iShares MSCI India Climate Transition ETF (a Sub-Fund of iShares Southeast Asia Trust)

Introduction

iShares MSCI India Climate Transition ETF ("MSCI India Climate Transition ETF"), a sub-fund of the iShares Southeast Asia Trust (the "Trust"), was launched and commenced trading on 15 June 2006 on the Singapore Exchange Securities Trading Limited ("SGX-ST") under the trading name of "IS INDIA CLIMATE US\$" and Exchange ticker of "I98". Effective on 15 June 2012, other than the US dollars, the MSCI India Climate Transition ETF is also traded in Singapore dollars on SGX-ST. The Singapore dollars trading line of MSCI India Climate Transition ETF is under the trading name of "IS INDIA CLIMATE S\$D" and Exchange ticker of "QK9".

The MSCI India Climate Transition ETF was established as an authorised scheme under the Securities and Futures Act 2001 of Singapore and obtained designation of an exchange traded fund ("ETF") from the SGX-ST. With effect from 30 November 2022, the MSCI India Climate Transition ETF is benchmarked against the MSCI India ESG Enhanced Focus CTB Select Index (prior to 30 November 2022, the MSCI India ETF was benchmarked against the MSCI India Index). The Manager of MSCI India Climate Transition ETF is BlackRock (Singapore) Limited (the "Manager"). The Manager has appointed the Hong Kong domiciled BlackRock Asset Management North Asia Limited (the "Sub-Manager") as the sub-manager of the MSCI India Climate Transition ETF under a sub-management agreement entered into between the Manager and the Sub-Manager (the "Sub-Management Agreement"). Under the Sub-Management Agreement, the Manager has discretion to delegate its investment management functions of MSCI India Climate Transition ETF to the Sub-Manager.

The MSCI India Climate Transition ETF invests substantially all of its assets directly in India-listed securities as a Foreign Portfolio Investor registered with the Securities and Exchange Board of India. The MSCI India Climate Transition ETF includes environmental, social and governance ("ESG") factors as its key investment strategy, with a focus on climate transition, by tracking the MSCI India ESG Enhanced Focus CTB Select Index ("Underlying Index"), which is designed to exceed the minimum technical requirements of European Union ("EU") Climate Transition Benchmarks ("CTBs"), while maximizing exposure to positive ESG factors while maintaining risk and return characteristics similar to those of its MSCI India Index (the "Parent Index"). As of 30 June 2024, 99.83% of the MSCI India Climate Transition ETF's total assets invested in investments are aligned with the MSCI India Climate Transition ETF's ESG focus¹.

The Underlying Index measure the performance of a sub-set of Indian equity securities within the Parent Index which excludes issuers from the Parent Index based on the MSCI Inc.'s (Index Provider) ESG exclusionary criteria. The remaining constituents of the Parent Index are then weighted by the Index Provider, for inclusion in the Underlying Index using an optimisation process. The optimisation process aims to exceed decarbonisation and other minimum standards for an EU CTB and maximise exposure to issuers with higher ESG ratings, while targeting a similar risk profile and limiting the tracking error of the Underlying Index, each in relation to the Parent Index.

- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).
