About Dyna-Mac

A multi-disciplinary offshore fabrication specialist with core focus in FPSO/FSO topside modules

History

Founder: Chairman and CEO, Desmond Lim Tze Jong

Established in Singapore in 1990

Started focusing on FPSO topside market in 1998

Listed on SGX Mainboard in 2011

Business Focus

Module Business

•EPC of topside modules for FPSOs and FSOs

Ad Hoc Projects

- Specialised structures for semi-submersibles
- Turrets, subsea products
- Fabrication of heavy steel or mechanical structure, process piping and tanks
- Other modular construction

Key Strengths

Established track record (since 1998)

•194 topside modules, 25 skids, 28 pipe and manifold racks (including 5 Turret Modular Sections)

Strong customer base

•Some of the world's largest FPSO operators & multinational engineering companies

World class yard facilities

- •Combined annual capacity: 45K tons
- •Load out capacity: Up to 27K tons
- •S'pore yards:140,300 sqm
- Guangzhou Yard 1: 100,000 sqm
- •Guangzhou Yard 2: 80,000 sqm
- •Johor Yard : 211,000 sqm
- •Subic yard: 30,000 sqm

Experienced management team

Collectively over 120 years industry experience

Floating Production Storage Offloading (FPSO)s at a glance

A floating production system receives fluids from a subsea reservoir, processes, stores and offloads. Most FPSOs are ship-shaped and are 'anchored' (moored) by a turret.

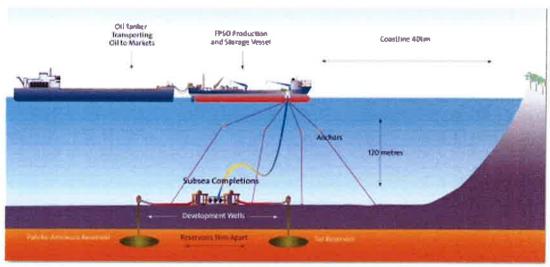

Schematics of FPSO

- Earlier cash flow because they are faster to develop than fixed platforms.
- Reduced upfront investments.
- Retained value because they can be deployed to other fields.
- Abandonment costs are less than fixed platforms.

Our Yards

Yard Capacity

- •Total area of yards at Gul Road and Pandan Crescent is approx. 140,300 sqm, producing output at maximum 25,000 tons.
- •Guangzhou yard 1 with area of approx. 100,000 sqm; yard 2 with area of approx. 80,000 sqm
- •Johor yard with area of approx. 211,000 sqm.
- •Subic yard with area of approx. 30,000 sqm.

Strong relationship with the world's largest FPSO operators

Our customers are among the world's largest owners and operators of FPSOs and FSOs.

We also serve multinational engineering companies in the marine and oil and gas industries.

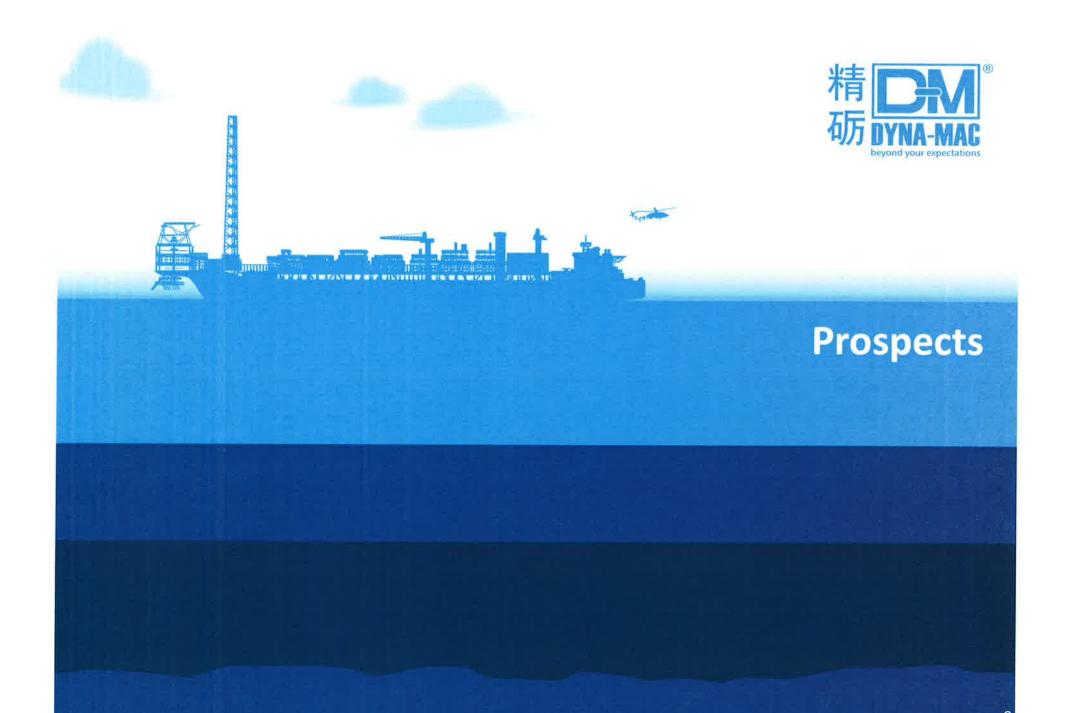

Business Strategies

Prospects for O&M

- The fundamentals driving the floating production market generally remain strong.
- World oil demand continues to grow, supply disruption remains a threat, spot oil prices continue to hover in the \$80 to \$120 range and deepwater drillers are operating at high utilisation.
- There are 271 floating production systems in service or available worldwide. FPSOs comprise
 62 percent of the current total.
- Current order backlog consists of 72 production floaters, 9 FSOs and 4 MOPUs.
- Of the 241 planned projects, 69 are in the bidding or final design stage.

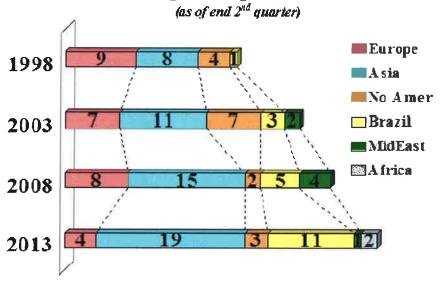

Source: IMA, July 2013

Fabrication and conversion activity

Asia continues its dominance in production floater fabrication and conversion. Almost half of the facilities active in this sector are in Asia.

Number and Location of Facilities Fabricating or Converting Floating Production Units

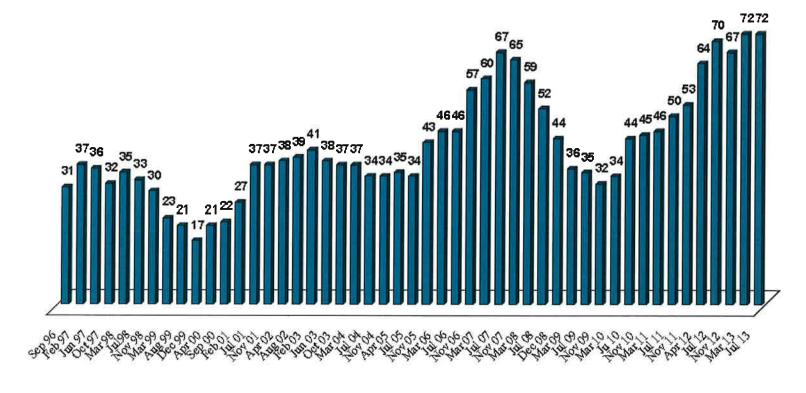

Floaters Outlook: Backlog Continues to Grow

Current order backlog for Floating Production Systems: 72 units

(includes FPSOs, Semis, Spars, TLP and FSRUs)

Of the 72 units, 40 FPSOs (19 new, 21 conversions)

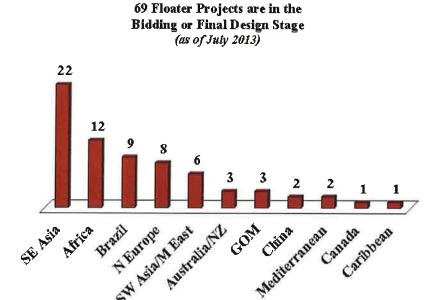

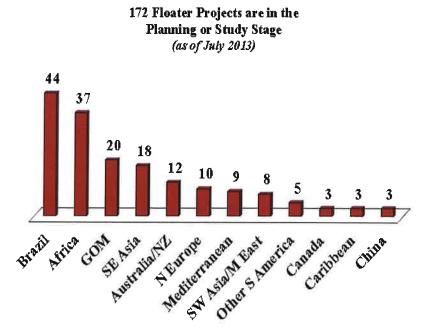

Source: IMA, July 2013

Bidding or Final Design Stage / Planning or Study Stage

Of the 241 planned projects, 69 are in the bidding or final design stage.
