CNA Group signs LOI for US\$70 million MEP contract for new Airport Terminal in Vietnam

Singapore, 2 April 2015 - Singapore Mainboard-listed Master System Integrator (“MSI”), CNA Group Ltd. (“CNA” or “the Group”), is pleased to announce that its wholly-owned subsidiary, CNA-HTE Vietnam Co., Ltd. (“CNA Vietnam”) has signed a Letter of Intent (“LOI”) with Vietstar Airlines Multirole Corporation (“Vietstar Airlines”) for a US\$70 million (approximately S\$95.8 million) Mechanical, Electrical and Plumbing (“MEP”) contract for a Multirole Terminal Complex (the “Terminal”) for Vietstar Airlines on a 180,000 sqm site in Ho Chi Minh City, Vietnam. The Terminal is expected to be completed in approximately 18 to 20 months to be operational by early 2017.

The Terminal will comprise a 39,500 sqm passenger terminal building, a cargo terminal building and a multi-purpose warehouse, as well as ancillary buildings such as a sewerage treatment plant. The Terminal infrastructure will include carpark, motorcycle park, taxi staging, roadway system and external utilities. CNA Vietnam’s scope will be the provision of MEP, System Integration (“SI”) and supply and installation of Terminal Equipment (“TE”) services in the Terminal.

The current Tan Son Nhat International airport capacity has been recently expanded from 20 million to 25 million passengers per annum as it was running at over capacity. This new terminal is designed for 9 million passengers per annum handling capacity. The traffic is expected to be 85% domestic and 15% international passengers, growing at an average of over 13% per year. CNA is also exploring the possibility of equity participation in the 30 year airport concession, to secure long term recurring income opportunities.

Mr Michael Ong, CNA's Group CEO and President commented: ***"This contract spotlights our airport expertise and our niche as the regional specialist for airport-related building systems. We continue to see our continuing strong position in the transport and infrastructure sector in Vietnam and hope to build on this momentum by securing more airport-related projects in the region."***

The above mentioned contract is expected to have a material impact on the results for the financial year ended 31 December 2015 ("FY2015").
