**Eindec Corporation Awarded S\$3 Million New Contracts for
Commercial and Residential Projects**

--New Corporate Headquarters in Singapore is located at 100H Pasir Panjang Road--

SINGAPORE, 9 June 2017: CATALIST-LISTED Eindec Corporation Limited (英德集团有限公司) (“**Eindec**” or together with its subsidiaries, the “**Group**”), a regional manufacturer of heating ventilation and air-conditioning (“**HVAC**”) and air purification system, announced that it was awarded \$3 million worth of new contracts in Singapore and Malaysia at the official opening of its new corporate headquarters at 100H Pasir Panjang Road, OC@Pasir Panjang #01-01, Singapore 118524.

Eindec has secured 3 major contracts for *Clean Room Equipment*, mainly being Fan Filter Units along with its standalone control system, to some of the world’s largest opto-electronic semiconductor and data storage and media devices manufacturers located in Northern Malaysia.

Closer to home is another contract to supply a range of HVAC equipment including grille, diffuser, fire damper, volume damper and VAV box, for a commercial tower located in Central Business District in Singapore.

In addition, a notable project was awarded to Eindec for the supply of fresh *air purification and ventilation system* to Luxus Hills - a luxury landed property project in the North Eastern region of Singapore. This is the first time in Singapore that such air purification technology is being incorporated within the residential developments, other than using conventional household air purifiers. Unlike conventional household air purifiers which only purify air without new supply of fresh air, Eindec’s fresh air purification and ventilation system uses a state-of-art technology which draws fresh air from outside the building and passes through three stages of filter before re-flowing into the house to replace stale air.

Mr. Darran Lim, the Group’s Executive Director and Chief Executive Officer, said: “We are pleased to secure these projects for our Eindec branded product range which we will design and supply customised air purification system, cleanroom and HVAC solutions catering to the customised requirements of both commercial and residential projects in Singapore and Malaysia. We target to bid for more projects through strategic partnerships regionally, both in existing markets such as Singapore, China and Malaysia as well as new markets such as Indonesia and Vietnam.”

Eindec's specialised engineering and design capabilities enable the Company to design and manufacture customised air purification systems and environmental solutions to meet customers' requirements and offer new products with innovative or enhanced features.

Established since 1984, it has an established track record in the design, manufacture and distribution of air purification system, cleanroom and HVAC equipment across a diversified customer base in various industries such as building and construction, cleanroom and offshore oil and gas industries.

The opening ceremony, attended by over 60 guests including customers and business partners, marked the auspicious occasion for the unveiling of its new corporate logo to commemorate its 33 years of establishment in Singapore and showcase its extensive range of products, such as air purifiers, HVAC and cleanroom equipment.

"We are honoured by the presence and support of our customers and business partners at our new office. We look forward to their continued support as Eindec builds its brand presence regionally," said Mr Lim, Chief Executive Officer.

ABOUT EINDEC CORPORATION LIMITED (SGX STOCK CODE: 42Z)

Eindec Corporation Limited, together with its subsidiaries ("**Eindec**" or the "**Group**") is a regional clean air and environmental solutions group with diversified product lines spanning the commercial, industrial and consumer market segments.

With an operating history since 1984, we have an established track record in the design, manufacture and distribution of air purification system, cleanroom as well as heating ventilation and air-conditioning ("**HVAC**") equipment across a diversified customer base.

Leveraging on our technological expertise in cleanroom equipment, we have ventured into the commercial air purification market with our own brand of smart air purifiers. We have completed the design and prototype of a new line of smart air purification system for distribution to the consumer market in China and ASEAN market.

We operate manufacturing facilities in Singapore, Malaysia and China with our core manufacturing capabilities in Malaysia. Singapore serves as our regional headquarters and research and development ("**R&D**") centre. We have also established offices in Malaysia, Singapore and China.

Eindec is listed on the Catalist Board of the SGX-ST.
