Taiga generally experiences higher sales in the quarters ended June 30 and September 30 and reduced sales in the late fall and winter during its quarters ended December 31 and March 31 of each fiscal year.

5. Liquidity and Capital Resources

Revolving Credit Facility

On June 28, 2018, the Company renewed its senior credit facility with a syndicate of lenders led by JPMorgan Chase Bank (the "Facility"). The Facility was increased from $225 million to $250 million, with an option to increase the limit by up to $50 million. The Facility also features an ability to draw on additional term loans in an aggregate amount of approximately $23 million at favourable rates, which Taiga utilized for the business acquisition referred to in Note 5 of the Notes to the Audited Consolidated Financial Statements. The Facility continues to bear interest at variable rates plus variable margins, is secured by a first perfected security interest in all personal property of the Company and certain of its subsidiaries and will mature on June 28, 2023. Taiga's ability to borrow under the Facility is based upon a defined percentage of accounts receivable and inventories. The terms, conditions, and covenants of the Facility have been met as at September 30, 2021.

Taiga expects to meet its future cash requirements through a combination of cash generated from operations and its credit facilities. However, any severe weakening of the Canadian housing market driving reduced product demand or a significant increase in bad debts in accounts receivable could adversely impact the Company's liquidity in the short term.

Working Capital

Working capital as at September 30, 2021 increased to $224.2 million from $189.1 million as at December 31, 2020 due to increased accounts receivable and inventories, offset by increased accounts payable and accrued liabilities and income taxes payable. Taiga believes that current levels are adequate to meet its working capital requirements.

Total assets were $595.4 million as at September 30, 2021 compared to $474.2 million as at December 31, 2020. The increase was primarily the result of additional cash on hand due to working capital changes and higher inventory and accounts receivable levels.

6. Critical Accounting Policies and Estimates, and Future Accounting Changes

The significant accounting policies of Taiga are described in Note 3 to the Consolidated Financial Statements for the year ended December 31, 2020.

The preparation of financial statements in conformity with IFRS requires management to make assumptions and estimates that affect the amounts reported in the financial statements and notes thereto. Financial results as determined by actual events could be different from those estimates. These estimates are described in the management's discussion and analysis for the year ended December 31, 2020 and there have been no material changes to such policies and estimates since that time.

7. Off-Balance Sheet Arrangements

Taiga does not have off-balance sheet arrangements except for commitments under operating leases as discussed under "Commitments and Contingencies" in this Management's Discussion and Analysis.

For a detailed description of financial instruments and their associated risks, see Note 24 to the Company's audited consolidated financial statements for the period ended December 31, 2020.

8. Disclosure Controls and Procedures and Internal Controls over Financial Reporting

Taiga's management is responsible for establishing and maintaining adequate disclosure controls and procedures and internal controls over financial reporting ("ICFR") to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with IFRS.

The CEO and CFO of Taiga acknowledge responsibility for the design of ICFR and confirm that there were no changes in these controls that occurred during the quarter ended September 30, 2021 which materially affected, or are reasonably likely to materially affect the Company's ICFR.

9. Outlook

Taiga's financial performance is primarily dependent on the residential construction, renovation and repairs markets. These markets are affected by the strength or weakness in the general economy and as such are influenced by interest rates and other general market indicators.

The outbreak of the coronavirus, also known as "COVID-19", has spread across the globe and is impacting worldwide economic activity. Conditions surrounding the coronavirus continue to rapidly evolve and government authorities have implemented emergency measures to mitigate the spread of the virus. As at the financial statement approval date, the pandemic has had a positive impact on Taiga's business and financial performance in fiscal 2020 and the first half of fiscal 2021. This is a direct result of the increased demand for detached housing, record high commodity prices and low borrowing rates experienced during the pandemic. However, commodity prices did fall dramatically during the Company's third quarter which had a material impact on its results. The extent to which these events may continue to impact the Company's business activities in the same manner in future periods will depend on a number of factors, such as the ultimate geographic spread of the disease, the duration of the outbreak, travel restrictions, the rate at which vaccines are administered, the effectiveness of vaccines against the coronavirus and its mutations, subsequent outbreaks, business disruptions, and the effectiveness of actions taken in Canada, the United States and other countries to contain and treat the disease, the demand for detached housing in North America, future commodity prices, interest rates and the strength of the general economy. These events are highly uncertain and as such, the Company cannot predict with any certainty how the progression of the coronavirus pandemic and these events will ultimately impact the Company's financial performance in 2021.

In Canada, according to the Canada Mortgage and Housing Corporation ("CMHC") Housing Market Outlook, Canadian Edition for Spring 2021, housing starts are forecasted to range from 221,100 to 230,000 units in the 2021 calendar year compared to the 217,802 starts in 2020.

In the United States, the National Association of Home Builders reported in September 2021 that housing starts are forecasted to total 1,615,000 units in the 2021 calendar year compared to 1,380,000 units in calendar year 2020.
