With strong performance across all segments, Valuetronics has returned to revenue growth in FY2017. Net profit attributable to shareholders rose 27.9%.

CE segment resumed revenue growth after the exit of mass market LED light bulb in FY2016. Growth came from a portfolio of products with consumer applications as well as new revenue stream from smart lighting products. The Group has refined its product portfolio from traditional mass market LED light bulb to smart LED lighting products with Internet-of-Things ("IOT") features. We remain optimistic on the growth prospects of the smart LED lighting product as consumers starting to adopt personal wireless lighting system for their home.

ICE segment continued its growth in FY2017, the fourth consecutive year of double digital growth, which was mainly driven by connectivity modules used in automotive industry. Valuetronics acquired its first customer in the automotive industry in FY2016 which in turn started supplying these in-car connectivity modules to one of their automakers. The Group is currently undergoing qualification by another automaker of this customer and we expect to obtain their approval by late FY2018.

The smart lighting in CE segment and the in-car connectivity modules in ICE segment are examples of increased adoption of mobile connectivity in day-to-day applications, in tandem with the global trend towards IOT. Moving forward, Valuetronics will ride on the opportunities in the confluence of technology under the IOT in expanding our products. We will continue to strive for profitability growth and operational excellence to enhance shareholders value.

Like most manufacturers, we are operating in an uncertain macro-economic environment. We remain mindful of the impact on our overall business environment; in particular we are vulnerable to fluctuations to raw material price and lead time in procurement.

Barring unforeseen circumstances, the directors expect the Group to remain profitable in the coming financial year.
