FOR IMMEDIATE RELEASE

Data Center Industry Veterans Joins AsiaPhos With Ambitions For Asia Pacific Portfolio

- Mr Wong Ka Vin has been appointed Business Head of Datacenters. His last position was Country General Manager (Malaysia and Indonesia) at Singtel's datacenter division (now Nxera),
- Mr Goh Eng Teong has been appointed Head of Technology. He had more than 20 years distinguished career in data center technology architecture, digital infrastructure, cybersecurity, and operations.
- Target to build Asia Pacific portfolio of data centers

SINGAPORE – September 21, 2026 – AsiaPhos Limited ("**AsiaPhos**" and, together with its subsidiaries, the "**Group**") announced the appointment of two senior industry leaders to spearhead the Company's strategic entry into the data centre business. These appointments mark a pivotal step in Asiaphos' business diversification journey and underscore the Board's commitment to building a world-class data centre platform in Asia.

Mr Wong Ka Vin has been appointed Business Head of Datacenters, and Mr Goh Eng Teong has been appointed Head of Technology. Both gentlemen will report directly to the Chief Executive Officer of Asiaphos Limited.

Mr Wong Ka Vin is one of Asia's most respected data centre industry veterans, with more than 25 years of leadership experience spanning the full spectrum of data centre development, operations, and business building across Southeast Asia and the broader Asia-Pacific region. His last employment was Country

General Manager (Malaysia and Indonesia) at Singtel's datacenter division (now Nxera), one of Singapore's foremost data centre operators, where he oversaw commercial and operational strategy for the group's data centre portfolio.

Mr Goh Eng Teong is a highly experienced technology and engineering leader with a distinguished career in data centre technology architecture, digital infrastructure, cybersecurity, and operations. He brings both hands-on technical depth and strategic leadership experience to Asiaphos' growing data centre team. Mr Goh's technology leadership spans data centre reference architecture, power and cooling design, network and connectivity strategy, cybersecurity and resilience governance, DCIM and BMS integration, SmartOps automation, and the development of AI-ready and high-density infrastructure platforms suited to the demands of next-generation workloads.

"We are delighted to welcome Ka Vin and Eng Teong to the team. Together, they bring an exceptional and complementary set of capabilities — Ka Vin's unparalleled track record in building data centre businesses from the ground up across Asia, and Eng Teong's deep technical expertise in data centre architecture, cybersecurity, and digital operations. Their combined experience positions Asiaphos to move swiftly and decisively in establishing a credible and competitive data centre platform. We look forward to the value they will bring to our shareholders and partners as we embark on this exciting new chapter to build an Asia Pacific portfolio of data centers." remarked Mr Ong Eng Keong, Chief Executive Officer of AsiaPhos Limited.

“Asiaphos has recently mounted on a digital transformation of its business to explore opportunities in the data centre industry. We are excited to be part of this development plan. By leveraging on our industry knowledge, networks of data centres customers and institutional investors, along with Asiaphos experience in the financial market, we are confident of achieving our ambitions to build a Asia

Pacific portfolio of data centers," commented Mr Wong Ka Vin and Mr Goh Eng Teong.

About the Datacenter Business

Asiaphos Limited is actively pursuing a strategic diversification into the data centre sector, targeting opportunities across Southeast Asia and the Asia-Pacific region, with an initial focus on Malaysia, Indonesia, Australia, and Japan. The Company intends to build a full-spectrum data centre platform covering site acquisition, development, fund management, and operations — with the objective of becoming a preferred partner for hyperscalers, enterprise cloud customers, and institutional investors seeking exposure to the region's fast-growing digital infrastructure.
