of a future optimisation of the MF management, the manager reserves the right to use other instruments within the limits of the regulations, such as to achieve the management objective, for example including future financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the MF's portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the MF may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the MF may temporarily have recourse to borrowing.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary securities acquisition and/or sale operation.

8. Financial guarantees

In all cases in which the MF is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the MF's use of forward swap contracts traded over the counter, the MF can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the MF in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the MF is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the MF will be provided to the MF in full ownership and listed in the MF's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the MF's assets.

Any financial guarantee received by the MF within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

(a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

(b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;

(c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the MF's net asset value;

(e) The MF's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the MF may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets.

In compliance with the aforesaid conditions, the guarantees received by the MF can include:

(i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

(ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

(iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

(iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;

(v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;

(vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The MF's management company will apply a margin to the financial guarantees received by the MF. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees.

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the MF, the bearer is primarily exposed to the following risks:

<u>Equity risk</u>

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

Risk related to low diversification of the Benchmark Indicator

The Benchmark Indicator to which the investors are exposed covers a given region, area or strategy and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the MF's underlyings.

Liquidity risk (primary market)

Should the MF (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the MF could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of units.

Liquidity risk on a place of listing

The MF's share price can deviate from its indicative net asset value. The liquidity of the MF's units or equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the MF's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

Counterparty risk

The MF is exposed to the risk of bankruptcy, payment default or any other type of default of every counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the MF's assets per counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The MF will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the MF's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the MF's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

Risk related to the exposure to Emerging markets

The MF's exposure to emerging markets results in a greater risk of loss that would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the Benchmark Indicator.

Risk that the management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the MF uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the MF's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the MF is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the MF's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the MF's underlyings can affect the MF's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the MF (and/or to its counterparty in the FFI), the MF's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the MF is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the units may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the MF's underlyings, the MF's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the units.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of MF units. The calculation of the MF's net asset value can also be affected.

If the event persists, the MF's manager will decide on measures having to be adopted, which can have an impact on the MF's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

ii) The Benchmark Indicator is definitively discontinued by the supplier of the index,

iii) The supplier of the Benchmark Indicator is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the MF at a reasonable cost.

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid.

- Operational risk

In case of an operational failure within the management company or of one of its representatives, investors may incur delays in the processing of subscriptions, conversions and redemptions of the units, or other disturbances.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the MF (and/or in a valuation of the ST by the MF's counterparty in a future financial instrument), the MF's net asset value may be affected, notably should the actual treatment of the ST by the MF differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Exchange risk linked to the class of units C- (EUR/USD)

The abovementioned class of units is exposed to an exchange risk to the extent that it is listed in a currency other than that of the Benchmark Indicator. The net asset value of the abovementioned class of units can therefore decrease due to fluctuating exchange rates even though the value of the Benchmark Indicator has increased.

Exchange risk linked to the Benchmark Indicator

The MF is exposed to the exchange risk insofar as the underlying securities making up the Benchmark Indicator may be listed in a currency other than the currency of the Benchmark Indicator or be derived from securities listed in a currency other than the currency of the Benchmark Indicator. The fluctuations of exchange rates could therefore negatively affect the Benchmark Indicator followed by the MF.

Subscribers concerned and typical investor profile:

The MF is "open to any subscriber".

An investor subscribing to this MF wishes to obtain an exposure to the Indian equities market.

The amount that it is reasonable to invest in this MF depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present and for five years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this MF's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment term is greater than 5 years.

Indications on the tax treatment: Investors should take note that the following information constitutes only a general summary of the tax regime applicable to an investment in a French MF, under the current French tax legislation. Investors are therefore requested to study their personal situations with their usual tax advisers.

France:

The MF can serve as the support for a life insurance contract listed in units of account.

1. On the level of the MF

In France, the co-ownership status of MFs means that they are automatically exempt from corporate tax; by nature, they therefore benefit from a certain degree of transparency. As such, the incomes collected and generated by the MF through its management are not taxable at the level of the MF itself.

Abroad (in countries in which the MF is invested), capital gains on the sale of foreign transferable securities and foreign income received by the MF as part of its management may, if relevant, be subject to tax (generally in the form of a withholding tax). In certain limited cases, the foreign taxation can be reduced or cancelled in the presence of tax agreements that may be applicable.

2. On the level of the bearers of MF units

2.1 Bearers residing in France

The sums distributed by the MF to French residents as well as the capital gains or losses on transferable securities are subject to the applicable taxation.

Investors are invited to study their personal situations with their usual tax advisers.

2.2 Bearers not residing in France

Subject to any applicable tax agreements, the amounts distributed by the MF may, in certain circumstances, be subject to a levy or withholding tax in France.

Moreover, the capital gains realised on the purchase/sale of the MF's units are generally tax exempt.

Bearers residing outside of France will be subject to the provisions of the tax legislation applicable in their country of residence.

Information relative to the "FATCA" law

France and the United States have signed a Model I intergovernmental agreement ("IGA") for the implementation in France of the American law known as the "FATCA" law that targets tax evasion amongst American taxpayers holding financial assets abroad.

The expression "American taxpayers" refers to a natural person who is an American citizen or resident, a partnership or company created in the United States or by virtue of American federal law or of the laws of one of the American States, or a trust if (i) a court located in the United States has, pursuant to the law, the power to issue orders or decisions substantially relating to all questions relative to the trust's administration and if (ii) one or more American taxpayers has a right of control over all of the trust's substantial decisions, or over the estate of a deceased person who was a citizen or resident of the United States.

The MF has been registered as a "reporting financial institution" with the American tax authorities. As such, the MF is required to provide the French tax authorities, for 2014 and subsequent years, with information regarding certain holdings or sums paid to certain American taxpayers or to non-American financial institutions considered as non-participants in the FATCA that will be the subject of an automatic information exchange between the French and American tax authorities. Investors will be required to certify their FATCA status to their financial intermediary or to the management company, as relevant.

As a result of the MF's application of its obligations under the IGA as implemented in France, the MF will be considered as complying with the FATCA and should be exempt from the withholding tax established by the FATCA on certain revenues or proceeds from American sources.

For investors whose units are held through an account holder located in a jurisdiction that has not signed an IGA, it is recommended that they should consult this account holder in order to be informed of its intentions with regard to the FATCA. Moreover, certain account holders may be required to collect additional information from investors in order to comply with their obligations under the FATCA or of the country in which the account is held. Also, the scope of the obligations under the FATCA or an IGA can vary according to the account holder's jurisdiction. Investors should therefore check with their usual tax advisers.

For more details, the complete prospectus can be obtained by requesting it from the management company.

[•] The net asset value is available from the head office of Lyxor International Asset Management. The UCITS complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to Lyxor International Asset Management, 17, cours Valmy - 92800 Puteaux - France.

[•] Approval date by the AMF (French Financial Markets Authority): 1 September 2006.

[•] *MF creation date: 25 October 2006.*

Activity report

The net asset value of the unit C-EUR of the Lyxor UCITS ETF MSCI INDIA MF shows an evolution of 66.51%* over the fiscal year and was equal to EUR 15.9934 on 27/02/2015, resulting in the fund's performance being equal to 78.10% since inception.

The net asset value of the unit C-USD shows an evolution of 35.22%* over the fiscal year and was equal to USD 17.9397 on 27/02/2015, resulting in the fund's performance being equal to 53.43% since inception.

The fund replicates the performance of the MSCI Daily TR Net Emerging Markets India USD index, listed in US dollars (USD), representative of the performance of market of large and mid-caps, listed in India.

This index has shown an evolution in USD of 36.88% over the fiscal year. As the MF is not valued in the index currency, the evolution of their net asset value is subject to an exchange risk. Over the fiscal year, the EUR has fallen by 18.58% against the USD.

This gap between the annual performance of the UCITS and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees of the management company,

- The costs for accessing the local markets of the securities of the replicated indexing,

- The costs or gains related to the instruments used as part of the replication of the indexing.

Following a summary index-based management method, the replication of the index is ensured via an index-linked swap. This future swap contract, traded over-the-counter using equities, bonds and other bond products and indices is used to transform the exposure to the securities in the MF's assets into an exposure to the MSCI Daily TR Net Emerging Markets India USD index.

The fund's risk and yield profile has been classed as category 6 given its exposure to the Benchmark Index.

The parties agree to carry out a daily adjustment of the swap parameters, the objective of which is to reset its market value to zero, thereby cancelling the counterparty risk. The modification of the composition of the securities comprising the basket of assets must comply with the provisions defined for the modification of the basket's securities, agreed by the parties in compliance with the terms of the swap contract.

On 27/02/2015, the tracking error reached the level of 0.040% for the MF. The level of the target tracking error for the period was of 0.100%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the year.

The counterparty for the Index-Linked Swaps obtained by the fund is: Société Générale.

* The figures referring to past performance relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (*not audited by the auditor*) None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the UCITS that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the Financial Markets Authority General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the UCITS

The management company's method for measuring the overall risk of the UCITS: the method chosen is the commitment method.

ESG criteria

In accordance with Article D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the UCITS does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

Auditor's report

AUDITOR'S REPORT ON THE ANNUAL ACCOUNTS Fiscal year closing on 27 February 2015

LYXOR UCITS ETF MSCI INDIA UCITS INCORPORATED IN THE FORM OF A MUTUAL FUND Monetary and Financial Code

Management Company LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy 92800 Puteaux

Ladies, Gentlemen,

As part of the mission entrusted to us by the management company's management bodies, we hereby present our report relative to the fiscal year closing on 27 February 2015 concerning:

the verification of the annual accounts of UCITS incorporated in the form of a mutual fund LYXOR UCITS ETF MSCI INDIA, as they are attached to this report;

- the bases of our assessments;
- the specific verifications and information required by law.

The annual accounts have been closed under the responsibility of the funds management company. It is our duty to express an opinion on these accounts based on our audit.

1. **OPINION ON THE ANNUAL ACCOUNTS**

We have conducted our audit in accordance with the applicable professional standards in France. These standards require that we apply the procedures necessary to obtain reasonable assurance that the annual financial statements do not include any significant misstatements. An audit involves verifying, by sampling and other selection methods, the elements underlying the amounts and information contained in the annual financial statements. It also involves assessing the implemented accounting principles, the significant estimates that have been used, and assessing the overall presentation of the financial statements. We feel that the collected evidence is sufficient and appropriate for the basis of our opinion.

We certify that, in accordance with French accounting rules and principles, the annual financial statements are truthful and in order, and present a fair picture of the operating profits and losses for the past fiscal year, as well as the UCITS created in the form of a mutual fund at the end of said fiscal year.

Without calling into the question the opinion expressed above, we draw your attention to the change of accounting regulation laid down in the accounting methods and rules of the appendix.

2. JUSTIFICATION OF THE ASSESSMENTS

In application of the provisions of article L.823-9 of the Commercial Code relative to the justification of our assessments, we inform you of the fact that the assessments we made concerned the appropriateness of the implemented accounting principles and the reasonable nature of the significant estimates that have been used.

PricewaterhouseCoopers Audit, SA, 63, rue de Villiers, 92208 Neuilly-sur-Seine Cedex T: +33 (0) 1 56 57 58 59, F: +33 (0) 1 56 57 58 60, www.pwc.fr

Société d'expertise comptable instrite au tableau de l'ordre de Paris - l'e de France. 1 Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02. This regulation includes the new AIFM classification for CIUs, but does not modify the applicable accounting principles nor the assessment methods for assets and liabilities.

As indicated in our presentation note on the ANC, the terminology and distribution of the CIU heading on the asset side of the balance sheet have been modified as follows, and can be explained in the following terms:

- The sub-heading "UCITS and general purpose Investment funds intended for non-professionals and equivalent from other countries" corresponds with the former Sub-heading "Coordinated European UCITS and French general purpose UCITS".
- The sub-heading "Other Funds intended for non-professionals and equivalents from other European Union Member States" corresponds with the former sub-heading "UCITS reserved for certain investors FCPR FCIMT".
- The sub-heading "General purpose professional funds and equivalents from other European Union Member States and listed securitisation entities" corresponds with the former sub-heading "listed Investment funds and SPV".
- The sub-heading "Other Professional investment funds and equivalents from other European Union Member States and non-listed securitisation entities" corresponds with the former sub-heading "non-listed Investment funds and SPV".
- The sub-heading "Other non-European institutions" was introduced as a result of Regulation n° 2014-01.

Assessment rules

The MF's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2003-02 of the Accounting regulatory committee dated 2 October 2003 relative to the chart of accounts of UCITS (1st part).

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value.

appendix

Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Units and equities in undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the MF's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the MF's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments listed in a currency other than the MF's reference currency are the exchange rates disseminated by the WM Reuters on the same day of the MF's net asset value date.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Assessment methods for off-balance sheet commitments

Off-balance sheet operations are assessed at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the UCITS) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the UCITS) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the UCITS).

Operation and management fees

These fees include all of the fees invoiced directly to the MF, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transfer commission which, if relevant, may notably be collected by the custodian and management company.

For this MF, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the MF has exceeded its objectives and are therefore invoiced to the MF;
- Transfer commissions invoiced to the MF.

For more details on the fees actually invoiced to the MF, refer to the Statistical Part of the Key Investor Information Document "KIID".

appendix

| Fees invoiced to the UCITS | Basis | Schedule rate |
|---|--------------------------------|------------------------|
| Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax ⁽¹⁾ | Net asset | maximum 0.85% per year |
| Outperformance commission | Net asset | None |
| Transfer commissions | Collection on each transaction | None |

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The MF accounting is carried out in EURO.

| Unit capitalisation * | 4,45 | -1,25 | 0,08 | -0,05873 | -0,03 |

* The amounts of the unit distribution, the unit capitalisation and the tax credits are indicated in the accounting currency of the UCITS. The unit capitalisation corresponds to the sum of profit and loss and net capital gains or losses on the number of circulating units. This calculation method is applied since 1 January 2013. (1) In pursuant to the Fiscal Instruction of 4 March 1993 of the Directorate General for taxes, the unit tax credit will be determined

on the ex-dividend date by distribution of the total amount of the tax credits between the circulating units on that date.

APPENDIX TO THE REPORT intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. It has not been certified by the accountants.

<u>Country of origin of the Fund</u> France.

Representative of the Swiss Fund

Société Générale, Paris, Zurich Branch, has been authorised by the FINMA as the Fund's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Fund, the KIIDs as well as the list of purchases and sales made by the Fund during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale Paris, Zurich Branch, Talacker 50, P.O. Box 1928, 8021 Zurich.

Calculation of the Total Expense Ratio and of the PTR

Annual closing of the fund: 27/02/2015

UCITS management commission: 0.85% tax included

Average fortune of the Fund for the period (from 01/03/14 to 27/02/15):

1 122 386 665.40

excerpt of the profit and loss account

| Expenses in thousands of euros | Annual report | Half-yearly report | Annual report |
