1. This represents the purchase consideration for the Company's acquisition of the Wilton Resources Holdings Pte. Ltd. ("WRH") and its subsidiaries, which was satisfied by the allotment and issuance of 1,500,000,000 shares at S\$0.155 (equivalent to Rp 1,488) per share, which represents the fair value of the Company being the quoted and traded price of the shares on 10 December 2013, i.e. the close of trading, before the completion of the RTO.

2. This represents part payment of the professional fees paid to Canaccord Genuity Singapore Pte. Ltd., in respect of the financial advisory services rendered to the Company in connection to the RTO. The fair value of the services provided amounted to S\$872,458 (Rp 8,379 million).

The Company did not have any outstanding options, convertible securities or treasury shares as at 31 December 2014 and 31 December 2013.

- 1(d)(iii) To show the total number of issued shares excluding treasury shares as at the end of the current financial period and as at the end of the immediately preceding year.**

	As at 31 December 2014	As at 30 June 2014
Number of issued shares	2,181,144,730	2,181,144,730

The Company did not have any treasury shares as at 31 December 2014 and as at 30 June 2014.

- 1(d)(iv) A statement showing all sales, transfers, disposal, cancellation and/or use of treasury shares as at the end of the current financial period reported on.**

Not applicable. The Company does not have any treasury shares during and as at the end of the current financial period reported on.

- 2. Whether the figures have been audited or reviewed and in accordance with which auditing standard or practice.**

The figures have not been audited nor reviewed by the auditors.

3. Where the figures have been audited or reviewed, the auditors' report (including any qualifications or emphasis of a matter).

Not applicable. The figures have not been audited nor reviewed by the auditors.

4. Whether the same accounting policies and methods of computation as in the issuer's most recently audited annual financial statements have been applied.

The Group and the Company have applied the same accounting policies and methods of computations in the financial statements for the most recently audited annual financial statements.

5. If there are any changes in the accounting policies and methods of computation, including any required by an accounting standard, what has changed, as well as the reasons for, and the effect of, the change.

Not applicable.

6. Earnings per ordinary share of the group for the current financial period reported on and the corresponding period of the immediately preceding financial year, after deducting any provision for preference dividends.

(a) Based on the weighted average number of ordinary shares on issue; and

(b) On a fully diluted basis (detailing any adjustments made to the earnings).

	Group	
	1HFY15	1HFY14
Earnings/(loss) per ordinary share for the period based on net loss attributable to shareholders:		
(a) Basic earnings/(loss) per share (Rp)	(8.88)	(408.55)
- Basic earnings/(loss) per share (S\$ cents)	(0.09)	(4.60)
Weighted average number of shares	2,181,144,730	1,570,335,597
(b) On a fully diluted basis (Rp)	(8.88)	(408.55)
- On a fully diluted basis (S\$ cents)	(0.09)	(4.60)

For 1HFY15, the weighted average number of shares for the period is determined based on the total number of shares, being 2,181,144,730 shares as at 30 June 2014 and 31 December 2014.

For 1HFY14, the weighted average number of shares is determined based on the weighted average number of ordinary shares of WRH outstanding during the period multiplied by the exchange ratio of shares issued by the Company for each ordinary share of WRH up to 12 December 2013, being the completion date of the RTO. From 13 December 2013 to 31 December 2013, the weighted average number of shares is determined based on the weighted average number of ordinary shares of the Company for the period.

The diluted earnings/(loss) per share are the same as the basic earnings/(loss) per share as there were no outstanding convertible securities for the financial periods ended 31 December 2014 and 31 December 2013.

For illustration purposes, the basic earnings/(loss) per share and diluted earnings/(loss) per share in Rp were converted to S\$ cents using the average rate of S\$ 1 : Rp 9,430.08 for 1HFY15 (1HFY14: S\$ 1 : Rp 8,879.07)

7. **Net asset value (for the issuer and group) per ordinary share based on the total number of issued shares excluding treasury shares of the issuer at the end of the:-**
(a) current financial period reported on; and
(b) immediately preceding financial year.

	Group		Company	
	31 December 2014	30 June 2014	31 December 2014	30 June 2014
Net asset value (Rp million)	318,885	338,260	2,596,547	2,611,419
Number of shares at the end of the period/year	2,181,144,730	2,181,144,730	2,181,144,730	2,181,144,730
Net asset value per share (Rp)	146.20	155.08	1,190.45	1,197.27
Net asset value per share (S\$ cents)	1.55	1.62	12.63	12.49
For illustration purposes, the net asset value per share in Rp was converted at the exchange rate of S\$ 1: Rp 9,422.11 for 2QFY15. (FY14 : S\$ 1 : Rp 9,582.50)				

8. **A review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. It must include a discussion of the following:-**
(a) any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors;

Revenue/ Cost of sales

There was no revenue or cost of sales reported in 1HFY15 or the comparable period (1HFY14) as the Group has yet to commence production at its gold mine in Indonesia.

General and administrative expenses

General and administrative (G&A) expenses comprised mainly professional fees, office rental, directors' fees, staff costs and depreciation expenses.

G&A expenses decreased significantly by Rp 3.6b, from Rp 20.2b in 1HFY14 to Rp 16.6b in 1HFY15. This was due mainly to higher professional fees of Rp 13.4b incurred in 1HFY14 in relation to the RTO completion. The decrease was partially offset by higher staff costs of Rp 4.8b, higher travelling expenses of Rp 1.2b, higher sponsor fees of Rp 0.5b and higher director fees of Rp 1.1b with the completion of the RTO in December 2013.

Other income

Other income increased from nil in 1HFY14 to Rp 0.6b in 1HFY15 due mainly to interest income earned by the Group on fixed deposits.

Other expenses

Other expenses for 1HFY15 decreased by Rp 2.7b, from Rp 6.0b in 1HFY14 to Rp 3.3b in 1HFY15 due mainly to lower foreign exchange losses of Rp 2.7b, of which mostly are unrealised exchange losses.

Other operating expenses

Other operating expenses were nil for 1HFY15 as compared to Rp 616.1b in 1HFY14, which relate to an one-time loss on the disposal of subsidiaries arising from the RTO.

Exploration and evaluation expenses

Exploration and evaluation expenses ("EEE") for 1HFY15 increased from Nil in 1HFY14 to Rp 0.2b in 1HFY15 due to the land rental expenses for the 6 long term land leases signed in October 2014 at Cibuluh until September 2030 when the mining concessions end.

Loss before tax

Loss before tax decreased by Rp 622.8b from Rp 642.2b in 1HFY14 to Rp 19.4b in 1HFY15.

(b) any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on.

Assets

Exploration and evaluation assets ("EEA") increased by Rp 12.5b to Rp 159.1b as at 31 December 2014 due mainly to the additional EEE capitalised in 1HFY15.

Property, plant and equipment ("PPE") increased by Rp 3.1b to Rp 5.6b as at 31 December 2014 due mainly to additional PPE of Rp 3.6b acquired during 1HFY15, offset by the depreciation charge of Rp 0.5b.

Deferred tax assets remained unchanged at Rp 1.1b as at 31 December 2014 as the Group ceased recognition of any income tax credit arising from tax losses of an Indonesian subsidiary.

Prepaid lease, both non-current and current portions increased by Rp 11.4b and Rp 1.0b respectively as at 31 December 2014 due mainly to the long term land leases signed in October 2014.

Prepayment decreased by Rp11.7b to Rp 0.9b as at 31 December 2014 due mainly to the transfer of prepayments to prepaid lease after the signing of the leases in October 2014.

Liabilities

Trade payables decreased by Rp 2.4b to Rp 1.9b as at 31 December 2014 due mainly to lower outstanding amounts owing to contractors for drilling, lab test and site management expenses for the mine site.

Other payables and accruals decreased by Rp 9.5b to Rp 4.0b as at 31 December 2014 due mainly to settlement of outstanding fees and expenses incurred in connection with the exploration and evaluation activities.

Amount due to related parties decreased by Rp 1.9b to Rp 0.1b as at 31 December 2014 due mainly to the partial repayment of the amount due to Wijaya Lawrence, Executive Chairman and President of the Group.

The Group's working capital decreased by Rp 46.3b, from Rp 188.2b as at 30 June 2014 to Rp 141.9b as at 31 December 2014 due mainly to the net operating cash outflow of Rp 33.6b and net investing cash outflow of Rp 16.1b.

Cashflow

The operating cash outflow of Rp 33.6b was due mainly to the operating loss before working capital changes of Rp 19.5b, and Rp 14.7b used in working capital, offset by interest received of Rp 0.6b.

Cash used in working capital for 1HFY15 amounted to Rp 14.7b, due mainly to the decrease in other payables and accruals of Rp 9.5b, decrease in trade payables of Rp 2.5b, decrease in amount due to related party of Rp 1.9b, and increase in prepayments of Rp 0.8b.

Net cash used in investing activities of Rp 16.1b was due mainly to the purchases of EEA of Rp 12.5b and the purchases of property, plant and equipment of Rp 3.5b.

No cashflow was generated from or used in financing activities.

As at 31 December 2014, the Group had cash and cash equivalents of Rp 145.2b, representing a decrease of Rp 49.6b from Rp 194.8b as at 30 June 2014.

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

Not applicable. No forecast or prospect statement has been previously disclosed to shareholders.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

In 2QFY15, gold prices dropped to around US\$1,200/oz in the face of global economic uncertainty, and these price levels persisted throughout the quarter. Despite the fall in pricing, the robust outcome of the Scoping Study implies adequate investment returns at those pricing levels. Since the beginning of 2015, there has been a steady appreciation of gold value in almost all currencies, largely in response to the uncertain outcomes of monetary policies being pursued by major economies such as the Eurozone and Japan. Most commentators expect the appreciation of gold price to continue during 2015. If this trend continues, it should be beneficial to the outcomes of the Ciemas Gold Project.

The Ciemas Gold Project boasts high grades, large and open resources, and low projected costs which de-risk the investment.

The board of directors ("the Board") remains focused upon attainment of sustainable commercial production at the Ciemas Gold Project as soon as possible. As presently scheduled and barring any unforeseen circumstances, the conclusion of the Definitive Feasibility Study is anticipated by 31 December 2015 ("1HFY16").

11. Dividend

(a) Current Financial Period Reported On

Any dividend declared for the current financial period reported on?

None.

(b) Corresponding Period of the Immediately Preceding Financial Year

Any dividend declared for the corresponding period of the immediately preceding financial year?

None.

(c) Date payable

Not applicable.

(d) Books closure date

Not applicable.

12. If no dividend has been declared (recommended), a statement to that effect.

No dividend has been declared or recommended for 2QFY15.

13. If the Group has obtained a general mandate from shareholders for Interested Person Transactions (“IPT”), the aggregate value of such transactions as required under Rule 920(1)(a)(ii). If no IPT mandate has been obtained, a statement to that effect.

Name of Interested Person	Aggregate value of all interested person transactions during the financial year under review (excluding transactions less than \$100,000 and transactions conducted under shareholders’ mandate pursuant to Rule 920)	Aggregate value of all interested person transactions conducted under shareholders’ mandate pursuant to Rule 920 (excluding transactions less than \$100,000)
Nicco Lawrence	Rp 3,603,273,313 (US\$ 314,000)	Nil

In 2QFY15, the Group signed six long term land leases within our Concession Blocks until September 2030. Two of the leases were signed with Mr Nicco Lawrence, an Executive Officer of the Group.

The Group does not have any general IPT mandate from shareholders pursuant to Rule 920.

Additional disclosure required for Mineral, Oil and Gas Companies

14 (a) Rule 705(6)(a) of the Catalyst Listing Manual

i. Use of funds/cash for the quarter :

For 2QFY15 (being the period from 1 October 2014 to 31 December 2014), the Group’s use of funds for exploration evaluation and development activities were as follows:

Purpose	US\$ million	Budgeted	Actual	Variance	
		Rp million	Rp million	Rp million	%
Long-term lease of additional land within the Group’s concession blocks for mining and exploration	0.4	5,000	-	(5,000)	-100.0%
Exploration and evaluation expenses	1.3	15,563	13,499	(2,064)	-13.3%
Capex	0.2	2,750	104	(2,646)	-96.2%
Total	1.9	23,313	13,603	(9,710)	-41.7%

For 2QFY15, efforts were focused on work related to the Group’s exploration and development programmes.

The acquisition of additional surface rights to permit mining activities within the Group’s Mining Permit 1 (2,878.5 hectares) and Mining Permit 2 (200.0 hectares) (collectively “Mining Permits”), is an ongoing process to which the Group has allocated a current budget of approximately Rp 5.0 billion. For strategic reasons, the timing of the expenditure (upon acquisition of rights) depends on the negotiation process. There were no rights acquired during the period under review and so the budget will be rolled over to the next quarter to enable closing of purchases as needed. Likewise, only Rp 0.1b of the

Rp 2.8b budgeted capex for the site was utilised since the site sterilisation equipment was not purchased in 2QFY15 and will likely be purchased in 3QFY15 instead.

During 2QFY15, the Group's focus was maintained on its Production Programme, Resource Upgrade Programme, and Exploration Programme (together, the "Programmes").

The current status of work streams pursuant to the respective Programmes is summarised as follows:

- Compilation of geological and assay results from the 30-hole drilling programme to gather samples for metallurgical work is complete and is being incorporated into the overall drill database of previous drilling and incorporated into Micromine. These additional holes also permit definition of mineralisation types based on the degree of oxidation, which is likely to be important in defining the metallurgical characteristics of the resource and how these will be divided for subsequent estimation of Mineral Resources and Ore Reserves.
- Samples from the 30-hole programme have now been submitted to Australian Minmet Metallurgical Laboratories Pty Ltd. ("AMML") in Australia. The delivery of the samples had previously been delayed because of unforeseen complexity in the permitting process.
- An independent Scoping Study, compliant with the JORC Code 2012 edition, of optimal mining concept by mining consultants Mancala Pty Ltd ("Mancala") was published on 4 September 2014. The Scoping Study recommended that initial extraction should be by open cut methods, and made extensive recommendations on further studies to complete a Definitive Feasibility Study. One of these was that site sterilisation drilling be commenced over zones where major infrastructure could be located. This work has been planned and drill hole locations selected.
- The Scoping Study also recommended that a Project Manager be appointed to the Ciemas Gold Project. The position was advertised globally during the quarter, and the selection process is drawing to a conclusion at the time of writing.
- Preparations were advanced for an exploration programme on the Cibuluh prospect, in the central west of the Group's Concession Blocks.

Please see Section 14 c) below for a more comprehensive outline of activities during the quarter under review.

ii. **Projection on the use of funds/cash for the next immediate quarter, including principal assumptions :**

For the next immediate quarter, 3QFY15 (1 January 2015 to 31 March 2015), the Group's use of funds/cash for mining and exploration activities are expected to be as follows:

Purpose	Budgeted	
	US\$ million	Rp million
Long-term lease of additional land within the Group's concession blocks for mining and exploration	0.4	5,000
Exploration and evaluation expenses	4.0	49,966
Capex	0.4	4,616
Total	4.8	59,582

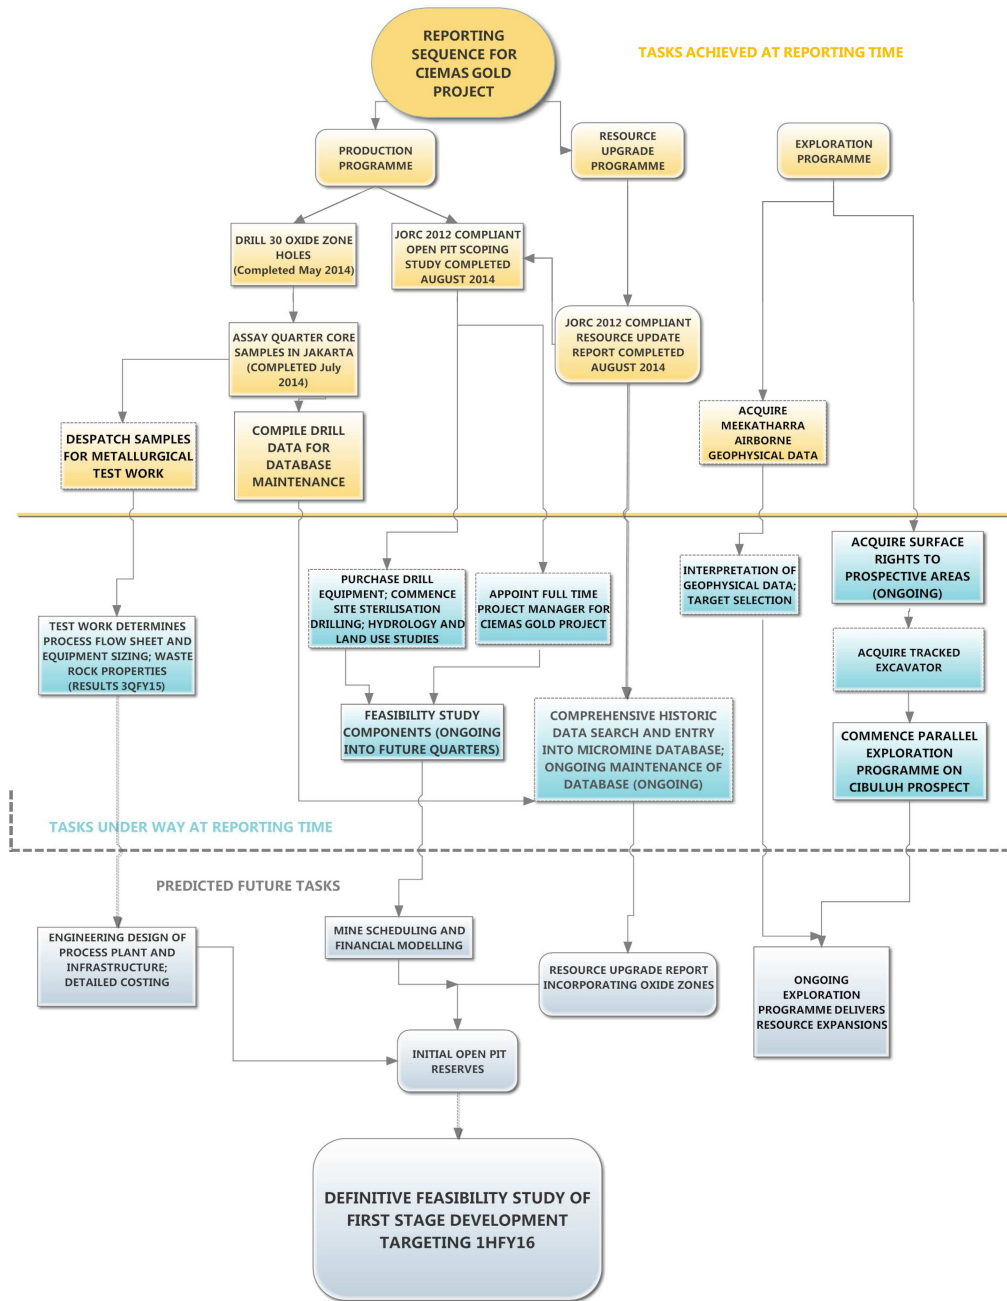

Note: Using 31 December 2014 exchange rate of US\$1 : Rp 12,440

The Group intends to continue with its efforts to minimise access issues for mining development through acquisition of additional useful surface rights within its Mining Permits and has set aside Rp 5.0b (US\$ 0.4m) carried forward from 2QFY15 for this purpose. In addition, Rp 50.0b (US\$ 4.0m) is expected to be spent for exploration and evaluation expenses and Rp 4.6b (US\$ 0.4m) for related capital expenditure.

The Group's exploration and evaluation plans for the next immediate quarter are expected to be as follows:

- 1) Receipt of results of comprehensive metallurgical testwork: This item, on the critical path of project development, was delayed while export permits were obtained. At the time of writing, the testwork is underway at AMML. The testwork will result in detailed recommendations for the process flow sheet.
- 2) Appointment of a suitably qualified Project Manager to oversee the Definitive Feasibility Study, and to bring the project to production.
- 3) Site sterilisation: As recommended in the Scoping Study, planning of site sterilisation work to identify any shallow mineralisation in areas where major infrastructure, such as waste dumps, could be located is now complete and compensation payments to permit the commencement of drilling are being negotiated where this is required. It is expected that this work will commence in 3QFY15. Negotiations are under way to purchase a multi-purpose drill rig suitable for the bulk of this work and it should be delivered sometime in 3QFY15. Drilling may commence earlier using a contracted rig, before delivery of the multipurpose unit.
- 4) Site layout and mine design: It is anticipated that proposals will be received for interpretation of our LIDAR data for detailed land use information and planning, and surface hydrology studies, and that these studies will commence.
- 5) Baseline stream water sample collection and analysis commenced in 2QFY15 and will be on-going.
- 6) Comprehensive historical data search and data entry into Micromine software will continue.
- 7) A report on the interpretation of airborne geophysical data over the Group's permits by an internationally recognised expert is expected to generate new exploration targets.
- 8) Commencement of a parallel exploration programme for the Cibuluh deposits is expected in 3QFY15. Initial earthworks are expected to commence when delivery of a suitable excavator has been effected.

These plans are shown in the context of the overall project workflow as follows:

14 (b) Rule 705(6)(b) of the Catalyst Listing Manual

The Board confirms that to the best of its knowledge, nothing has come to its attention which may render the above information provided to be false or misleading in any material aspects.

14 (c) Rule 705(7)(a) of the Catalyst Listing Manual

Details of exploration (including geophysical surveys), mining development and/or production activities undertaken by the Group and a summary of the expenditure incurred on those activities including explanations for any material variances with previous projections, for the period under review. If there has been no exploration development and/or production activity respectively, that fact must be stated.

For 2QFY15, the Group continued with its exploration, evaluation and development activities of its mining permits at Ciemas, through pursuit of three programmes, namely:

- a) The Resource Upgrade Programme
- b) The Production Programme, and
- c) The Exploration Programme.

Activities on each of the Programmes in the quarter under review are detailed below:

a) Resource Upgrade Programme

The Group has received the Mineral Resource update from SRK in accordance with the JORC Code 2012 edition, and the summary results of this are presented in Section 14 (d).

Additional information generated from drilling of 30 diamond drill hole ("DDH") under the Production Programme (see below) shall also be utilised in the ongoing Resource Upgrade Programme. However it has been decided to give priority to site clearance as part of the Production Programme, since the Board believes this will allow for a more efficient development through to completion of the Definitive Feasibility Study. The previously planned Mineral Resource upgrade will be compiled nearer the time of the Definitive Feasibility Study during 1HFY16, and is expected to include an estimate of open cut Ore Reserves.

b) Production Programme

The intention of the Production Programme is to evaluate additional options for the mining operation and processing plant, as recommended by the Group's independent consultants. The Production Programme comprises the following:

Mining Concept and Design

Wilton has received a Scoping Study prepared by Mancala on the concept of open cut mining of the Ciemas Gold Project, and this study strongly recommends the adoption of an open cut approach to the initial development of the deposits, followed by underground development of deeper ore. Mancala estimates a C1 cash cost¹ of US\$451/oz, a C2

¹ C1 cash cost represents the costs for mining, processing, administration, including accounting movements for stockpiles and gold-in-circuit. It does not include capital costs for exploration, mine development or processing, mill capital works. It includes net proceeds from by-product credits. It does not include the cost of royalties.

² C2 production cost reflects C1 costs plus depreciation and amortisation. This brings in the capital cost of production.

production cost² of US\$584/oz, and a C3 total cost³ of US\$633/oz, which in Wilton's view, would make the expected Ciemas Gold Project production costs below those of most competitors.⁴

Further studies will be required to generate a Definitive Feasibility Study report with Ore Reserve estimates.

The Scoping Study also identified potential sites for water storage dams, tailings dams, plant site, and waste rock dumps, taking into account the dimensions of open pit excavations and drainage considerations. This requires site sterilisation work to ensure areas for these facilities are not underlain by economic mineralisation.

Project Manager

A further recommendation of the Scoping Study was that a suitably qualified person be appointed as full-time Manager of the Ciemas Gold Project. The position has been advertised internationally, and over 200 applications were received. The selection process is now nearing completion. It is expected that the appointee will take up duties in 3QFY15.

Site Sterilisation

Planning of the site sterilisation work is being facilitated by a state of the art airborne LIDAR survey completed by P.T. Surtech Utama Indonesia, which provides topographic survey data to a very high level of accuracy and precision. This survey has been completed over the entire area of the Group's Concession Blocks. This enables planning of access and locations for the site sterilisation work, as well as assisting greatly to quantify compensation issues and costs. A programme of site sterilisation drilling will commence in 3QFY15. The first pass drill programme for site sterilisation has now been planned and sites selected. Because of the large number of holes to be drilled and the likelihood that this process will be ongoing, a decision has been made to purchase a lightweight track- mounted multi- purpose drill to complete most of this work. As no suitable machine could be purchased "off the shelf", arrangements are under way to obtain a custom- modified machine which will be operated and maintained under contract with a local drill operating company. In order to commence the site sterilisation work, the programme may commence with hired equipment in the short term.

Other Site Studies

Collection of baseline stream water samples from the project area has commenced and this will be an ongoing process. In addition, a site has been selected within land already owned by the Group for construction of interim expanded accommodation, office, storage and workshop facilities. Planning for construction of these facilities has commenced and prices are being sought. Detailed land use studies and surface hydrology studies are expected to commence in the present quarter.

Process Plant Design

As part of the Production Programme, an additional 30 DDH were drilled between February 2014 and May 2014. The purpose of this drilling is to evaluate the near-surface oxide zone and collect samples of oxide, transition and primary ore types for

³ C3 total cost reflects C2 plus interest, other indirect costs and royalties. Total cost represents all costs attributable to gold production over the same period. It represents a full production cost.

⁴ The report author notes that: The physical and financial outcomes presented in the Scoping Study have been estimated from low level technical and economic data, which are insufficient to support the estimation of Ore Reserves, or to provide certainty that the conclusions of the Scoping Study will be realised.

comprehensive metallurgical tests. These will facilitate the evaluation of plant design, and optimal mining methods. Samples from the drilling programme have been assayed in Jakarta, and selected drill core samples were despatched to AMML for metallurgical tests. After extended permitting delays, samples were despatched from Jakarta on 19 December 2014, and were delivered to AMML on 13 January 2015. The first stage of the project, comprising initial characterisation tests on oxide, and transition/primary mineralisation, is nearing completion at the time of writing. AMML shall provide comprehensive recommendations for the flow sheet of the Ciemas treatment plant.

AMML personnel have extensive experience in process development for gold treatment plants throughout the Asia-Pacific region to the standard required by international financial institutions. Due to the permitting delays, the results of AMML's evaluation are now anticipated to be available during 3QFY15 as opposed to 2QFY15, as previously anticipated. The delay has also had an effect on the timing of the Group's other studies and revised delivery estimates for these are incorporated in the chart presented in Section 14 (a) above.

c) Exploration Programme

In parallel with the development of the Pasir Manggu, Cikadu, Sekolah, and Cibatu resources, the Group is planning to expand exploration to some other mineralised areas identified by historical exploration within its 3078.5 Ha of mining permits in the Ciemas District. The Group is currently planning for exploration of some of these additional mineralised areas.

The Group has selected Micromine as its base exploration and resource modelling software. A multi-user server installation of the package has been installed and training of operators commenced in early 1QFY15. The locating and entry of historical data, much of which is not in useable digital form, continued during the quarter and is an ongoing process.

Acquisition of additional surface access rights within the mining permits, where mining rights are already held by the Group, greatly facilitates the process of exploration and development. In effect, there are no substantial additional impediments to exploration and exploitation on such areas within the mining permits.

Additional surface rights to areas within the Concession Blocks are being negotiated. These additional surface rights cover areas from which promising results were obtained by historical exploration.

During 1QFY15, tailings from an historical hydraulic mining operation at Cibuluh were sampled by auger drilling and composite samples were dried, sized, and assayed to determine the grain size distribution of gold content. A follow-up programme of metallurgical test work on these samples has been recommended to establish how sampling should proceed. The recently completed LIDAR survey is being utilised to plan access and possible exploration earthworks. It is intended to purchase a medium sized excavator for access and sampling work, as well as rehabilitation of historic mining areas.

Please refer to section 14(a)(i) of this announcement for a discussion of the material variances with previous projections for the period under review.

14 (d) Rule 705(7)(b) of the Catalist Listing Manual

Update on its reserves and resources, where applicable, in accordance with the requirements as set out in Practice Note 4C, including a summary of reserves and resources set out in Appendix 7D.

The Group's Mineral Resource estimate was updated and announced on 4 September 2014 to comply with the reporting requirements of the JORC Code 2012 edition by SRK, effective 30 June 2014 (the "Report").

The updated Mineral Resource estimate is summarised as follows:

Mineral Resource Statement, Ciemas Gold Project, as of 30 June 2014

Property	Category	As of 30 June 2014		
		Resource	Au	Au
		(kt)	(g/t)	(kg)
Pasir Manggu	Measured	120	7.3	870
	Indicated	450	7.5	3,390
	Inferred	270	3.8	1,030
Cikadu	Indicated	1,100	9.1	9,970
	Inferred	360	8.4	3,040
Sekolah	Indicated	710	9.2	6,520
	Inferred	300	8.6	2,580
Cibatu	Indicated	660	9.1	5,990
	Inferred	670	8.3	5,580
Total	Measured	120	7.3	870
	Indicated	2,920	8.9	25,870
	Measured + Indicated	3,040	8.8	26,740
	Inferred	1,600	7.6	12,230

Note: Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. All figures are rounded to reflect the relative accuracy of the estimate. All composites have been capped where appropriate.

Figures for Au metal in this table are estimated based on the resource tonnages and grades, and do not represent the exact amount of extractable metal for this Project. They should be treated differently from the expected production of gold bullion.

The information in the Report which relates to Mineral Resource estimates is based on information compiled by Dr Anson Xu, and Mr Pengfei Xiao, employees of SRK Consulting China Ltd. Dr Xu, FAusIMM, and Mr Xiao, MAusIMM, have sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as Competent Persons as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr Xu and Mr Xiao consent to the reporting of this information in the form and context in which it appears.

Dr Xu and Mr Xiao each meet the definition of a Qualified Person pursuant to the Listing Manual Section B: Rules of Catalist of the Singapore Exchange Securities Trading Limited ("SGX-ST") ("Catalist Rules").

The Mineral Resource update was used as the basis of the Scoping Study of open cut development of the Group's deposits by Mancala. The Scoping Study has identified and quantified some of the modifying factors necessary for the estimation of Ore Reserves.

The process of Ore Reserves estimation will not be finalised until other modifying factors, are quantified by additional test work and studies that will lead to the release of a Definitive Feasibility Study. This is now expected to be completed by 1HFY16 as indicated in the chart in Section 14(a).

15. Negative Confirmation by the Board pursuant to Rule 705(5)

The Board, do hereby confirm that, to the best of our knowledge, nothing has come to the attention of the Board, which may render the unaudited financial statements for the half year and six months ended 31 December 2014 to be false or misleading in any material aspects.

BY ORDER OF THE BOARD

Wijaya Lawrence
Chairman and President
9 February 2015
