- 2 Whether the figures have been audited or reviewed and in accordance with which standard (e.g. the Singapore Standard on Auditing 910 (Engagements to Review Financial Statements), or an equivalent standard)

The figures have not been audited or reviewed by the Group's auditors.

- 3 Where the figures have been audited or reviewed, the auditor's report (including any qualifications or emphasis of matter)

Not applicable.

- 4 Whether the same accounting policies and methods of computation as in the issuer's most recently audited annual financial statements have been applied

Except as disclosed in Paragraph 5 below regarding the adoption of the Singapore Financial Reporting Standards (International), there were no further changes in accounting policies and methods of computation adopted in the financial statements of the current reporting period as compared to the most recently audited annual financial statements as at 31 December 2017.

- 5 If there are any changes in the accounting policies and methods of computation, including any required by an accounting standard, what has changed, as well as the reasons for, and effect of, the change.

For annual financial period beginning on or after 1 January 2018, Singapore incorporated companies listed on the SGX-ST will apply Singapore Financial Reporting Standards (International) (SFRS(I)), a new financial reporting framework identical to International Financial Reporting Standards. The Group has adopted SFRS(I) on 1 January 2018.

The adoption of SFRS(I), amendments and interpretations did not result in any significant change to the Group's accounting policies or any significant impact on the financial statements of the Group except for the followings:

In adopting SFRS(I), the Group has elected the option to reset its cumulative foreign currency translation differences to zero at the date of transition on 1 January 2017. As a result, cumulative translation losses of \$31.4 million were reclassified from foreign currency translation reserve to set-off against the opening retained earnings as at 1 January 2017. After the date of transition, any gain or loss on disposal of any foreign operations will exclude translation differences that arose before 1 January 2017. In 2017, the Group has liquidated certain foreign subsidiaries. Consequently, the gains or losses on liquidation of these foreign subsidiaries were also restated.

SFRS(I) 15

SFRS(I) 15 establishes a five-step model to account for revenue arising from contracts with customers, and introduces new contract cost guidance. Under SFRS(I) 15, revenue is recognised at an amount that reflects the consideration which an entity expects to be entitled in exchange for transferring goods or services to a customer. The Group has applied the changes in accounting policies, using the full retrospective approach.

SFRS(I) 9

SFRS(I) 9 introduces new requirement for classification and measurement of financial assets, impairment of financial assets and hedge accounting. Financial assets are classified according to their contractual cash flow characteristic and the business model under which they are held. The impairment requirement in SFRS(I) 9 are based on an expected credit loss model and replace the FRS 39 incurred loss model. The Group applies the simplified approach and record lifetime expected losses on all trade and other receivables. The adoption of the expected credit loss model did not result in any significant impact on the financial statement.

The Group has adopted the new standard on 1 January 2018 without restating prior periods' information and recognised any differences between the previous carrying amount and the carrying amount at the beginning of the annual reporting period at the date of initial application in the opening retained earnings. The Group has accounted its available-for-sale equity securities at fair value through other comprehensive income, with gain and loss remaining in other comprehensive income, upon derecognition.

Impact on the comparatives for the Q1 2018 Financial Statement:

The effects on the comparatives arising from the adoption of SFRS(I)s, subject to year-end audit are as follows:
