

SPDR® Gold Shares (GLD) Quarterly Dashboard

by the SPDR Gold Strategy Team

As of June 30, 2016

What Happened to Gold in the second quarter?

Gold rallied in the second quarter — even ahead of the UK's "Brexit" vote to exit the EU — aided by the Fed's decision to maintain its rate outlook.

In the wake of news that the pace of improvement in the labor market has slowed, it came as no surprise that the Fed once again kept interest rates unchanged.

Gold's gains were further fueled at the very end of the quarter after the UK's vote to exit the EU. Prices jumped by almost \$110/ounce to a three-year high of \$1,358/ounce.

Looking ahead, gold may continue to resonate with investors concerned over the implications behind the "Brexit" vote, the US elections and persistent geopolitical tensions.

Gold Vitals

Factors	Trend*	Potential Impact**	30-Jun-16	52 Week High	52 Week Low
Gold Price (USD/oz)	↑	↑	1320.80	1324.60	1049.40

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted.

Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income.

Effective March 20, 2015, the SPDR Gold Trust (GLD) adopted the LBMA Gold Price PM as the reference benchmark price of gold in calculating the Net Asset Value (NAV) of the Trust. Prior to that date, the Trust used the London PM Fix as the reference benchmark price in calculating the NAV.

Gross Expense Ratio: 0.40% The gross expense ratio is the fund's total annual operating expense ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus.

Definitions

Bloomberg Commodity Sentiment Gold Bullish Readings Index A weekly measure of analysts and traders who are bullish on gold that is compiled by Bloomberg News. The number of participants in the survey may vary.

Brexit An abbreviation of the term "British Exit," which refers to the UK referendum on June 23, 2016 that resulted in the country's decision to withdraw from the European Union. Under Article 50 of the EU's Lisbon Treaty, countries like the UK that vote to exit the common market must formally trigger Article 50, after which they have 24 months to officially leave the EU. Supporters of the Brexit argued that EU membership has hurt both the competitiveness of the British economy and exposed the UK to unchecked immigration into EU countries.

COMEX The main futures market for trading metals such including gold, silver, copper and aluminum.

Gold Bullish Sentiment A measure of gold market sentiment created and published by Bloomberg. The weekly survey measures the percentage of gold analysts and traders who are bullish, bearish or neutral on gold.

ICE U.S. Treasury 7–10 Year Bond Index A fixed-income benchmark created by the Intercontinental Exchange, or ICE, that focuses on debt issued by the US Department of the Treasury. The index includes only U.S. dollar denominated, fixed-rate securities that have a minimum term to maturity greater than seven years and less than or equal to 10 years.

LBMA Gold Price The LBMA Gold Price is determined twice each business day (10:30 a.m. and 3:00 p.m. London time) by the participants in a physically settled, electronic and tradable auction administered by the IBA using a bidding process that determines the price of gold by matching buy and sell orders submitted by the participants for the applicable auction time.

Long Gold Positions Speculative long positions on gold and other futures are recorded in the weekly Commitment of Traders Report published by the Commodities Futures Trading Commission, or CFTC, and measure the amount of gold ounces that are represented by gold futures that will be profitable should the price of gold rise.

SPDR® Gold Shares (GLD) Quarterly Dashboard by the SPDR Gold Strategy Team

MSCI ACWI Index MSCI ACWI Index is a free-float weighted equity index that includes companies in both emerging and developed world markets and is designed to be a proxy for most of the investable equities universe around the world.

Net Positions Net positions in gold futures and other futures markets is the difference between the number of speculative long and speculative short positions. The data, found in the weekly Commitment of Traders Report, are published by the Commodities Futures Trading Commission, or CFTC.

S&P Goldman Sachs Commodity Index, or S&P GSCI A production-weighted index launched in 1992 that tracks the performance of 24 commodity futures contracts. The index, tilts to commodities that are more heavily produced globally, so its weights more heavily to crude oil than, say, to cocoa.

Short Gold Positions Speculative short positions on gold and other futures are recorded in the weekly Commitment of Traders Report published by the Commodities Futures Trading Commission, or CFTC, and measure the amount of gold ounces that are represented by gold futures that will be profitable should the price of gold fall.

US Dollar Index The US Dollar Index (DXY) Index measures the performance of the US Dollar against a basket of currencies: the euro (EUR), the Japanese yen (JPY), the British pound sterling (GBP), the Canadian dollar (CAD), the Swiss Franc (CHF) and the Swedish krona (SEK).

US Generic Government 10 Year Yields Index A fixed-income index compiled by Bloomberg that measures yields of generic US, on-the-run, government notes and bond indices. Yields are yield to maturity and pre-tax, are based on the ask side of the market and are updated intraday. Yields included in the index are precise to 4 decimal places.

US 10-Year Treasury Note Yield (Used in Macro Sensitivity) The interest rate paid to holders of U.S. 10 Year Treasury Notes. The rate is comprised of Generic United States on-the-run government 10 Year Treasuries. The yield quoted is yield to maturity and on a pre-tax basis.

SPX Volatility Index VIX, or CBOE Volatility Index The SPX Volatility Index, also called the VIX or the CBOE Volatility Index, is a measure of the market's expectation of 30-day volatility. It is constructed using the implied volatilities of a wide range of S&P 500 index options.

SPDR® Gold Shares (GLD) Quarterly Dashboard by the SPDR Gold Strategy Team

* We define Trend as a comparison between end-of-month, 50-day, and 200-day readings for each factor. A positive trend is identified if either the end-of month reading is greater than the 50-day reading or if the 50-day reading is greater than the 200-day reading. We identify a negative trend when either the end-of month reading is less than the 50-day reading or when the 50-day reading is less than the 200-day reading. We define a flat trend as instances when the prevailing movement is neither positive nor negative.

** We define "Potential Impact" as the possible impact each of the trends may have on the price of gold.

*** Gold holdings in ETFs are represented by the securities tracked by the World Gold Council that, together, make up substantially all of the global ETF universe.

**** We view the correlation coefficient as a metric that measures the strength and direction of a linear relationship between two variables. We believe it measures the degree to which the deviations of one variable from its mean are related to those of a different variable from its respective mean. We consider a correlation between -1.0 to -0.5 or 0.5 to 1.0 to be "strong," one between -0.5 to -0.3 or 0.3 to 0.5 to be "moderate," and one between -0.3 to -0.1 or 0.1 to 0.3 to be "weak." We view a correlation coefficient between -0.1 to 0.1 as having "no correlation" or a "very weak" correlation.

¹ Gold holdings in ETFs are represented by the securities tracked by the World Gold Council that, together, make up substantially all of the global ETF universe.

Important Information Relating to SPDR Gold Trust ("GLD®"):

The SPDR Gold Trust ("GLD®") has filed a registration statement (including a prospectus) with the Securities and Exchange Commission ("SEC") for the offering to which this communication relates. Before you invest, you should read the prospectus in that registration statement and other documents GLD has filed with the SEC for more complete information about GLD and this offering. You may get these documents for free by visiting EDGAR on the SEC website at sec.gov or by visiting spdrgoldshares.com. Alternatively, the SPDR Gold Trust or any authorized participant will arrange to send you the prospectus if you request it by calling 866.320.4053.

GLD is not an investment company registered under the Investment Company Act of 1940 (the "1940 Act") and is not subject to regulation under the Commodity Exchange Act of 1936 (the "CEA"). As a result, shareholders of the Trust do not have the protections associated with ownership of shares in an investment company registered under the 1940 Act or the protections afforded by the CEA.

GLD shares trade like stocks, are subject to investment risk and will fluctuate in market value. The value of GLD shares relates directly to the value of the gold held by GLD (less its expenses), and fluctuations in the price of gold could materially and adversely affect an investment in the shares. The price received upon the sale of the shares, which trade at market price, may be more or less than the value of the gold represented by them. GLD does not generate any income, and as GLD regularly sells gold to pay for its ongoing expenses, the amount of gold represented by each Share will decline over time. Investing involves risk, and you could lose money on an investment in GLD. Please see the GLD prospectus for a detailed discussion of the risks of investing in GLD shares. The GLD prospectus is available [here](#).
