Notes to the condensed interim financial statements

1 Corporate information

Edition Ltd. ("the Company") is incorporated and domiciled in Singapore. The Company's shares are publicly traded on the Catalist of the Singapore Exchange Securities Trading Limited.

These condensed interim financial statements as at and for the 6 months ended 30 June 2023 comprise the results of the Company and its subsidiaries (collectively, "the Group"). The primary activities of the Company are that of investment holding and provision of management services. The principal activities of the Group are that of (a) agricultural and related business; and (b) investment holdings.

2 Basis of preparation

The condensed interim financial statements for the 6 months ended 30 June 2023 have been prepared in accordance with Singapore Financial Reporting Standards (International) ("SFRS(I)") 1-34 Interim Financial Reporting issued by the Accounting Standards Committee Singapore. The condensed interim financial statements do not include all the information required for a complete set of financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance since the last annual financial statements for the year ended 31 December 2022.

The accounting policies adopted are consistent with those of the previous financial year which were prepared in accordance with SFRS(I)s, except for the adoption of new and amended standards as set out in Note 2.2. The financial statements have been prepared based on the going concern basis. At the date of these financial statements, there are reasonable grounds to believe that the Group will be able to pay its debts as and when they fall due.

The condensed interim financial statements are presented in Singapore dollar which is the Company's functional currency.

2.1 Going concern

The Group incurred a total comprehensive loss attributable to the equity holders of the Company of \$1,093,000 for the 6 months ended 30 June 2023 (30 June 2022: \$1,359,000). As at 30 June 2023, the Group has net current liabilities of \$2,343,000 (31 December 2022: net current assets of \$188,000). These conditions indicate the existence of events and conditions that may cast significant doubt on the Group's ability to continue as a going concern. At the date of these financial statements, there are reasonable grounds to believe that the Group will be able to pay its debts as and when they fall due over the next twelve months, having assessed the following measures:

- The plan is to complete the construction of the high-technology farm. Commercial operations on the completed farm will commence once regulatory approvals have been obtained. Construction and obtaining of approvals are concurrent, with both processes expected to complete by the third quarter of 2023;
- The Group is actively looking for a buyer to dispose the land development rights;
- The net current liabilities position of \$2,343,000 consists of deferred grant income amounting to \$1,050,000. If this non-monetary liability were to be excluded, the Group's net current liabilities will reduce to \$1,293,000;
- The Group has on 22 February 2023, obtained a loan facility of \$2,000,000 from the controlling shareholder, B&L Group Pte Ltd, of which \$1,700,000 has been drawn as at 30 June 2023; and
- The Group continues to explore funding opportunities, including potential further financial support as and when required from the controlling shareholder.

Accordingly, the financial statements have been prepared on the going concern basis. Should the going concern assumption become inappropriate, adjustments may have to be made to:

- The carrying value of assets to reflect the situation that assets may need to be realised at a lower value other than the carrying value;
- Liabilities to provide for further liabilities that may arise; and
- Reclassify non-current assets and non-current liabilities as current.
- No adjustments have been made in the financial statements in respect of these.

In carrying out the going concern assessment, significant judgements are involved in estimating the remaining cash commitment of the projects and other operating expenses. Based on the sources of funding indicated above, management is confident that the strategies that will be put in place will improve the financial position of the Group and the Company so as to continue in operational existence for at least the next 12 months.

2.2 New and amended standards adopted by the Group

A number of amendments to financial reporting standards have become applicable for the current reporting period. The Group did not have to change its accounting policies or make retrospective adjustments as a result of adopting those standards.

2.3 Use of judgements and estimates

In preparing the condensed interim financial statements, the Group has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgements made by the Group in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended 31 December 2022.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Information about critical judgements, estimates and assumptions in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is included in the following notes:

- Note 2.1 In carrying out the going concern basis assumption assessment, significant judgements are involved. Actual outcome may differ significantly from assessments
- Note 11 impairment test of property, plant and equipment
- Note 12 impairment test of goodwill: key assumptions underlying recoverable amounts
- Note 13 impairment of investment in subsidiary corporation: key assumptions underlying recoverable amounts
- Note 15 classification of land development rights and its fair value determination
- Note 16 fair value determination on the Group's non-current other receivables from a non-related company
- 3 Seasonal operations

The Group's businesses are not affected significantly by seasonal or cyclical factors during the financial period.

4 Segment and revenue information

The Board of Directors considers the business from both the business segment and geographic perspective. From the business perspective, the Group considers the agriculture business. Geographically, the Group considers two primary geographic areas, namely Singapore and Malaysia.

The Company's key decision makers are the Chief Executive Officer and the Board of Directors, who are responsible for making strategic decisions, allocating resources and assessing the performance. The Group has determined the operating segments based on the reports reviewed by the key decision makers.

For the financial year ended 31 December 2022, the agriculture business has been reported separately under the "agricultural segment". The Group has exited from the property development segment. The Group is actively looking for a buyer to dispose of the land development rights. The Group has therefore grouped it with the investment holding segment as they both share similar economic characteristics. The investment holding segment is included under "all other segments".

11 Property, plant and equipment

During the 6 months ended 30 June 2023, the Group purchased property, plant and equipment with an aggregate cost of \$921,000 (30 June 2022: \$986,000).

In performing the impairment assessment of the carrying amount of property, plant and equipment, the recoverable amounts are determined using value-in-use ("VIU") calculations. Significant judgements are used to estimate the gross margin, weighted average growth rates and the pre-tax discount rates applied in computing the recoverable amounts of the cash generating unit ("CGU") to which the asset belongs. In making these estimates, management has relied on past performance, its expectation of market developments in Singapore and the industry trend for agriculture. The recoverable amounts of these assets and, where applicable, CGU, have been determined based on the higher of fair value less costs to sell and VIU. The carrying amounts of Group's property, plant and equipment as at 30 June 2023 are \$6,987,000 (31 December 2022: \$6,129,000).

Impairment charge recognised for the 6 months ended 30 June 2023 are \$nil (30 June 2022: \$nil).

The goodwill arose from the acquisition of a subsidiary corporation Meod Pte Ltd ("MEOD") in 2016. The goodwill was attributable to the commercial viability of the production of agricultural products as well as distribution network in MEOD.

Goodwill is allocated to the Group's cash-generating units ("CGUs") identified according to countries of operation and business segments. The recoverable amount of the identified CGU was based on value-in-use. Cash flow projections used in the value-in-use calculations were based on financial budgets approved by management. They cover a sixteen-year period and use growth rates based on projected performances and its expectations on market development.

As at the reporting date, the recoverable amount of the CGU exceeded its carrying amount and no impairment is required. If the pre-tax discount rate in the cash flow projections used in the value-in-

use calculations had been raised by 2% (2022: 10%), the recoverable amount would equal to the carrying amount.

13 Investment in subsidiary corporations

The Company's investment in subsidiary corporations is carried at cost less accumulated impairments. For the purpose of impairment assessment, the recoverable amount (ie the higher of fair value less cost to sell and value-in-use ("VIU") is determined for the cash-generating-unit to which the assets belong. From a combination of quantitative factors, qualitative factors and the application of the VIU (cash flow projections) method, the recoverable amount of the investments in subsidiary corporations is determined.

Impairment charge recognised for the 6 months ended 30 June 2023 are \$nil (30 June 2022: \$nil).

- 3 A review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. It must include a discussion of the following:
 - (a) any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors; and
 - (b) any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on.

Income Statement

During the half-year ended 30 June 2023 ("HY2023"), the Group continued with the sales of produce from our own farm and trading sales of agricultural produce from other farms.

The Group's revenue for HY2023 increased to \$0.26 million from \$0.12 million in the six months ended 30 June 2022 ("HY2022"). In HY2023, the temporary farm at the 6-hectare location stabilised its production as compared with HY2022. Revenue increased from sale of the higher production output.

Other gains were relatively unchanged at \$0.04 million in HY2023, as compared to \$0.04 million in HY2022.

Total expenses for HY2023 decreased by 12% to \$1.34 million, from \$1.51 million in HY2022. This was mainly due to the following:

- The decrease in employees compensation to \$0.75 million in HY2023 from \$0.98 million in HY2022 was mainly due to capitalisation to property, plant and equipment of \$0.08 million and lower subcontract labour cost;
- Changes in inventories and purchases of inventories in aggregate for HY2023 increased to \$0.10 million from \$0.05 million in HY2022 in tandem with increase in revenue;
- Amortisation and depreciation for HY2023 decreased by 17% to \$0.06 million from \$0.08 million in HY2022 mainly due to the reduction of asset cost arising from grant received;
- Professional fees were relatively unchanged at \$0.14 million in HY2023, as compared to \$0.14 million in HY2022;
- Finance costs in HY2023 were higher than in HY2022 mainly due to interest on borrowings from controlling shareholder; and
- Other expenses for HY2023 decreased marginally to \$0.23 million from \$0.25 million in HY2022 mainly due to cost savings.

The Group did not recognise any share of the associated company's loss as the cost of investment has been fully impaired as at 31 December 2022.

As a result of the above, the Group registered a net loss before tax of \$1.04 million in HY2023, as compared to a net loss of \$1.36 million in HY2022.

Balance Sheet

Compared to 31 December 2022, the Group's cash and cash equivalents balance has decreased by \$0.70 million, from \$1.76 million as at 31 December 2022 to \$1.06 million as at 30 June 2023. Please refer to the explanation on Statement of Cash Flows below.

Non-current other receivables increased to \$1.05 million as at 30 June 2023 from \$0.58 million as at 31 December 2022 due to an additional loan tranche extended to a non-related party pursuant to a strategic partnership agreement and interest income on the loan.

Trade and other receivables comprise trade receivables from agricultural produce sales, deposits and prepayments. Trade and other receivables increased by \$0.10 million as at 30 June 2023 to \$0.38 million, from \$0.28 million as at 31 December 2022 mainly due to advance payments for purchases of capital expanditures.

Property, plant and equipment increased from \$6.13 million as at 31 December 2022 to \$6.99 million as at 30 June 2023. The increase was mainly due to purchase of plant and equipment, partly offset by depreciation.

Intangible assets remained unchanged at \$0.11 million. Intangible assets were fully amortised as at 31 December 2022.

Land development rights, reflected under non-current asset classified as held for sale decreased to \$1.01 million as at 30 June 2023 from \$1.07 million as at 31 December 2022 due to foreign currency translation loss of Ringgit Malaysia to Singapore Dollar.

Trade and other payables increased from \$2.86 million as at 31 December 2022 to \$4.71 million as at 30 June 2023 mainly due to borrowings from controlling shareholder.

Bank borrowings decreased from \$0.75 million as at 31 December 2022 to \$0.65 million as at 30 June 2023 due to repayment.

As a result of the above, net assets of the Group stood at \$5.36 million as at 30 June 2023.

Statement of Cash Flows

The net cash outflow from operating activities for HY2023 was mainly due to overheads incurred in the agricultural segment and corporate holding company. Improvements in changes in working capital was mainly due to increase in purchases on credit, reduction in inventories, partly offset by higher receivables and deposits. The Group continued to experience net cash used in operations due to high operating expenditures, not yet offset by revenue. Net cash outflow from investing activities was mainly due to purchases of plant and equipment for the high-technology farm and loan extended to a non-related party. Net cash inflow from financing activities was mainly due to borrowings from controlling shareholder. As a result of the above, the Group's cash and cash equivalents balance as reflected in the Statement of Cash Flows as at the end of HY2023 was \$0.41 million.

4 Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

It was disclosed in the FY2022 Annual Report that the completed high-technology farm is expected to generate revenue and net positive cash flows to the Group in FY2023. As the farm has not been completed, the Company is unable to comment further.

5 A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

Although yields on vegetables grown from the temporary modular farm have been encouraging, costs remain high and prices from competitive suppliers continue to pose a challenge on margins. Amidst this backdrop, the market conditions for the sale of leafy greens is expected to remain challenging.

In April 2023, the Group has obtained partial temporary occupation permit ("TOP") on Phase 1 development of the Group's 6-hectare high-technology farm from the Building And Construction Authority of Singapore. The Group target to obtain full TOP by September 2023, subject to government departments' regulatory approvals.

MEOD had extended in aggregate \$1,000,000 of investment loan to Wholly Greens Pte Ltd ("Wholly Greens") at an interest rate of 6% per annum. MEOD has the right to convert the loan principal plus interest to equity in Wholly Greens.

In Malaysia, the Group continues to look for property investors for the land development rights in Kota Bahru, Kelantan.

The investments and operating losses have drawn on the Group's financial resources. The Group is exploring funding opportunities.
