SGX Catalyst-Listed Annica and Scottish Hydrogen Systems Integrator Logan Energy to Participate in Asia Pacific Green Hydrogen Conference & Exhibition 2026

Singapore, 3 June 2026 – Annica Holdings Limited (“**Annica**”, and together with its subsidiaries, the “**Group**”) wishes to announce that its renewable energy subsidiary, H2 Energy Sdn Bhd (“**H2 Energy**”), together with its strategic partner, Logan Energy Limited (“**Logan Energy**”) of Scotland, will participate in the Asia Pacific Green Hydrogen Conference & Exhibition 2026 (“**APGH 2026**”), to be held from 9 to 11 June 2026 in Kuching, Sarawak, Malaysia.

The region’s flagship green hydrogen event, APGH 2026, will gather more than 800 delegates and over 90 speakers for expert presentations, exhibitions and technical site visits. The Right Honourable Datuk Patinggi Tan Sri (Dr) Abang Haji Abdul Rahman Zohari bin Tun Datuk Abang Haji Openg, Premier of Sarawak, will be Guest of Honour.

As part of the conference programme, Logan Energy will participate in the Green Energy Insights panel discussions, while H2 Energy and Logan Energy will jointly present a technical session titled "Green Hydrogen in Action: Powering Communities, Mobility and Energy Security"

The presentation will showcase H2 Energy's experience operating a solar-hydrogen power system at the Long Loyang Rural Health Clinic in Sarawak, Malaysia, as well as practical hydrogen applications currently being developed and deployed across the Asia Pacific region, including community microgrids, hydrogen-enabled energy storage, mobility solutions and resilient energy infrastructure.

The presentation will also discuss future opportunities in rural electrification, energy security, hydrogen mobility and long-duration energy storage applications across Malaysia and ASEAN.

H2 Energy and Logan Energy intend to jointly pursue opportunities in green hydrogen production, rural electrification, hydrogen mobility, industrial decarbonisation, technology transfer and local manufacturing.

Logan Energy’s Deputy Chair, Dr Zhang Yuxuan, will also participate in the panel discussion titled “Green Energy: Integrating Solar and Biomass for Sustainable Energy Supply”. The session is expected to draw insights from Logan Energy’s European track record in hydrogen production, refuelling and fuel cell integration, and how these capabilities may be applied to support Sarawak’s emerging hydrogen ecosystem.

Ms Sandra Liz Hon Ai Ling, Executive Director and Chief Executive Officer of Annica, said: “The world is entering a new era where energy security is becoming just as important as sustainability. Recent geopolitical tensions and supply chain disruptions have reinforced the need for resilient, decentralised and locally produced energy solutions. Our collaboration with Logan Energy brings together practical experience from both Asia and Europe. The APGH 2026 provides an important platform to share lessons learned and demonstrate how green hydrogen can support communities, transportation systems and critical infrastructure.”

Dr Zhang Yuxuan, Deputy Chair of Logan Energy, said: “We are seeing a strong and growing pipeline of hydrogen opportunities across East Malaysia, and Sarawak in particular stands out as one of the
