SEPTEMBER 2026 OPERATING RESULTS

Supported by healthy demand, the Singapore Airlines (SIA) Group's passenger traffic increased by 2.8% year-on-year, with the growth broad-based across most regions.

As a result, the Group's passenger load factor (PLF) came in at 86.8%, with SIA and Scoot posting monthly PLFs of 85.7% and 90.8% respectively. SIA's PLFs saw a year-on-year decrease in East Asia, Europe and South West Pacific as the capacity increase outpaced traffic growth. The two airlines carried a combined total of 3.5 million passengers, 3.7% more than a year earlier.

Cargo loads rose by 9.4% year-on-year, supported by growth across most verticals, particularly shipments of hardware for semiconductor and artificial intelligence applications. This outpaced the 3.1% increase in cargo capacity. Consequently, the cargo load factor improved by 3.4 percentage points to 59.6%.

As of 30 September 2026, the Group's passenger network¹ covered 136 destinations in 35 countries and territories. SIA served 78 destinations, while Scoot served 84 destinations. The cargo network¹ comprised 139 destinations in 36 countries and territories.
