BOARD STATEMENT

We are pleased to present the inaugural annual Sustainability Report of New Wave Holdings Ltd. (“New Wave” or the “Company”, and together with its subsidiaries, the “Group”) for our financial year ended 31 March 2018 (“FY2018”). This report is prepared by taking reference from the Sustainability Reporting Guide in Practice Note 7F of the Singapore Exchange Securities Trading Limited (“SGX-ST”) Listing Manual Section B: Rules of Catalist and references the Global Reporting Initiative (GRI) Standards which represent the global best practices for reporting on a range of economic, environmental and social impacts. This report highlights the key economic, environmental, social and governance (“EESG”) related factors and initiatives carried throughout a 12-month period, from 1 April 2017 to 31 March 2018.

Sustainability is a part of the Group’s wider strategy to create long-term value for all its stakeholders. As such, the key material EESG factors for the Group (“**Material EESG Factors**”) have been identified and cautiously reviewed by the management and approved by the Board. The data and information provided have not been verified by an independent third party. We have relied on internal data monitoring and verification to ensure accuracy of data and information. The board of directors of the Company (the “Board”) has overseen the management and monitoring of the Material EESG Factors and takes them into consideration in the determination of the Group’s strategic direction and policies.

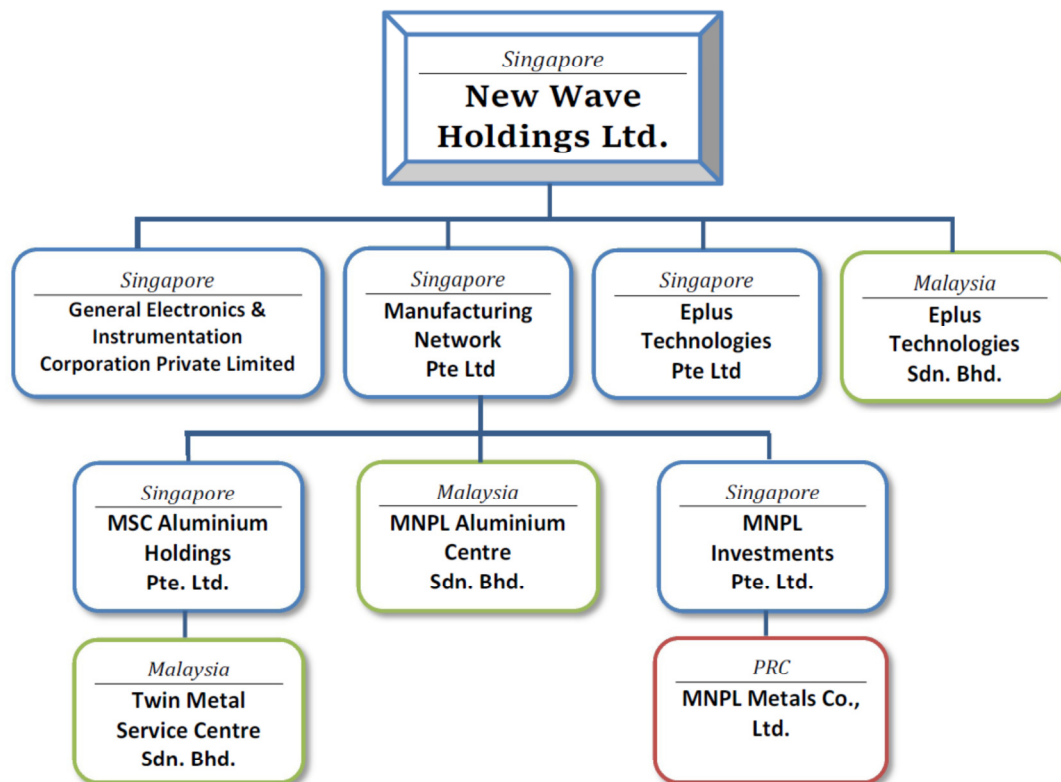

We welcome feedback from our stakeholders with regards to our sustainability efforts as this enables us to consistently improve our policies, systems and results. Please send your comments and suggestions to info@newwave.com.sg.

28 March 2019

ORGANISATIONAL PROFILE

The Company was incorporated in Singapore on 4 November 1999 and was listed on Catalist of the Singapore Exchange since 14 August 2000. Headquartered in Singapore at 101 Kitchener Road #02-17, Jalan Besar Plaza, Singapore 208511, the Company operates through several subsidiaries in Singapore, Malaysia and the People’s Republic of China (the “PRC”), and has two core business activities, namely the distribution of aluminium alloy products and the components distribution business. Our aluminium alloy products are sold to a wide spectrum of customers ranging from multi-international corporations to small and medium size local firms and are used in many industries including precision engineering, transport engineering, semiconductor equipment, electronics, and many others. The components distribution business encompasses the distribution of active and passive IT cabling system solutions, portable cabling testing and certification tools, monitoring and troubleshooting handheld tools and appliances, intelligent cabling system based projects and includes professional consultancy, training services, software implementation, database integration and customer care services.

The table below shows the organizational structure of the Group:

APPROACH TO SUSTAINABILITY

SUSTAINABILITY METHODOLOGY

SUSTAINABILITY GOVERNANCE

The Group has in place a Sustainability Steering Committee which is led by key management executives and supported by representatives from various functional and geographic divisions in the Group.

The Board of Directors and Chief Executive Officer (“CEO”) formulate the corporate sustainability strategies and guidelines and monitor overall performance.

The Sustainability Steering Committee comprise the General Managers of each division, the Financial Controller and representatives from each geographic segment and helps to organize and coordinate the sustainability initiatives.

New Wave’s employees support the Group’s sustainability programmes and policies and assist with the implementation and execution of the sustainability initiatives and the collection of data for monitoring performance.

STAKEHOLDERS ENGAGEMENT

An important starting point in our sustainability journey is to identify our stakeholders and material aspects relevant to our business. The interests and requirements of key stakeholders are also taken into account when formulating corporate strategies. These key stakeholders include, but are not limited to, customers, suppliers, shareholders, employees, and regulators. We adopt both formal and informal channels of communication to understand the needs of key stakeholders, and incorporate these into our corporate strategies to achieve mutually beneficial relationships.

| Key Stakeholders | Engagement Platforms | Frequency of Engagement | Key Concerns Raised |
|---|--|---|---|
| Customers | Meetings, e-procurement platforms, phone calls, teleconferences and email communications | Daily | Quality control and on-time delivery, technical support, competitive pricing, suitable payment terms |
| Suppliers | Meetings, e-procurement platforms, phone calls, teleconferences, email communications and factory visits | Regular basis | Quality of products, smooth and timely delivery, competitive prices |
| Shareholders | Announcements on SGXNet, annual general meetings, annual reports, the Company's website (www.newwave.com.sg) | Half yearly for financial results announcements, general meetings are held annually, other communications on ad-hoc basis throughout the year | Profitability and returns, good corporate governance, timely and accurate information |
| Employees | Induction programme for new employees, team discussions, training sessions, meetings, feedback channels, emails, performance reviews | Regular basis | Career growth, training opportunities, benefits and incentives, pleasant and safe working environment, alignment of personal goals with Company's goals |
| Regulators | Seminars and consultation sessions with key regulatory bodies, meetings | On-going basis for reviews and updates, and whenever there are changes in regulations | Compliance with laws and regulations, safe environment, health and other social issues |
| Community/ Industry Associations | Phone calls and other communications with non-profit organisations, participation at trade exhibitions, seminars, social events | On-going basis | Corporate citizenship, update on industry trends |

Membership of Associations

We engage with several industry associations through membership and participation at their activities and events in FY2018 and on an on-going basis:

- Singapore Business Federation
- Singapore Metal and Machinery Association
- Singapore Precision Engineering and Technology Association
- Infocomm Development Authority of Singapore

Networking with other companies in similar industries as ours enables us to be constantly updated on industry trends and help us locate new potential customers and suppliers.

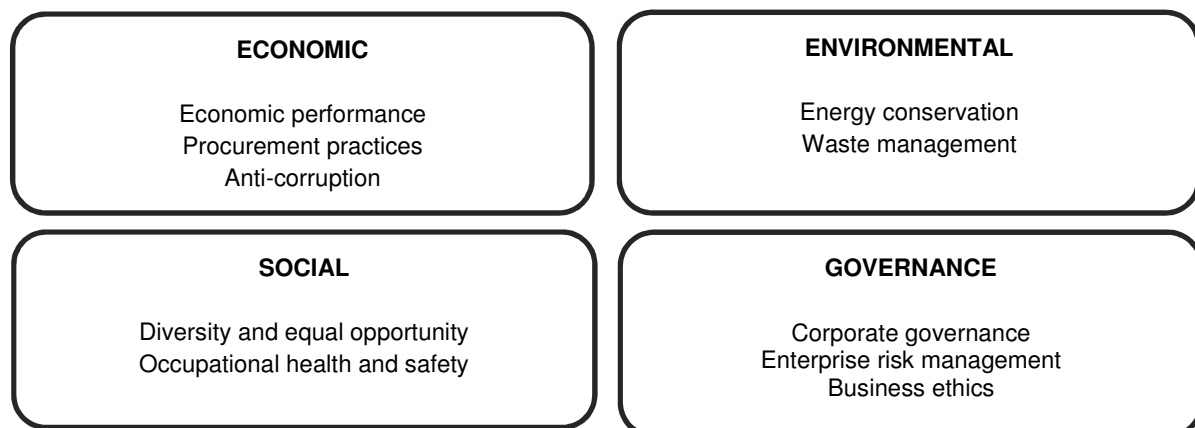

MATERIALITY ASSESSMENT

Our sustainability process begins with the identification of relevant aspects. Relevant aspects are then prioritised to identify material factors which are subject to validation. The end result of this process is a list of material factors disclosed in this Sustainability Report.

The Group has conducted a materiality assessment during the year with the engagement of an external consultant, spearheaded by the Sustainability Steering Committee. We engaged our employees from different departments, seeking our internal stakeholders' feedback in the prioritisation of these topics. Going forward, the Group's materiality review will be conducted every year, incorporating inputs gathered from the various stakeholders' engagements.

In order to determine if an aspect is material, we assessed its potential impact on the economy, environment and society and its influence on the stakeholders. Applying guidance from the GRI, we have identified the following as our Material EESG Factors:

TARGETS

This is our inaugural report and we are currently in the process of improving and refining our data collection methods so as to obtain meaningful and reliable data to track and provide the basis for us to determine trends for the purpose of setting targets. Accordingly, we have deferred the process of target setting till later when adequate data is available to set reasonable targets.

ECONOMIC

ECONOMIC PERFORMANCE

The Group believes that our financial growth is interconnected to our environmental, social and governance factors. We strive to maintain our financial growth to safeguard shareholders' interests and maximise long-term shareholder value through strategic planning to meet the challenges of our business environment and through proper management of our resources, which includes a diligent and experienced staff force and the long established relationships with our customers and suppliers. We will also strive to be a sustainable, socially responsible corporation and will maintain high standards of corporate governance, business integrity and professionalism in our dealings with all our stakeholders.

The following table is a summarized report of our financial results for the financial years ended 31 March 2018 and 2017:

| ECONOMIC PERFORMANCE INDICATORS (S\$'000) | | |
|--|---------------|---------------|
| | FY2018 | FY2017 |
| Revenue | 16,284 | 17,665 |
| Gross margin | 3,250 | 3,035 |
| Income tax | 225 | 47 |
| Profit/(Loss) after tax | 1,388 | (1,153) |

For more detailed information regarding our FY2018 financial results, please refer to the "Financial Review" section and the financial statements contained in our Annual Report 2018.

PROCUREMENT PRACTICES

Distribution of Aluminium Alloy Products

Our first core business is the distribution of aluminium alloy products. Lightweight and durable, aluminium is in itself a highly sustainable material, being abundant, highly recyclable and reusable. According to the Aluminium Association based in Virginia, United States, nearly 75% of all aluminium ever produced is still in use today¹. Aluminium's unique properties therefore present to traders and users a future of infinite possibilities and opportunities.

Our major suppliers are from USA, South Africa, Europe and the PRC and we in turn distribute mainly to local customers. Our top suppliers are industrial leaders in their own locality and they employ workers on a large scale. Most of them have ISO14001 certification for environmental management and ISO9001 certification for quality management and are committed to sustainability development. Our South African supplier for instance, is BBBEE (Broad-Based Black Economic Empowerment) certified for their efforts towards growing, on a sustainable basis, the economic involvement in mainstream businesses for the previously disadvantaged groups. We also buy from local suppliers, and our definition for "local" in this report is when the supplier is in the same geographic boundary as our subsidiary that buys from it. For instance, a PRC aluminium mill supplying to our PRC subsidiary directly is considered a local supplier. We purchase from local suppliers mostly for ready products, so the lead time for the supply is shortened and may, as in Singapore's case, be a matter of only hours to one or two days. This enables us to respond more flexibly to requests of urgent deliveries from our local customers.

Our purchasers choose the suppliers based on needs, quality, service, pricing, terms of payment and

¹ According to the Aluminium Association's website at <https://www.aluminum.org>

other relevant conditions and the decision made is in the best interest of the Company and not for any personal benefit or gain. We have been in the business since 2004 and have built up good business relationships with many of our suppliers on the basis of mutual respect and trust. We do not condone unfair business practices such as concealment or misrepresentation of material facts or acceptance of bribes. We also will not abuse confidential or privileged information obtained from our suppliers. We work closely with our suppliers to ensure their support, for instance, when we need deliveries on an urgent basis.

Components Distributions and Cabling Systems Solutions

Our second core business is components distribution and cabling systems solutions. We are the appointed distributor for our cabling systems products and our electronic test tools. We buy mostly through the Singapore outlets of these principals and we consider such purchases as local purchases. One of our principal is an active member of the U.S. Green Building Council (USGBC), a membership-based non-profit organization that promotes sustainable practices in building design, construction, and operation, and is committed to design and implement solutions that create healthy, energy efficient, and sustainable business environments. As for our electronic test tools, the increasing need for companies to improve quality, comply with regulatory or industrial standards, and maintain a safe working environment, should further increase the demand for such products.

Other than from our principals, we also purchased from other local suppliers, who are mostly small and medium-sized enterprises. Maintaining close relationships with these local suppliers who have information on the local industry trends will benefit the Group, by enhancing our market awareness locally as well. Our procurement practices are similar to that for our aluminium products distribution business, as mentioned above.

During the financial year ended 31 March 2018, purchases from local suppliers made up 36% of total purchases. We target to continue to increase our purchases from local suppliers in the next financial year ending 31 March 2019 ("FY2019") to improve our response time in delivering to our customers as a whole and to enhance our local market presence.

ANTI-CORRUPTION

As the Group's businesses are conducted in various countries, the Group expects the directors and staff to be apprised of the legal and regulatory requirements applicable to their business responsibilities and to conduct our businesses in accordance with these laws and regulations. In particular, the Group requires that the directors and staff carry out business transactions with integrity and avoid corruption or bribery in any form.

Our finance teams oversee the implementation of appropriate controls and procedures to monitor and prevent inappropriate forms of payment across all our subsidiaries. This includes, for example, duplicate or overpayments, and payment requests to third parties not associated with underlying transactions. We will take disciplinary action against any employee confirmed of bribery or corruption or may also refer the case to the relevant law enforcement authorities if appropriate.

In the context of Singapore, we are subject to the Prevention of Corruption Act, which covers employees, public servants and others who corruptly receive or give bribes as an inducement or reward for performing or not performing a transaction. The law also has extra-territorial effect, so Singaporeans who offer bribes or receives bribes overseas will be liable for punishment.

We have implemented a whistle blowing policy to provide a mechanism for employees as well as other external stakeholders to raise concerns in confidence and without fear of reprisals about possible improprieties in the areas of:

1. Fraudulent financial reporting
2. Misappropriation of assets
3. Improper or unauthorized expenditures including bribes
4. Violations of laws and regulations, for instance, securities frauds
5. Substantial and specific danger to public health or safety

Whistle-blowers may address their concerns via the email address auditcom@newwave.com.sg and the Audit Committee will carry out confidential investigations and withhold the identity of the complainant, as appropriate.

For the financial year under review, we have not received any report of any corruption. There are also no reports of whistle blowing received.

ENVIRONMENTAL

Although the direct impact of our business activities on the environment is relatively small, we would like to do our part to contribute to the global goals of mitigating climate change and conserving resources. Our environmental efforts focus on finding ways to reduce energy consumption and waste.

ENERGY CONSERVATION

We believe in investing our time and effort towards energy efficiency, as we not only help protect the environment but can also lower our financial costs. The Group's electricity consumption is from regular operations of the offices and factories in the various regions where our subsidiaries are situated and is consumed for operating machines and office equipment, lighting as well as cooling/heating systems. We have not gathered sufficient data to track the total consumption of electricity for the Group but we will improve our data collection from the next financial year.

We have in FY2018 and as at the date of this report observed energy conservation efforts by adopting the following practices across the subsidiaries:

- Switching off lights, computers and air conditioning systems at the end of the work day
- Regular maintenance of all our operations machines, as well as office equipment such as refrigerators, air-conditioners and heaters so as to maintain higher efficiency
- Use energy saving equipment and lighting
- Set temperature of air conditioners to 25°C for the Singapore and Malaysian subsidiaries
- Raising awareness among employees and educate them about energy conservation and emission reductions

We use fuels and diesel for operating our forklifts, vans and trucks. Regular maintenance and scheduled overhauls for our forklifts and transport vehicles are part of our asset management policy to improve fuel consumption and reduce emission of pollutants. Our logistics staff also plans the delivery route each day to cut wastage of fuels where possible.

We are also supportive of industry-wide initiatives undertaken by our business partners and especially our principals to mitigate the environmental impacts. The products we distribute are designed to include operational energy efficiency and end-of-life and disposal considerations.

WASTE MANAGEMENT

We strive to be environmentally responsible with our commitment towards preserving the environment through efficient waste management such as reuse and recycling to allow us to operate in a sustainable environment.

Key initiatives that are in place in FY2018 and as at the date of this report include the following:

- a. We remind our staff across the Group to reduce the consumption of paper through enhancements made to our daily operating routines. Such enhancements include the scanning of documents which are then stored digitally in computers and servers to avoid overprinting. In addition, electronic version of statement of accounts are issued to customers and suppliers. We also recycle used paper, using them for drafts and internal documentation.
- b. We refurbish and reuse equipment and tools to prolong its useful life where ever possible.
- c. The main waste materials generated from our aluminium products distribution operations are the aluminium shavings from the cutting and sawing of our materials. Our aluminium shavings from production are collected for outsource recycling.

- d. Used saw blades for cutting our aluminium products are re-sharpened for re-use to prolong their useful life.
- e. We are actively involved in the recycling of used packaging materials including cartons, plastic, strings, wraps, wooden pallets and paper.

We also do our part to protect the environment by proper disposal of waste, and especially toxic waste, through licensed contractors. We are committed to ensuring compliance with applicable environmental laws. There were no incidents of non-compliance with environmental rules or regulations in FY2018 and we target to perform the same for FY2019.

SOCIAL

DIVERSITY AND EQUAL OPPORTUNITY

We are an equal opportunity employer and embrace the principles of equality and non-discrimination when hiring employees. Recruitment, remuneration, promotion and benefits are handled based on objective assessment, equal opportunity and non-discrimination basis, regardless of gender, race, religion, age or marital status.

We encourage diversity in our work force, as we believe that by bringing in people with different experiences, backgrounds and skills, we can encourage innovation and we are better able to meet various challenges. Our diversity strategy is facilitated by our physical locations in three geographic regions, and we employ individuals of several nationalities.

As for gender diversity, we actively address any unconscious bias for gender preference and promote gender balance. We aim to develop an inclusive culture that respects the contribution of all employees regardless of gender, race or age. The proportion of women as a percentage of the total workforce is 57% denoting slightly more women in our offices handling accounts and administration duties. There are almost equal numbers of women and men holding management positions in our organization; however the production departments are mostly staffed by men due to the nature of the job, as indicated in the bar chart below.

As to age diversity, we value our matured workers for their experience, knowledge and skills, but recognize the need to train younger workers to drive the Group's operations in the future.

We provide employees with equal opportunities for training and development based on their strengths and needs, to help them achieve their full potential. Suitable training is extended to employees to enable them to perform at optimal levels and include on-the-job training and mentoring, job rotation, product and technical updates conducted by principals and courses, seminars and webinars conducted by external trainers.

Employees are appraised through inputs from the supervisors and managers, as well as periodic formal appraisals. Promotion is based on merit, competency and suitability. As we value our employees, we will double our efforts to consider promoting existing employees before hiring for new or vacant positions.

The Company and its subsidiaries will abide by the local labour laws in the countries within which we operate to promote fair employment practices.

OCCUPATIONAL HEALTH AND SAFETY

Our employees are an integral part of our organization and we are committed to providing them a safe and pleasant environment to work in. Production sites will have safety risks, but we aim to create and sustain a safety focused, zero-accident culture.

At our production sites, the workers are required to operate the cutting machines, forklifts and to handle the heavy aluminium products. We must therefore maintain a safety-conscious culture amongst our workers to avoid any industrial accidents. We have a set of safety rules and regulations in place and all new employees are briefed on safety procedures during orientation. For the financial year ending 31 March 2020, management intends to implement periodic briefing sessions to constantly remind employees the importance of maintaining a safety conscious culture and to emphasize to every employee that each is responsible for his own safety and the safety of his co-workers.

The house rules include:

- proper housekeeping to maintain tidy work areas to avoid falls from unexpected obstacles. Workers are to keep the aisles clear of products or debris for safe operation of the forklifts.
- cleaning and sweeping the production floor regularly and at the end of the day
- wear the right protection equipment when handling the machines which include gloves, face masks, and safety boots
- be always alert when operating machines and not engage in any unsafe or negligent act that may endanger yourself or others working in the vicinity
- report to the supervisor any possible health or safety hazards that have come to your attention.

Each location will have ready first-aid kits maintained on the premises to provide immediate first aid treatments to workers or others who sustain injuries at the location. The employees handling forklifts are licenced to do so after attending proper training courses. In Singapore, all our workers have attended safety courses on metal working, as required by the Ministry of Manpower.

The Group recorded zero workplace accidents during FY2018 and is targeting the same for FY2019.

We encourage our employees to live healthy lives with proper diets and regular exercise. The Company provides free medical consultations and medication, so workers who are unwell may visit the Company approved clinics situated near each of our offices, or any government run clinics. We believe in reducing workplace stress and encourage workers to relax during breaks and aim for work-life balance.

CORPORATE CITIZENSHIP

It is said that sharing our blessings is what makes life meaningful. Towards that end, we also encourage our employees to give some time and effort to the communities in which they live and work. The Company helps to co-ordinate in respect of collection of recyclable used clothings, electrical appliances and other household items for donation to non-profit organisations.

GOVERNANCE

CORPORATE GOVERNANCE

Our Board and Management are committed to continually enhancing shareholder value by maintaining high standards of corporate governance, professionalism, integrity and commitment at all levels, underpinned by strong internal controls and risk management systems.

Our corporate governance practices are set out in the Group's 2018 annual report in the section entitled "Corporate Governance Report" (pages 9 to 24), with specific references to the principles and guidelines of the Code of Corporate Governance 2012 (the "Code"). Where the Group's practices differ from the principles and guidelines under the Code, any deviation from the recommended guidelines under the Code will be duly explained and set out under the Corporate Governance Report.

The Board of Directors sets the overall strategic directions for the Group, establishes goals for management and monitors the achievement of these goals. Specific functions are delegated to Board Committees. The Nominating Committee ensures the balance and diversity of the Board, assesses the performance of the Board and of each Board Committee, as well as the contribution each director made towards the Board's effectiveness. The Nominating Committee also conducts rigorous evaluations of the independence of the independent directors. The Audit Committee works with the external auditors and ensures the quality and integrity of the financial reports, audit procedures, risk management and internal controls. The Remuneration Committee ensures that the Directors and key management personnel are adequately but not excessively remunerated.

The Board's policy is to treat all shareholders fairly and equitably and to provide them with timely information on the Group's financial performance and material developments through public announcements via SGXNET, press publications where appropriate, circulars and annual reports.

The Group has in place an internal code of conduct to ensure that the Directors and key officers adhere to the provisions of the Companies Act and other relevant regulations with regard to their securities transactions, with particular attention to observe insider-trading laws and regulations.

ENTERPRISE RISK MANAGEMENT

The Group is subject to various risks inherent to the different countries, industries and markets in which it does business and to the activities it carries out in each location. Such risks may have negative impacts on its productivity and profitability, and work against achieving its objectives and implementing its strategies.

Aware of the significance of this issue, the Management undertakes to provide resources to adequately identify, measure, manage and control the significant risks to all the activities and businesses of the Group. It has established an enterprise-wide risk management framework which is embedded in the internal control systems of the Group so as to enhance its risk management capabilities. This included institutionalising a systematic risk assessment methodology for the identification, assessment, reporting and monitoring of risks on a consistent and reliable basis. The system is also constantly reviewed and refined, to ensure its relevance in a dynamic operating environment.

The risk management framework addresses financial, operational, compliance and information technology risks to safeguard the Group's assets. On an annual basis, the Audit Committee reviews the risk management policies and system implemented by the Group.

BUSINESS ETHICS

We are committed to operating our businesses with integrity, accountability and high ethical standards.

We do not tolerate bribery and corrupt practices or any other behaviour that may bring disrepute to the Group. We expect honesty, integrity and respect to be exhibited in our dealings and interactions within and outside the Group. All business dealings should be transparently performed and accurately reflected in the Group's books and records.

The Group also takes measures to safeguard access to personal data that are stored on its premises or servers. This applies to data obtained during recruitment of staff, personal data of existing staff, including their medical records and other confidential information relating to customers, suppliers and shareholders. Access to personal data is restricted to authorised persons on a strict need-to-know basis. We will also try to protect all confidential data against cyber security risks in order to protect the confidential information of all stakeholders through constant monitoring of our information technology systems. We also regularly remind all our computer users to stay vigilant to avoid falling prey to phishing or other threats.
