

## PRESS RELEASE

**FOR IMMEDIATE RELEASE**

# **Sarine Congratulates Singapore on its Golden Jubilee HAPPY 50<sup>TH</sup> ANNIVERSARY SINGAPORE!**

**Kfar Saba, Israel, 06 August 2015** – Singapore Exchange Mainboard-listed Sarine Technologies Ltd ("**Sarine**" or "**the Company**", and with its subsidiaries "**the Group**") (U77:SI), a worldwide leader in the development, manufacture and sale of precision technology products for the evaluation, planning, processing, finishing, grading and trading of diamonds and gemstones, together with its Board of Directors, management and employees around the world, in Israel, India, the U.S. and Hong Kong, are delighted to take this opportunity to wish Singapore, and all its citizens and residents, all the best on this very special occasion, as you celebrate SG50, your first jubilee.

In such a relatively short period of time, Singapore's amazing achievements as an independent nation and its transition from the third world to the first, to borrow a phrase from Singapore's great founder, Mr. Lee Kuan Yew, who sadly passed away this year just short of this momentous milestone, have served as an inspiration to the world. Through its listing on the Singapore Exchange since 2005, Sarine is proud of its relationship with Singapore and the special kinship which has been nurtured with our fellow Singaporeans, as we have been privileged to partake in this vibrant country's development and culture. As festivities get underway, we share in the joy and pride of the Singaporean people. Here's to the next 50 years being even better!

### **About Sarine Technologies:**

Established in 1988, Sarine Technologies Ltd. is a worldwide leader in the development and manufacturing of advanced evaluation, planning, processing, and finishing systems for diamond and gemstone production. Sarine products include diamond Cut, Color and light performance grading tools, the Galaxy<sup>TM</sup> family of inclusion mapping systems, rough diamond planning optimisation systems, laser cutting and shaping systems, laser-marking and inscription machines and polished diamond visualisation systems. Sarine systems have become an essential gemology tool in every properly equipped gem lab, diamond appraisal business and manufacturing plant, and are today considered essential items by both diamond

dealers and retailers. For more information about Sarine and its products and services, visit <http://www.sarine.com>.
