# Notes to Consolidated Financial Statements

The Chugoku Electric Power Co., Inc. and Consolidated Subsidiaries

## 1. Basis of presenting consolidated financial statements

The accompanying consolidated financial statements of The Chugoku Electric Power Co., Inc. (“the Company”) and its consolidated subsidiaries (together with the Company, “the Companies”) have been prepared in accordance with the provisions set forth in the Japanese Financial Instruments and Exchange Law and its related accounting regulations and the Electricity Business Act and in conformity with accounting principles generally accepted in Japan (“Japanese GAAP”), which are different in certain respects as to application and disclosure requirements from International Financial Reporting Standards.

The accounts of the Company’s overseas subsidiaries are based on their accounting records maintained in conformity with generally accepted accounting principles prevailing in the respective countries of domicile. The accompanying consolidated financial statements have been restructured and translated into English from the consolidated financial statements of the Company prepared in accordance with Japanese GAAP and filed with the appropriate Local Finance Bureau of the Ministry of Finance as required by the Japanese Financial Instruments and Exchange Law. Certain supplementary information included in the statutory Japanese language consolidated financial statements, but not required for fair presentation, is not presented in the accompanying consolidated financial statements.

The translations of the Japanese yen amounts into U.S. dollar amounts are included solely for the convenience of readers outside Japan, using the prevailing exchange rate at March 31, 2021, which was ¥111 to U.S. \$1.00. The convenience translation should not be construed as a representation that the Japanese yen amounts have been, could have been or could in the future be converted into U.S. dollars at this or any other rate of exchange.

Numerical values less than one million yen or one thousand dollars are rounded off, excluding per share information. As a result, total values and numerical values obtained by summing each item will not necessarily match. This applies to both Japanese yen units and dollar units.

## 2. Significant accounting policies

The following is a summary of the significant accounting policies used in the preparation of the consolidated financial statements.

### Consolidation

The accompanying consolidated financial statements include the accounts of the Company and significant companies over which the Company has power of control through majority voting rights or existence of certain other conditions evidencing control by the Company. In the elimination of investments in subsidiaries, all the assets and liabilities of a subsidiary, not only to the extent of the Company’s share but also including the non-controlling interest share, are evaluated based on fair value at the time the Company acquired control of the subsidiary.

Investments in non-consolidated subsidiaries and affiliated companies over which the Company has the ability to exercise significant influence over operating and financial policies of the investees are accounted for using the equity method.

For the year ended March 31, 2021, 20 subsidiaries (22 in 2020) were consolidated and 9 (6 in 2020) subsidiaries were excluded from consolidation due to their immateriality for the consolidated total assets, sales and revenues, profit attributable to the owners of the parent, retained earnings, and etc., in the consolidated financial statements.

For the year ended March 31, 2021, 6 non-consolidated subsidiaries (4 in 2020) and 12 affiliated companies (14 in 2020) were accounted for by the equity method.

For the year ended March 31, 2021, 3 non-consolidated subsidiaries (2 in 2020) and 20 affiliated companies (18 in 2020) were stated at cost without applying the equity method of accounting. Even if the equity method had been applied to these investments, the amounts of profit and retained earnings, etc., would individually have had only a slight effect and together would have had no material impact on the consolidated financial statements.

The consolidated subsidiaries whose accounting closing date differs from the consolidated closing date are

Chugoku Electric Power Australia Resources Pty. Ltd., Chugoku Electric Power International Netherlands B.V. , Chugoku Electric Power America, LLC. and Chugoku Electric Power Singapore Pte. Ltd. These companies have December 31 as their closing dates. In drawing up the consolidated financial statements, the Company use these consolidated subsidiaries' financial statements as of their closing dates and make the necessary adjustments, in consolidated terms, for their important transactions that take place between the date and the consolidated closing date.

### Inventories, fuel and supplies

Inventories, fuel and supplies are stated at cost, determined principally by the weighted average method. Inventories with lower profitability have been written down.

### Securities

Available-for-sale securities for which market value is readily determinable are stated at market value as of the end of the period with unrealized gains and losses, net of applicable deferred tax assets/liabilities, not reflected in earnings but directly reported as a separate component of net assets. The cost of securities sold is determined by the moving average method. Available-for-sale securities for which market value is not readily determinable are stated primarily at moving average cost.

If the market value of equity securities issued by unconsolidated subsidiaries or affiliated companies is not accounted for by the equity method, or the market value of the available-for-sale securities declines significantly, the securities are stated at fair market value, and the difference between the fair market value and the book value is recognized as a loss in the period of the decline. If the market value of equity securities issued by unconsolidated subsidiaries or affiliated companies not accounted for by the equity method is not readily available, the securities should be written down to net asset value with the corresponding loss recorded in the consolidated statements of operations in the year that the net asset value declined significantly. In these cases, the fair market value or the net asset value will be the carrying amount of the securities at the beginning of the next year.

### Property and depreciation

Depreciation and amortization of tangible and intangible fixed assets are calculated by the straight-line method, based on the useful life stipulated by the Corporation Tax Act.

### Nuclear fuel and amortization

Nuclear fuel is stated at cost less accumulated amortization. The amortization of loaded nuclear fuel is calculated based on the quantity of heat produced for the generation of electricity.

### Allowance for doubtful accounts

The allowance for doubtful accounts is provided in an amount sufficient to cover possible losses on collection. It consists of the estimated uncollectible amount with respect to identified doubtful receivables and an amount calculated based on the Companies' historical rate of loss with respect to the remaining receivables.

### Provision for loss on disaster

In order to prepare for the costs or losses required to repair the assets damaged due to the torrential rain occurred in July 2018, the Company recorded the amount of loss estimated at March 31, 2021.

### Reserve for fluctuation in water levels

Based on the Act for Partial Revision of the Electricity Business Act, pursuant to the provisions prior to the revision of this Act, the Company provides drought reserves against fluctuation in water levels in the sums stipulated by the Ministry of Economy, Trade and Industry ordinance.

## Accounting methods pertaining to retirement benefits

To prepare for employees' retirement benefits, the figure obtained by subtracting plan assets from retirement benefit obligations from the estimated sums at the end of the consolidated accounting year is recorded as liability for retirement benefits (or as asset for retirement benefits when the plan asset amount exceeds the retirement benefit obligations).

For attributing the estimated retirement benefits to the period until the end of the fiscal year in determining the retirement benefit obligations, the benefit formula basis is principally followed.

Past service costs are amortized by the straight-line method using a certain number of years (mainly 1 year) within the employee's average remaining service period when the costs occurred.

Actuarial gains/losses are apportioned into sums by the straight-line method using a certain number of years (5 years) within the employee's average remaining service period from the consolidated accounting year in which the difference occurred, and each sum is amortized from the consolidated accounting year following the year of occurrence.

Unrecognized actuarial gains/losses and unrecognized past service costs are recorded as accumulated adjustments for retirement benefit in accumulated other comprehensive income in the Net Assets section, after adjusting for tax effects.

## Derivatives and hedge accounting

The Companies state derivative financial instruments at fair value and recognize changes in the fair value as gains or losses unless the derivative financial instrument is used for hedging purposes. If used for hedging purposes and meet certain hedging criteria, recognition of gain/loss is deferred until the loss/gain on the hedged item is recognized.

Under Japan's accounting standards, interest rate swap transactions, forward foreign exchange transactions and currency swap transactions are processed together with the hedged items and are not recognized in terms of losses/gains in derivative transactions.

Hedging effectiveness is evaluated by comparing the total cash flow change of the hedging instrument and the total cash flow change of the hedged item. However, assessment of hedge effectiveness is not carried out for interest rate swap transaction or currency swap transactions that meet certain requirements.

## Capitalization of interest expense

Interest expense related to debt incurred for the construction of power plants has been capitalized and included in the cost of the related assets pursuant to the accounting regulations under the Electricity Business Act.

## Calculating asset retirement obligations for decommissioning specified nuclear power generation facilities

In accordance with an Ordinance of the Ministry of Economy, Trade and Industry, the asset cost equivalent of asset retirement obligations for decommissioning specified nuclear power generation facilities is calculated by applying the straight-line method to the estimated total decommissioning cost for the period equal to the facilities' forecasted operating period.

However, if retiring a reactor due to changes in energy policy, when approval by the Ministry of Economy, Trade and Industry was given upon an application to extend the accumulation period, the straight-line method shall be used to calculate the cost for the period from the month containing the retirement date of the specified nuclear power generation facilities, to the month in which 10 years have passed (if the retirement date is more than 40 years past from the month in which power generation began, then 50 years from the month in which power generation began).

The asset retirement obligations for decommissioning specified nuclear power generation facilities are recorded based on the estimated total decommissioning cost.

## Method of recording the contributions required for spent nuclear fuel reprocessing

For expenses required in the reprocessing of spent nuclear fuel from nuclear power generation, based on the “Act for the Partial Amendment of the Spent Nuclear Fuel Reprocessing Fund Act” (Act No. 40 of 2016; the “Amended Act”), the nuclear power company’s obligation to shoulder costs will be fulfilled by paying a contribution to the Nuclear Reprocessing Organization of Japan (“NuRO”), which will then implement the reprocessing, etc. Furthermore, based on Article 4, Paragraph 1 of the Amended Act, the contribution calculated based on the amount of spent nuclear fuel generated during operation depends on the method used to record it as an electric utility operating expense.

Also, the difference between the estimated costs required in the reprocessing of spent fuel generated up to the end of FY 2005 and the FY 2006 reserve fund recorded under the standard, a ¥3,306 million each year, has been recorded as electric utility operating expense from the effective date of the Amended Act until FY 2020 based on Article 4 of the supplementary provisions of the Ordinance Partially Amending the Accounting Rules for the Electric Power Industry (Ministry of Economy, Trade and Industry Ordinance No. 94 of 2016).

Furthermore, contributions to NuRO include contributions related to processing involved in reprocessing spent nuclear fuel in accordance with Article 2 of the Amended Act, and the said contributions are recorded as suspense account related to reprocessing of spent nuclear fuel.

## Cash and cash equivalents

Cash and cash equivalents include all highly liquid investments with original maturities of three months or less that are readily convertible to known amount of cash as they present insignificant risk of change in value.

## Foreign currency transactions

Receivables and payables denominated in foreign currencies are translated into Japanese yen at the year-end rate.

## Consolidated tax system

The Companies apply the consolidated tax system.

## Application of tax effect accounting for the transition from the consolidated tax payment system to the group taxation system

Having regard to paragraph 3 of “Practical Solution on the Treatment of Tax Effect Accounting for the Transition from the Consolidated Taxation System to the Group Tax Sharing System” (PITF No.39, March 31, 2020), the Company and its domestic consolidated subsidiaries did not follow paragraph 44 of “Implementation Guidance on Tax Effect Accounting” (ASBJ Guidance No. 28, February 16, 2018) but applied provisions of pre-amended tax laws when calculating the amounts of deferred tax assets and liabilities that relate to transitioning to the group taxation system and related amendments of tax laws for transitioning to the single tax payment system.

### 3. Changes in Accounting Policies Difficult to Distinguish from Changes in Accounting Estimates

#### Change in the depreciation method for property, plant and equipment

The Company has conventionally used the declining balance method for depreciation of property, plant and equipment (excluding leased assets), but has changed it to the straight-line method from the year ended March 31, 2020 onward.

From the advancement of electricity system reforms to changes in the way power is consumed prompted by the Great East Japan Earthquake, the business environment surrounding the Company has undergone significant changes in recent years. In terms of regulations, the full-scale liberalization of retail electricity was implemented in 2016 and legal separation was implemented in April 2020. It is expected that competition due to these electricity system reforms will become even more and more intense.

With that in mind, regarding the way power is consumed, although strong numbers of demand can be expected for major industries, the Company also forecast decrease in household demand due to factors such as the population decrease that has already begun and the orientation towards conserving electricity/energy prompted by the Great East Japan Earthquake. For these reasons, the Company projected that the electric power demand in our area will remain virtually at the same level for the next 10 years.

In accordance with the changes in the electric power demand, moving forward, the Company shifted the purpose of capital investment focus items in the "FY 2019 Mid-Term Management Plan" from business expansion to function maintenance, changing the policy to engage in the further stable operation of facilities. For that reason, the Company determined that the straight-line method, which allocates the investment effect to profit stably for a long term, is more in line with the actual situation as the method of depreciation.

As a result, for the year ended March 31, 2020, operating profit increased by ¥21,480 million, and ordinary income and profit before income taxes increased by ¥21,372 million, compared with the figures obtained using the previous method.

### 4. Significant accounting estimates

#### Deferred tax assets

##### (1) Carrying amount as of March 31, 2021

¥56,148 million

##### (2) Information that assists users of the consolidated financial statements in understanding the nature of the accounting estimates

###### 1) Method used for calculating the amount recorded in the consolidated financial statements for the year ended March 31, 2021

The Companies record the deferred tax assets for the amounts deemed to be recoverable through future taxable income estimated in the Mid-Term Management Plan.

###### 2) Main assumptions used in calculating the amounts recorded in the consolidated financial statements for the year ended March 31, 2021

For the future taxable income, the Companies make the best estimates possible based on the information available at present, taking into account predictions for electricity sales, market trends for fuel costs, and etc.

### 3) Effects on the consolidated financial statements for the year ending March 31, 2022

In case of the decrease in the Companies' future taxable income resulted from factors that could not be predicted, such as changes in the competition environment or fluctuations in fuel costs, the Companies' business results may be affected by reversing the deferred tax assets.

## 5. Standards and guidance not yet adopted

The following standard and guidance were issued but not yet adopted.

- "Accounting Standard for Revenue Recognition" (ASBJ Statement No. 29, March 31, 2020)
- "Implementation Guidance on Accounting Standard for Revenue Recognition" (ASBJ Guidance No. 30, March 31, 2020)
- "Electricity Business Accounting Regulations" (Ministry of International Trade and Industry Ordinance No.57, June 15, 1965 amended on March 31, 2021)

### (1) Overview

The "Accounting Standard for Revenue Recognition" and the "Implementation Guidance on Accounting Standard for Revenue Recognition" set out accounting procedures and disclosure guidance regarding revenue from contracts with customers, while the "Electricity Business Accounting Regulations" was amended mainly to comply with the above accounting standard and guidance.

### (2) Effective date

This standard and guidance will be applied from the beginning of the fiscal year ending March 31, 2022.

### (3) Effects of the application of the standards

The Company and its consolidated domestic subsidiaries are currently in the process of determining the effects of these new standards on the consolidated financial statements.

However, the major effect involved in applying these accounting standards includes the charges and grants pursuant to the Act on Special Measures Concerning Procurement of Electricity from Renewable Energy Sources by Electricity Utilities (hereinafter, "Renewable Energy Special Measures Act") which were conventionally recorded as electric revenue based on the Feed-in Tariff Scheme for Renewable Energy. Under the Renewable Energy Special Measures Act, charges are no longer be recorded in the electric revenue, and grants are to be deduced from the electric expense. As a result, the electric revenue and the electric expense will decrease by approximately ¥367,000 million (US\$3,306,306 thousand) for the year ending March 31, 2022. The Companies are currently in the process of determining the amounts of other effects on the consolidated financial statements.

In addition, the residential lighting and electric power charges within the electric revenue have been recorded as revenue based on the amount of electric power charges determined by monthly meter readings (hereinafter, "meter reading date basis") and will continue to be recorded as revenue based on the meter reading date basis in accordance with the "Electricity Business Accounting Regulations" for the year ending March 31, 2022 and onward.

- “Accounting Standard for Fair Value Measurement” (ASBJ Statement No. 30, July 4, 2019)
- “Implementation Guidance on Accounting Standard for Fair Value Measurement” (ASBJ Guidance No. 31, July 4, 2019)
- “Accounting Standard for Measurement of Inventories” (ASBJ Statement No. 9, July 4, 2019)
- “Accounting Standard for Financial Instruments” (ASBJ Statement No. 10, July 4, 2019)
- “Implementation Guidance on Disclosures about Fair Value of Financial Instruments” (ASBJ Guidance No.19, March 31, 2020)

#### (1) Overview

In order to enhance comparability with internationally recognized accounting standards, “Accounting Standard for Fair Value Measurement” and “Implementation Guidance on Accounting Standard for Fair Value Measurement” (together, hereinafter referred to as “Fair Value Accounting Standards”) were developed and guidance on methods measuring fair value was issued. Fair Value Accounting Standards are applicable to the fair value measurement of the following items:

- Financial instruments in “Accounting Standard for Financial Instruments”; and
- Inventories held for trading purposes in “Accounting Standard for Measurement of Inventories.”

Furthermore, the "Implementation Guidance on Disclosures about Fair Value of Financial Instruments" was revised, to include cautionary notes regarding matters such as the breakdown for each level of the fair value for financial instruments.

#### (2) Effective date

These standard and guidance will be applied from the beginning of the fiscal year ending March 31, 2022 onward.

#### (3) Effects of the application of the standards

The Company and its consolidated domestic subsidiaries are currently in the process of determining the effects of these new standards on the consolidated financial statements.

## 6. Changes in presentation

Adoption of “Accounting Standard for Disclosure of Accounting Estimates”

The Companies adopted “Accounting Standard for Disclosure of Accounting Estimates” (ASBJ Statement No. 31, March 31, 2020) from the year ended March 31, 2021 on the consolidated financial statements, and therefore significant accounting estimates are disclosed in the note to the consolidated financial statements.

The note does not include information for the year ended March 31, 2020 in accordance with the transitional provision set out in paragraph 11 of the accounting standard.

#### Consolidated Balance Sheets

Due to the increase in amount, the allowance for doubtful accounts included in “Investments and other assets” in "Other assets" until the year ended March 31, 2020 was disclosed as a separate line item starting from the year ended March 31, 2021. In order to reflect this change in presentation, the Companies have made a rearrangement to the consolidated balance sheets. As a result, ¥86,499 million included in "Other assets" in " Investments and other assets " for the year ended March 31, 2020 has been reclassified to ¥(136) million in " Allowance for

doubtful accounts", and ¥86,635 million in "Other assets".

Also, due to the increase in amount, the allowance for doubtful accounts included in "Receivables" in "Current assets" until the year ended March 31, 2020 was disclosed as a separate line item starting from the year ended March 31, 2021. In order to reflect this change in presentation, the Companies have made a rearrangement to the consolidated balance sheets. As a result, ¥131,785 million in "Receivables" in "Current assets" for the year ended March 31, 2020 has been reclassified to ¥(282) million in " Allowance for doubtful accounts", and ¥132,067 million in "Receivables".

## 7. Additional Information

Reversal of a provision for depreciation of nuclear power plants according to the partial amendment of the Ministerial Ordinance concerning Provision for Depreciation of Nuclear Power Plants

### (1) Descriptions

In accordance with an ordinance of the Ministry of Economy, Trade and Industry executed on August 2, 2019, power generating businesses subject to the ordinance were set as those parties that use the declining balance method to depreciate property, plant and equipment.

Since the Company changed its depreciation method for plant and equipment from the declining balance method to the straight-line method from the year ended March 31, 2020, the Company is no longer an electricity generation utility subject to the Ministerial Ordinance from this year.

As a result, the Company reversed the balance of provision for depreciation of nuclear power plants at September 30, 2019

### (2) Reversed amount

¥86,739 million (Including ¥457 million recorded during consolidated cumulative second quarter year ended March 31, 2020)

### (3) Amount of effect to the consolidated profit (loss)

As a result of reversing the provision for depreciation of nuclear power plants (credit) at September 30, 2019, profit before income taxes for the year ended March 31, 2020 increased by ¥86,739 million.

### Burden charge for smooth decommissioning of reactors

In order to smoothly decommission reactors, the "Decommissioning Accounting Scheme" was established. By applying this decommissioning accounting scheme, the remaining book value of the nuclear reactors decommissioned due to changes in energy policies or changes in safety regulations, etc. can be recovered through the structure of consignment supply service fees for general power transmission and distribution businesses.

Conventionally, the recovery was permitted through collecting retail regulation fees. However, since October 2020, the recovery was shifted to the current scheme considering the continuance of the system.

Pursuant to the stipulations of Article 45, Paragraph 21, Item 6 of the "Regulation for Enforcement of the Electricity Business Act" (Ministry of International Trade and Industry Ordinance No. 77 of 1995), the Company has submitted an application regarding the required reserve amount for the book value of specified nuclear power assets and reserve fund for dismantling nuclear power facilities (hereinafter, "burden charge for smooth decommissioning of reactors"), and this application was approved by the Minister of Economy, Trade and

Industry on July 22, 2020.

In response to this and pursuant to the stipulations of Article 45, Paragraph 21, Item 5 of the "Regulation for Enforcement of the Electricity Business Act" (Ministry of International Trade and Industry Ordinance No. 77 of 1995), the Chugoku Electric Power Transmission & Distribution Co., Inc. altered its general clause for consignment supply services effective October 1, 2020, and is thereby collecting the burden charge for smooth decommissioning of reactors.

#### Disclosure related to the effect of COVID-19 on accounting estimates

While it is still unclear when the COVID-19 will come to an end, taking into an account the effect on retail electricity sales for the year ended March 31, 2021, the Companies deem that there will not be a significant impact on their accounting estimates such as the recoverability of deferred tax assets, at this moment.

## 8. Content of extraordinary loss

Due to the steep rise in the imbalance fee unit price caused by the surge in the electricity market wholesale price in January 2021, some imbalance fees may be difficult to collect, as such allowance for doubtful accounts was recorded for the year ended March 31, 2021.

Following the decision to retire Iwakuni Thermal Power Station made by the Board of Directors meeting held on February 25, 2020, an impairment loss of ¥2,114 million for the generating facilities and a provision of ¥106 million for supplies were recorded for the year ended March 31, 2020. The following describes the assets that have recorded impairment loss.

### (1) Grouping method

Fixed assets used in the electric power operations are considered as a single asset group due to the fact that all assets from power generation to sales activity are used together to create a cash flow.

Fixed assets used in business other than electric power operations are accounted for by business or by location.

Fixed assets other than the above are, in general, accounted for by location or by individual asset.

### (2) Asset outlines and amounts

Impairment loss recognized based on the grouping was ¥2,114 million, and the following describes the fixed assets.

| Millions of yen               |                               |                         |         |
|-------------------------------|-------------------------------|-------------------------|---------|
| Asset                         | Location                      | Type                    | 2020    |
| Iwakuni Thermal Power Station | Iwakuni, Yamaguchi Prefecture | Land                    | ¥ 292   |
|                               |                               | Buildings               | 283     |
|                               |                               | Structures              | 1,216   |
|                               |                               | Machinery and equipment | 320     |
|                               |                               | Other                   | 0       |
| Total                         |                               |                         | ¥ 2,114 |

### (3) Method for calculating recoverable amount

The book value of the applicable assets was written down to the recoverable amount and the amount written down was included in loss on decommissioning of Iwakuni Thermal Power Station. The recoverable amount was measured using the net realizable value, with the estimated cost of disposal deducted from the valuation amount evaluated based on the price of the road rating.

## 9. Cash and cash equivalents

Reconciliations between cash and time deposits recorded in the consolidated balance sheets and cash and cash equivalents recorded in the consolidated statements of cash flows at March 31, 2021 and 2020 were as follows:

|                                                  | Millions of yen |          | Thousands of<br>U.S. dollars |
|--------------------------------------------------|-----------------|----------|------------------------------|
|                                                  | 2021            | 2020     | 2021                         |
| Cash and time deposits                           | ¥59,885         | ¥ 67,401 | \$539,505                    |
| Time deposits with maturities exceeding 3 months | (50)            | (20,060) | (450)                        |
| Cash and cash equivalents                        | ¥59,835         | ¥47,341  | \$539,054                    |

## 10. Content of Important Non-Fund Transactions

The exercise amount of stock acquisition rights in convertible bonds with stock acquisition rights for the years ended March 31, 2021 and 2020 were as follows:

|                                                                                             | Millions of yen |          | Thousands of<br>U.S. dollars |
|---------------------------------------------------------------------------------------------|-----------------|----------|------------------------------|
|                                                                                             | 2021            | 2020     | 2021                         |
| Increase in capital due to exercise of stock acquisition rights                             | ¥—              | ¥ 11,496 | \$—                          |
| Increase in additional paid-in capital due to exercise of stock acquisition rights          | —               | 11,496   | —                            |
| Decrease in bonds with stock acquisition rights due to exercise of stock acquisition rights | ¥—              | ¥ 22,993 | \$—                          |

## 11. Property, plant and equipment

The major classifications of property, plant and equipment at March 31, 2021 and 2020 were as follows:

|                                                                | Millions of yen |             | Thousands of<br>U.S. dollars |
|----------------------------------------------------------------|-----------------|-------------|------------------------------|
|                                                                | 2021            | 2020        | 2021                         |
| Hydroelectric power production facilities                      | ¥ 101,244       | ¥ 109,265   | \$ 912,110                   |
| Thermal power production facilities                            | 164,153         | 170,226     | 1,478,861                    |
| Nuclear power production facilities                            | 98,084          | 97,489      | 883,641                      |
| Transmission facilities                                        | 295,708         | 299,634     | 2,664,036                    |
| Transformation facilities                                      | 154,803         | 148,766     | 1,394,628                    |
| Distribution facilities                                        | 374,036         | 368,242     | 3,369,701                    |
| General facilities                                             | 88,114          | 85,549      | 793,822                      |
| Inactive facilities                                            | 13,655          | 14,316      | 123,026                      |
| Other electric utility plants and equipment                    | 5,232           | 5,194       | 47,139                       |
| Other plants                                                   | 115,532         | 116,898     | 1,040,829                    |
| Construction in progress                                       | 1,105,524       | 1,017,143   | 9,959,681                    |
| Suspense account related to reprocessing of spent nuclear fuel | 18,936          | 15,149      | 170,598                      |
| Total                                                          | ¥ 2,535,026     | ¥ 2,447,876 | \$ 22,838,078                |

Accumulated gains in relation to the receipt of contributions in aid for construction deducted from the original acquisition costs were ¥116,112 million (US\$1,046,062 thousand) and ¥106,968 million at March 31, 2021 and 2020, respectively.

## 12. Financial instruments

### 1. Issues related to financial instruments

#### (1) Approach to financial instruments

Most of the Companies' business consists of electric power business and funds that are necessary for capital investment and operations are raised from bonds, long-term borrowings, short-term borrowings and commercial paper ("CP") according to the Companies' plans for financing.

The Companies' fund management involves only highly safe monetary assets pursuant to these plans.

The derivative transactions are only for receivables and payables (actual demand transactions) arising from the business of the Company and certain consolidated subsidiaries. There are no transactions for speculative purposes.

#### (2) Details and risks of financial instruments and our risk management structure

Long-term investments (available-for-sale securities) consist of stocks of companies that share business interests with us, and the fair value of the stocks and the financial condition of the relevant companies are investigated on a regular basis.

The majority of the Companies' notes receivable and accounts receivable consist of receivables related to the electric power business and are exposed to customer credit risk. For the relevant risk, each customer's due date and balance are controlled in accordance with power supply conditions.

Short-term investments (held-to-maturity securities) are in the form of negotiable deposits and are exposed to the banks' credit risk. The risk is managed by depositing these investments only with banks that have a high credit rating.

Bonds and loans payable are procured mainly for capital investment. Since many interest-bearing debts consist of long-term funds with fixed interest rates (bonds and long-term borrowings), the fluctuation of market interest rates may have limited impact on our business results. Some long-term funds are used for derivative transactions (interest rate swaps and currency swaps) as a means to hedge risk to mitigate or avoid market fluctuation risk.

Due dates of the most notes payable and accounts payable are within one year.

The Company enters into interest rate swap contracts, commodity swap contracts and currency swap contracts to mitigate and avoid market fluctuation risk. The Company has adopted hedge accounting for these instruments.

The Company believes that the related credit risk arising from the event of contract nonperformance by counterparties is extremely low, since the Company uses highly creditworthy financial institutions as counterparties to its derivative transactions, and determines fair values and credit information on a periodic basis.

The Company has established a management function independent from the execution function of derivatives and manages derivative transactions in accordance with internal regulations providing authorization limits, methods of execution, reporting and management, etc.

Although bonds and loans payable are exposed to liquidity risk, the Companies manage liquidity risk by monthly cash management ensuring liquidity that is necessary for operation of the Companies and diversifying financing methods.

#### (3) Supplemental explanation for financial instruments' fair value

The fair value of financial instruments is the market value or a reasonably calculated value when the relevant instruments do not have a market value. Since value calculation reflects variable factors, the relevant value may change depending on preconditions.

Note that the contract amount for derivative transactions in Note 14, "Derivatives and hedge accounting," does not reflect the market risk for the derivative transaction itself.

## 2. Issues related to fair value of financial instruments

The followings are the book values, the fair values and the differences at March 31, 2021 and 2020. Please note that items whose fair value is difficult to evaluate are not included (See Note b).

|                                                         | Millions of yen |            |            |            |            |            | Thousands of U.S. dollars |             |            |

(Note a) Issues related to evaluation method for financial instruments' fair value, securities and derivative transactions

### (1) Long-term investment: Available-for-sale securities

Fair values depend on stock exchange quotations.

For the difference between book value and acquisition cost for available-for-sale securities, please refer to Note 13, "Securities."

### (2) Cash and time deposits and (3) Notes receivable and accounts receivable

Since these are settled in a short time and their fair values approximate the book values, the relevant book values are quoted for them.

For the difference between fair value and book value for held-to-maturity securities, refer to Note 13, "Securities."

### (4) Bonds

Bonds with market value are valued as such. Bonds without market value are valued based on comparable bonds being newly issued or on a price put forward by the financial institution or other organizations. Some bonds are subject to the assignment of currency swaps (Please refer to Note 14, "Derivatives and hedge accounting"). These are valued based on the same terms and conditions applied to the relevant currency swap transactions.

(5) Long-term borrowings

The values of long-term borrowings are calculated using terms as if the borrowings were new loans. Some long-term borrowings are subject to the special treatment of interest rate swaps (Please refer to Note 14, “Derivatives and hedge accounting”). These are valued based on the same terms and conditions applied to the relevant interest rate swap transactions.

(6) Short-term borrowings, (7) Commercial paper and (8) Notes payable and accounts payable

Since these are settled in a short time and their fair values approximate the book values, the relevant book values are quoted for them.

(9) Derivative transactions

Please refer to Note 14, “Derivatives and hedge accounting.”

(Note b) Financial instruments for which assessing fair value is extremely difficult

|                 | Millions of yen |          | Thousands of<br>U.S. dollars |
|-----------------|-----------------|----------|------------------------------|
|                 | Book value      |          |                              |
|                 | 2021            | 2020     | 2021                         |
| Unlisted stocks | ¥ 37,873        | ¥ 37,779 | \$ 341,203                   |
| Other           | 5,355           | 1,917    | 48,245                       |
| Total           | ¥ 43,228        | ¥ 39,696 | \$ 389,448                   |

The above securities do not have market values, and it is difficult to estimate their future cash flow. As a result, they are not included in “(1) Long-term investment: Available-for-sale securities.”

(Note c) Anticipated redemption schedule for monetary claims and debt securities held to maturity subsequent to the fiscal year-end

|                                          | Millions of yen |           | Thousands of<br>U.S. dollars |
|------------------------------------------|-----------------|-----------|------------------------------|
|                                          | Within 1 year   |           |                              |
|                                          | 2021            | 2020      | 2021                         |
| Cash and time deposits                   | ¥ 59,885        | ¥ 67,401  | \$539,505                    |
| Notes receivable and accounts receivable | 136,763         | 128,572   | 1,232,099                    |
| Total                                    | ¥ 196,648       | ¥ 195,973 | \$ 1,771,604                 |

(Note d) Anticipated redemption schedule for bonds, long-term borrowings and other interest-bearing debt subsequent to the fiscal year-end

|                       | Millions of yen |                     |                      |                      |                      |              |

| Total                                                                          | ¥16,053         | ¥7,513           | ¥8,539     | ¥12,599    | ¥7,512           | ¥5,086     | \$144,625                 | \$67,692         | \$76,933   |

At March 31, 2021 and 2020, unlisted stocks of ¥43,228 million (US\$389,448 thousand) and ¥39,696 million, respectively, had no market values. Since estimating their future cash flow to evaluate their fair value, was difficult, the unlisted stocks are not included in the “Available-for-sale securities”.

## 14. Derivatives and hedge accounting

### Derivative transactions for which hedge accounting was not applied

| Categories                     | Type of transaction                                            | Millions of yen    |                                       |            |                           |                    |                                       |            |                           |

## 15. Long-term debt

Long-term debt at March 31, 2021 and 2020 consisted of the following:

|                                                                                                                    | Millions of yen |            | Thousands of U.S. dollars |
|--------------------------------------------------------------------------------------------------------------------|-----------------|------------|---------------------------|
|                                                                                                                    | 2021            | 2020       | 2021                      |
| Bonds due through 2050 at rates of 0% to 3.488% (Note)                                                             | ¥926,462        | ¥921,523   | \$8,346,510               |
| Long-term borrowings from the Development Bank of Japan Inc., other banks and insurance companies due through 2036 | 1,183,862       | 1,182,834  | 10,665,424                |
| Lease obligations                                                                                                  | 864             | 486        | 7,784                     |
|                                                                                                                    | ¥2,111,188      | ¥2,104,843 | \$19,019,719              |
| Less amounts due within one year                                                                                   | (240,401)       | (196,304)  | (2,165,774)               |
| Total                                                                                                              | ¥1,870,787      | ¥1,908,538 | \$16,853,944              |

(Note) Bonds include zero-coupon bonds with stock acquisition rights due in 2022.

At March 31, 2021 and 2020, long-term borrowings from the Development Bank of Japan Inc. in the amounts of ¥310,000 million (US\$2,792,792 thousand) and ¥325,000 million and all bonds above were secured by a statutory preferential right which gives the creditors a security interest in all assets of the Company totaling ¥3,094,988 million (US\$27,882,781 thousand) and ¥3,092,832 million, respectively, senior to that of general creditors. Also, the following assets of consolidated subsidiaries and their investing companies are pledged as collateral for loans from financial institutions and other sources.

|                                                   | Millions of yen |       | Thousands of<br>U.S. dollars |
|---------------------------------------------------|-----------------|-------|------------------------------|
|                                                   | 2021            | 2020  | 2021                         |
| Consolidated subsidiaries                         |                 |       |                              |
| Pledged assets:                                   |                 |       |                              |
| Other property, plant and equipment               | ¥577            | ¥585  | \$5,200                      |
| Pledged debt:                                     |                 |       |                              |
| Long-term borrowings                              | 1,200           | 1,200 | 10,810                       |
| Consolidated subsidiaries' investing<br>companies |                 |       |                              |
| Pledged assets:                                   |                 |       |                              |
| Investments and other assets                      |                 |       |                              |
| Other assets (Note)                               | ¥4,529          | ¥0    | \$40,808                     |

When consolidated subsidiaries' investing companies default on debts, liabilities on consolidated subsidiaries are limited to their invested amounts.

The annual maturities of long-term debt at March 31, 2021 and 2020 were as follows:

| At March 31, 2021<br>Year ending March 31 | Millions of Yen |           | Thousands of<br>U.S. dollars |
|-------------------------------------------|-----------------|-----------|------------------------------|
| 2022                                      | ¥               | 239,917   | \$ 2,161,418                 |
| 2023                                      |                 | 181,968   | 1,639,358                    |
| 2024                                      |                 | 210,434   | 1,895,804                    |
| 2025                                      |                 | 231,916   | 2,089,336                    |
| Thereafter                                |                 | 1,246,038 | 11,225,569                   |

| At March 31, 2020<br>Year ending March 31 | Millions of Yen |           |
|-------------------------------------------|-----------------|-----------|
| 2021                                      | ¥               | 196,089   |
| 2022                                      |                 | 239,982   |

| Thereafter                                |                 | 1,275,625 |

(Note) Excluding lease obligations.

## 16. Contingent liabilities

At March 31, 2021 and 2020, the Companies were contingently liable as guarantors for loans of other companies and employees in the amount of ¥130,418 million (US\$1,174,942 thousand) and ¥127,417 million, respectively.

## 17. Research and development expenses

Research and development expenses charged to operating expenses were ¥11,677 million (US \$105,203 thousand) and ¥11,906 million for the years ended March 31, 2021 and 2020, respectively.

## 18. Retirement benefits

### 1. Overview of the retirement benefit plan adopted

The Companies provide a defined benefit corporate pension scheme – including a hybrid annuity scheme – and a lump sum plan as their defined benefit type plan.

A premium severance payment is also sometimes made when employees retire or otherwise terminate their employment.

In 1984 the Company adopted a qualified pension plan for a part of its retirement allowance system. In 2004, however, under a review of its regulations concerning retirement allowance/pension plans, it shifted to a hybrid annuity scheme, which is a floating-rate type of pension plan, and shifted to a system offering a choice between a defined contribution pension plan and retirement benefit advance payment scheme for part of its retirement lump sum scheme.

Under the defined benefit corporate pension schemes and retirement lump sum schemes of some of the subsidiaries, the simplified valuation method is used for calculating the assets, liabilities and costs for the retirement benefits. In such cases, each is added to the appropriate itemization in “2. Defined benefit plans” below.

### 2. Defined benefit plans

#### (1) Movement in retirement benefit obligations

|                                             | Millions of yen |           | Thousands of<br>U.S. dollars |

| Balance at the end of the fiscal year       | ¥ 240,938       | ¥ 227,859 | \$ 2,170,620                 |

(3) Reconciliation from retirement benefit obligations and plan assets to liability (asset) for retirement benefits

|                                                                                   | Millions of yen |           | Thousands of U.S. dollars |
|-----------------------------------------------------------------------------------|-----------------|-----------|---------------------------|
|                                                                                   | 2021            | 2020      | 2021                      |
| Retirement benefit obligations for defined benefit corporate pension schemes      | ¥ 179,701       | ¥ 184,565 | \$ 1,618,931              |
| Plan assets                                                                       | (240,938)       | (227,859) | (2,170,620)               |
|                                                                                   | (61,237)        | (43,293)  | (551,688)                 |
| Retirement benefit obligations for retirement lump sum schemes                    | 63,133          | 64,153    | 568,770                   |
| Total net liability (asset) for retirement benefits at the end of the fiscal year | ¥ 1,896         | ¥20,859   | \$ 17,081                 |

|                                                                                   | Millions of yen |          | Thousands of U.S. dollars |
|-----------------------------------------------------------------------------------|-----------------|----------|---------------------------|
|                                                                                   | 2021            | 2020     | 2021                      |
| Liability for retirement benefits                                                 | ¥ 64,102        | ¥ 65,718 | \$577,496                 |
| Asset for retirement benefits                                                     | (62,206)        | (44,858) | (560,414)                 |
| Total net liability (asset) for retirement benefits at the end of the fiscal year | ¥ 1,896         | ¥ 20,859 | \$ 17,081                 |

(4) Retirement benefit costs

|                                                                                  | Millions of yen |         | Thousands of U.S. dollars |
|----------------------------------------------------------------------------------|-----------------|---------|---------------------------|
|                                                                                  | 2021            | 2020    | 2021                      |
| Service cost                                                                     | ¥ 8,332         | ¥ 9,030 | \$ 75,069                 |
| Interest cost                                                                    | 478             | 2       | 4,313                     |
| Expected return on plan assets                                                   | (3,437)         | (3,715) | (30,968)                  |
| Net actuarial loss (gain) amortization                                           | 3,511           | 839     | 31,630                    |
| Other                                                                            | 171             | 1,056   | 1,542                     |
| Retirement benefit costs for defined benefit plans at the end of the fiscal year | ¥9,056          | ¥7,213  | \$81,586                  |

(5) Adjustments for retirement benefit

A breakdown of the items (before tax effect deduction) that have been reported as adjustments for retirement benefits was as follows.

|                        | Millions of yen |           | Thousands of U.S. dollars |
|------------------------|-----------------|-----------|---------------------------|
|                        | 2021            | 2020      | 2021                      |
| Actuarial gains/losses | ¥ 19,849        | ¥ (2,840) | \$ 178,823                |
| Total                  | ¥ 19,849        | ¥ (2,840) | \$ 178,823                |

### (6) Accumulated adjustments for retirement benefit

A breakdown of the items (before tax effect deduction) that have been reported as accumulated adjustments for retirement benefits was as follows.

|                                     | Millions of yen |        | Thousands of U.S. dollars |
|-------------------------------------|-----------------|--------|---------------------------|
|                                     | 2021            | 2020   | 2021                      |
| Unrecognized actuarial gains/losses | ¥(12,279)       | ¥7,569 | \$(110,630)               |
| Total                               | ¥(12,279)       | ¥7,569 | \$(110,630)               |

### (7) Plan assets

① The percentages of the main categories of plan assets were as follows.

|                                 | 2021 | 2020 |
|---------------------------------|------|------|
| Bonds                           | 36%  | 37%  |
| Equity securities               | 13%  | 10%  |
| Life insurance general accounts | 38%  | 40%  |
| Other                           | 13%  | 13%  |
| Total                           | 100% | 100% |

② Long-term expected rates of return

The long-term expected rate of return on plan assets is determined by taking into account the allocation of current and expected plan assets as well the long-term rates of return to be expected currently and in the future for the various assets that consist of the plan assets.

### (8) Actuarial assumptions

The major actuarial assumptions were as follows.

|                                   | 2021        | 2020        |
|-----------------------------------|-------------|-------------|
| Discount rate                     | mainly 0.2% | mainly 0.2% |
| Long-term expected rate of return | mainly 1.5% | mainly 1.5% |

## 3. Defined contribution pension plan

The contributions required from the Companies to the defined contribution pension plan amounted to ¥845 million (US\$7,614 thousand) and ¥757 million for the years ended March 31, 2021 and 2020, respectively.

## 19. Income taxes

The Company is subject to a number of taxes based on income.

Significant components of the Companies' deferred tax assets and liabilities at March 31, 2021 and 2020 were as follows:

|                                                | Millions of yen |          | Thousands of U.S. dollars |
|------------------------------------------------|-----------------|----------|---------------------------|
|                                                | 2021            | 2020     | 2021                      |
| Deferred tax assets:                           |                 |          |                           |
| Excess depreciation                            | ¥ 24,288        | ¥ 24,700 | \$218,814                 |
| Asset retirement obligations                   | 13,260          | 13,028   | 119,459                   |
| Adjustment for unrealized intercompany profits | 10,021          | 9,544    | 90,281                    |
| Construction and repair costs                  | 5,909           | 6,027    | 53,238                    |
| Accrued bonuses and other expenses             | 3,763           | 3,756    | 33,905                    |
| Reprocessing of irradiated nuclear fuel        | 2,250           | 2,275    | 20,273                    |
| Liability for retirement benefits              | 862             | 6,234    | 7,772                     |
| Other                                          | 17,099          | 14,327   | 154,047                   |
| Total gross deferred tax assets                | 77,455          | 79,895   | 697,794                   |
| Less valuation allowance                       | (16,699)        | (16,235) | (150,442)                 |
| Total deferred tax assets                      | 60,756          | 63,660   | 547,351                   |
| Deferred tax liabilities:                      |                 |          |                           |
| Unrealized holding gains on securities         | (2,712)         | (1,633)  | (24,441)                  |
| Other                                          | (1,959)         | (1,631)  | (17,656)                  |
| Total deferred tax liabilities                 | (4,672)         | (3,265)  | (42,097)                  |
| Net deferred tax assets                        | ¥56,083         | ¥60,395  | \$505,254                 |

The effective tax rate reflected in the consolidated statements of operations for the year ended March 31, 2021 differs from the statutory tax rate for the following reasons.

|                                              | 2021   | 2020 |
|----------------------------------------------|--------|------|
| Statutory tax rate                           | 27.96% | —    |
| Tax credit                                   | △5.53% | —    |
| Equity in net income of affiliated companies | △5.49% | —    |
| Valuation allowance                          | 3.00%  | —    |
| Enterprise tax                               | 1.77%  | —    |
| Other                                        | 0.33%  | —    |
| Effective tax rate                           | 22.04% | —    |

(Note) For the year ended March 31, 2020, since the difference between the statutory tax rate and the effective tax rate was less than 5% of the statutory tax rate, notes are omitted.

## 20. Asset retirement obligations

Asset retirement obligations included in the consolidated balance sheets

### (1) Outline of the asset retirement obligations

Asset retirement obligations are recorded mainly in conjunction with measures to decommission specified nuclear power generation facilities under the “Act on the Regulation of Nuclear Source Material, Nuclear Fuel Material and Reactors.” In accordance with an ordinance of the Ministry of Economy, Trade and Industry, the cost is calculated by applying the straight-line method to the estimated total decommissioning cost for the facilities’ forecast operating period.

However, if retiring a reactor due to changes in energy policy, when approval by the Ministry of Economy, Trade and Industry was given upon an application to extend the accumulation period, the straight-line method shall be used to calculate the cost for the period from the month containing the retirement date of the specified nuclear power generation facilities, to the month in which 10 years have passed (if the retirement date is more than 40 years past from the month in which power generation began, then 50 years from the month in which power generation began).

### (2) Method of calculating the value of the asset retirement obligations

The value of the asset retirement obligations was calculated mainly by taking as the estimated use period the accumulation period (generation facilities’ forecasted operating period) which is prescribed in the Ordinance of the Ministry of Economy, Trade and Industry, and using a discount rate of 2.3%.

### (3) Variation in the total value of the asset retirement obligations during the years ended March 31, 2021 and 2020:

|                                                | Millions of yen |         | Thousands of U.S. dollars |
|------------------------------------------------|-----------------|---------|---------------------------|
|                                                | 2021            | 2020    | 2021                      |
| Balance at the beginning of the fiscal year    | ¥93,709         | ¥91,856 | \$844,232                 |
| Changes in estimated obligations and accretion | 2,332           | 1,852   | 21,014                    |
| Balance at the end of the fiscal year          | ¥96,042         | ¥93,709 | \$865,246                 |

## 21. Net assets

Under Japanese laws and regulations, the entire amount paid for new shares is required to be designated as common stock.

However, a company may, by a resolution of the Board of Directors, designate an amount not exceeding one-half of the price of the new shares as additional paid-in capital, which is included in capital surplus.

Under the Company Law, in cases in which a dividend distribution of surplus is made, companies are required to set aside an amount equal to at least 10% of the aggregate amount of cash dividends as additional paid-in capital or as legal earnings reserve until the total of these equals 25% of common stock. Legal earnings reserve is included in retained earnings in the accompanying consolidated balance sheets.

Neither additional paid-in capital nor legal earnings reserve can be distributed as dividends. However, all additional paid-in capital and all legal earnings reserve may be transferred to other capital surplus and retained earnings, which are potentially available for dividends.

The maximum amount that the Company can distribute as dividends is calculated based on the non-consolidated financial statements of the Company in accordance with Japanese law and regulations.

At the annual stockholders’ meeting held on June 25, 2021, the stockholders approved cash dividends amounting to ¥9,013 million (US\$81,201 thousand). The appropriations had not been accrued in the consolidated financial statements at March 31, 2021. Such appropriations are recognized in the period in which they are approved by the stockholders.

## 22. Segment information

The Companies' reporting segments are structural units of the Companies that are separated from the others and for which separate financial information is available. This information is the subject of periodic deliberations by the Board of Directors in order to decide the allocation of business resources and evaluate business results.

With electric power as their core, the Companies are developing total solution operations by focusing pouring business resources into strategic business domains that can exploit the Companies' strengths.

Thus, from the year ended March 31, 2021, the Companies are composed of three reporting segments: combining power generation and electric power sales business with comprehensive energy supply business to be a single business unit the "Comprehensive energy", following the legal separation implemented on April 1, 2020 the "Power transmission and distribution", and the "Information and telecommunications".

### Change in the depreciation method for property, plant and equipment

As described in Note 3 "Changes in Accounting Policies Difficult to Distinguish from Changes in Accounting Estimates", The Company has conventionally used the declining balance method for depreciation of property, plant and equipment (excluding leased assets), but has changed it to the straight-line method from the year ended March 31, 2020 onward.

### Changes in segment categories

From the year ended March 31, 2021, following the legal separation of the power transmission and distribution division implemented on April 1, 2020, the Companies separated the "Power transmission and distribution" from "Electric power" and combined "Comprehensive energy supply" to be "Comprehensive energy".

| Before                                                                                                   | After                                                                                                 |
|----------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| [Electric power]<br>Power generation, Electric power sales,<br>Power transmission and distribution, etc. | [Comprehensive energy]<br>Power generation, Electric power sales, Fuel sales,<br>Heat supply, etc.    |
| [Comprehensive energy supply]<br>Electric power sales, Fuel sales, Heat supply, etc.                     | [Power transmission and distribution]<br>Power transmission and distribution, etc.                    |
| [Information and telecommunications]<br>Tele-communications, Information processing, etc.                | [Information and telecommunications](no changes)<br>Tele-communications, Information processing, etc. |

Furthermore, following the legal separation of the power transmission and distribution division implemented on April 1, 2020, the segment information for the year ended March 31, 2020 has been prepared based on the new classification using certain assumptions that the power transmission and distribution division had been legally separated.

A summary by segment for the years ended March 31, 2021 and 2020 is as follows:

|                                                  | Millions of yen         |                                           |                                            |            |         |            |                      |              |
|--------------------------------------------------|-------------------------|-------------------------------------------|--------------------------------------------|------------|---------|------------|----------------------|--------------|
|                                                  | 2021                    |                                           |                                            |            |         |            |                      |              |

(Note) “Adjustment” of “Segment income (loss)” in an amount of ¥(1,921) million (US\$(17,309) thousand) and ¥(1,687) million refers to intersegment elimination for the years ended March 31, 2021 and 2020, respectively.

“Adjustment” of “Segment assets” in an amount of ¥(958,398) million (US\$(8,634,221) thousand) and ¥(979,874) million refers mainly to intersegment elimination for the years ended March 31, 2021 and 2020, respectively.

“Adjustment” of “Value increase in tangible and intangible assets” in an amount of ¥(3,678) million (US\$(33,141) thousand) and ¥(3,398) million refers mainly to intersegment elimination for the years ended March 31, 2021 and 2020, respectively.

Since the categories for products and services are the same as the categories within the reporting segments, information about individual products and services is omitted here.

Since the Companies’ sales to external customers in Japan accounted for over 90% of the total sales in the Consolidated Statements of Operations for the years ended March 31, 2021 and 2020, information concerning region-by-region sales amounts is omitted here.

Since the value of the Companies' property, plant and equipment located in Japan accounted for over 90% of the value of property plant and equipment in the consolidated balance sheets at March 31, 2021 and 2020, information concerning region-by-region property, plant and equipment is omitted here.

Since no customer among the Companies' external customers accounted for 10% or more of the total sales in the Consolidated Statements of Operations for the years ended March 31, 2021 and 2020, information concerning major customers is omitted here.

## Information on impairment loss for fixed assets in each reporting segment

There is nothing to note about Information on impairment loss for fixed assets in each reporting segment for the year ended March 31, 2021.

Information on impairment loss for fixed assets in each reporting segment for the year ended March 31, 2020 is listed below.

| Millions of yen             |                                     |                                     |       |        |       |            |              |         |

| Year-end cash dividends, ¥25 (US\$0.22) per share | ¥ 9,013         | \$ 81,201                 |

## Independent Auditor's Report

To the Board of Directors of The Chugoku Electric Power Co., Inc.

### Opinion

We have audited the accompanying consolidated financial statements of The Chugoku Electric Power Co., Inc. ("the Company") and its consolidated subsidiaries (collectively referred to as "the Group"), which comprise the consolidated balance sheets as at March 31, 2021 and 2020, the consolidated statements of operations and comprehensive income, changes in net assets and cash flows for the years then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at March 31, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with accounting principles generally accepted in Japan.

### Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in Japan. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Japan, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Emphasis of Matter

We draw attention to Note 3 to the consolidated financial statements. The Company conventionally used the declining balance method for depreciation of property, plant and equipment (excluding leased assets), but has changed it to straight-line method from the year ended March 31, 2020. Our opinion is not modified in respect of this matter.

### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

| Revenue recognition of electric lighting and power charges                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| The key audit matter                                                                                                                                                                                                                                                                                                                                                                                                                | How the matter was addressed in our audit                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| The Chugoku Electric Power Co., Inc.'s electric revenue of ¥1,161,494 million in the consolidated statements of operations for the current fiscal year included ¥806,370 million of revenue related to residential electric lighting and commercial electric power charges (hereinafter referred to as the "electric lighting and power charges"), representing approximately 61.6% of total operating revenue, ¥1,307,498 million. | <p>The primary procedures we performed to assess whether the electric lighting and power charges are properly recognized included the following:</p> <p><b>(1) Testing internal controls relevant to the electric lighting and power charges</b></p> <p>We tested the design and operating effectiveness of the following internal controls relevant to the key audit matter. The internal controls related to the IT systems were evaluated by our own IT specialists.</p> |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>As described in Note “Standards and guidance not yet adopted”, electric lighting and power charges are recognized as revenue based on the electricity usage determined by monthly meter readings. The series of transactions including reception, meter reading, charge calculation, billing and collection are managed by a sales management system, and the charges are automatically calculated based on the electricity usage determined by the meter reading and the contract unit price registered in customer data. The results of the calculations are interfaced from the sales management system to the accounting system monthly and the electric lighting and power charges are recognized in the accounting system. Since the number of customers and contracts are extremely large, the electric lighting and power charges are highly dependent on automated controls throughout the process. We, therefore, determined that to record the electric lighting and power charges which are of high importance in amount accurately, the appropriateness of the Company’s IT systems including the sales management system, the accounting system and the various databases to be properly designed and operated was one of the most significant in our audit of the consolidated financial statements for the current fiscal year, and accordingly, a key audit matter.</p> | <ul style="list-style-type: none"> <li>● Process level controls for the automated charge calculations in the sales management system;</li> <li>● Controls related to the examination and approval by supervisors on the charge correction;</li> <li>● Process level controls for the interface between the related IT systems within the sales management system and the accounting system;</li> <li>● Controls related to the examination and approval on the closing of the electric lighting and power charges; and</li> <li>● General IT controls such as access to programs and data, program changes, and computer operations over the sales management system and the accounting system.</li> </ul> <p><b>(2) Other audit procedures relevant to the electric lighting and power charges</b></p> <p>In addition to the internal control testing, we performed the following.</p> <ul style="list-style-type: none"> <li>● Within the electric lighting and power charges, the sales transactions with large commercial and industrial customers have a large per amount of revenue, which would have a significant impact on the financial reporting, and therefore we analyzed the unit price for each customer calculated with the electric power charges and the amount of electricity usage. We performed detailed procedures on the items that indicated some inaccurate electric power charges; and</li> <li>● We examined the contents of the journal entries concerning the electric lighting and power charges directly recorded into the accounting system without going through the sales management system.</li> </ul> |

## Responsibilities of Management and the audit and supervisory committee for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in Japan, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern in accordance with accounting principles generally accepted in Japan and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The audit and supervisory committee are responsible for overseeing the directors’ performance of their duties with regard to the design, implementation and maintenance of the Group’s financial reporting process.

## Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with auditing standards generally accepted in Japan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of our audit in accordance with auditing standards generally accepted in Japan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, while the objective of the audit is not to express an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate whether the presentation and disclosures in the consolidated financial statements are in accordance with accounting standards generally accepted in Japan, the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the audit and supervisory committee regarding, among other matters, the planned scope and timing of the audit, significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the audit and supervisory committee with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the audit and supervisory committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**Convenience Translation**

The U.S. dollar amounts in the accompanying consolidated financial statements with respect to the year ended March 31, 2021 are presented solely for convenience. Our audit also included the translation of yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made on the basis described in Note 1 to the consolidated financial statements.

**Interest required to be disclosed by the Certified Public Accountants Act of Japan**

We do not have any interest in the Group which is required to be disclosed pursuant to the provisions of the Certified Public Accountants Act of Japan.
