RH PETROGAS COMMENCES DRILLING OF NORTHWEST KLAGAGI-1 WELL IN KEPALA BURUNG PSC

The Board of Directors of RH Petrogas Limited (the "**Company**", and together with its subsidiaries, the "**Group**") wishes to announce that its 82.65% owned subsidiary Petrogas (Basin) Ltd. has on 25 June 2026 spudded the Northwest Klagagi-1 ("**NWK-1**") well under the Kepala Burung Production Sharing Contract ("**PSC**"), Southwest Papua, Indonesia.

The NWK-1 well is located in the Arar block, approximately 15 km northeast of the Arar production cluster, and will be drilled to a proposed total depth of approximately 6,700 feet (approximately 2,000 metres). Drilling will be carried out using the Group's own rig and is estimated to take 36 days.

NWK-1 has been designed as a combined development and exploration well targeting both near-term gas development and deeper exploration upside. The primary objective of the well is to develop gas resources within the upper Kais Formation. Upon completion of the development section, the well will be deepened to evaluate additional hydrocarbon potential in the lower Kais Formation, the Oligocene-aged Sirga Formation, and the underlying Devonian-aged Basement. The well forms part of the firm work commitment programme under the Kepala Burung PSC.

Mr. Francis Chang, Group CEO and Executive Director, commented, "NWK-1 aims to advance the development of existing gas resources while evaluating additional growth opportunities within the contract area. Although drilling of the well has commenced later than initially planned, the delay created an opportunity to deploy the rig for well intervention activities in the nearby Arar block. Workovers were carried out on three wells, all of which were successful and delivered incremental production gains."

BACKGROUND

RH Petrogas Limited ("**RHP**") is an independent upstream oil and gas company headquartered in Singapore and listed on the mainboard of the Singapore Stock Exchange. RHP operates across the full range of upstream activities covering the exploration, development and production of oil and gas resources. Geographically, RHP is focused in the ASEAN region. RHP has undertaken a strategic renewal and revamp of its asset portfolio in recent years and currently holds two producing assets in Indonesia.

RHP aspires to be a leading independent energy company in the ASEAN region.

BY ORDER OF THE BOARD
