FOR IMMEDIATE RELEASE

Trek's net profit rises to US$2.5 million in 1HFY2026, proposes first dividend in eight years

- Revenue more than triples to US$33.4 million, up 247.6% year-on-year ("yoy"), and tops the US$19.6 million recorded for the whole of FY2025, on AI-driven demand for the Group's memory solutions.

- Gross profit margin more than doubles to 10.6% from 4.2%, lifting gross profit 776.0% to US$3.5 million as the Group focuses on higher-value projects.

- The Group remains cautiously optimistic for the next 12 months, with demand continuing to outpace tightrunning ahead of a global memory-chip supply that is expected to stay tight.

Financial Highlights (US$'000)	1HFY2026	1HFY2025	Δ (%)
Revenue	33,375	9,601	+ 247.6
Gross Profit	3,548	405	+ 776.0
Gross Profit Margin	10.6%	4.2%	+ 6.4ppts
Net Profit Attributable to Owners of the Company	2,452	205	+ 1,096.1
Net Profit Margin	7.3%	2.1%	+ 5.2ppts
Earnings Per Share	0.80 cents	0.07 cents	+ 1,042.9

Singapore, 12 August 2026 – Trek 2000 International Ltd. ("Trek" or together with its subsidiaries, "the Group") has announced its unaudited financial results for the six months ended 30 June 2026 ("1HFY2026"). The Group recorded a net profit attributable to Owners of US$2.5 million for 1HFY2026, up from US$0.2 million in the previous corresponding year, and recommended an interim dividend of S$0.005 per share.

Revenue increased by 247.6% yoy to US$33.4 million in 1HFY2026, primarily attributable to the higher demand for the Group's solutions amid the Artificial Intelligence trend, which resulted in increased demand for memory modules in the global market. The Group's Artificial Intelligence of Things ("AIoT") business unit continues to be the key revenue contributor, accounting for 98.3% of revenue in 1HFY2026.

Gross profit rose by 776.0% yoy to US$3.5 million, up from US$0.4 million in 1HFY2025, as gross profit margin expanded by 6.4 ppts to 10.6% in 1HFY2026. The higher gross profit margin was primarily driven by the strong demand of the Group's solutions in the global market.

The Group also recognised US$0.2 million as its 20% share of an associate's profit in 1HFY2026, up from US$0.02 million in 1HFY2025, while interest income rose by 15.3% to US$0.5 million on higher fixed deposit and money market returns.

Correspondingly, the Group recorded net profit attributable to owners of US$2.5 million for 1HFY2026 as compared to net profit attributable to owners of US$0.2 million for 1HFY2025.

The Board of Directors has recommended an interim dividend of S$0.005 per share to reward shareholders for their continued support.

As of 30 June 2026, the Group held liquid assets of approximately US$32.0 million, comprising cash and cash equivalents of US$24.4 million and short-term investments of US$7.6 million. This high-liquidity position accounts for 90.0% of its net assets.

Trek's last traded share price on 11 August 2026 was S$0.285 on the Singapore Exchange ("SGX"), giving it a price-to-book ratio of 1.92 times.

Outlook

Despite the continued growth in the global market arising from the Artificial Intelligence trend, the Group remains cautiously optimistic about its outlook over the next 12 months. The ongoing shortage of memory chips continues to affect the global market and is expected to disrupt the global supply chain.

The Group will continue to be selective in prioritising profitable projects, while exercising financial prudence and disciplined cost management. At the same time, the Group will continue to enhance its core storage and AIoT solutions through ongoing innovation to stay relevant in a dynamic market. The Group will also continue to focus on the development and marketing of its solutions under the Artificial Intelligence Renewable Energy Solutions business segment.

Commenting on the outlook, **Executive Chairman and Group President of Trek 2000 International Ltd., Mr. Wayne Tan said,** *"Building on the momentum from 2025, we remain optimistic about 2026, supported by the continued growth in AI memory demand and the broader adoption of AI technologies across industries.*

The proposed dividend reflects our confidence in the Group's financial strength and healthy balance sheet with zero borrowings, while preserving the flexibility to invest in future growth. We will continue to invest in AI-enabled technologies, innovative memory solutions and next-generation AI applications while expanding our presence in high-growth markets. Through disciplined execution and continued technological innovation, we remain committed to delivering long-term value for our shareholders."

END

About Trek 2000 International Ltd (SGX: 5AB)

Listed on the Mainboard of the Singapore Exchange Securities Trading Limited since 24 May 2000, Trek 2000 International Ltd. ("Trek" or the "Group") is the original inventor and patent owner of the ThumbDrive®. The Group engineers memory technologies by integrating proprietary controllers, firmware and design into memory and data storage solutions for enterprise, industrial and consumer applications.

Trek's core Artificial Intelligence of Things (AIoT) business supplies memory and data-storage solutions to customers across Asia and beyond. As artificial intelligence expands across industries, demand for memory and storage solutions continues to grow, supporting demand for Trek's memory technologies for AI applications.

With a portfolio of granted patents, the Group also provides design solutions ranging from Interactive Consumer Solutions to Enterprise Solutions and has a presence in the U.S., Malaysia, Thailand, India, Hong Kong, Singapore, the Netherlands, China, Philippines, Vietnam, Indonesia and Japan.

Trek®, ThumbDrive®, DivaDrive™ and FluCard™ are trademarks or registered trademarks of the Trek Group of Companies in Singapore and/or other countries.
