Sale of the Operation in Paraguay

InterCement informs that today, Loma Negra C.I.A.S.A. sold its total stake in the Paraguayan company Yguazú Cementos S.A., which represents 51.0017% of the capital of Yguazú. The sale was made to our local partner in Yguazú.

After starting the operations in Paraguay in 2000, building and operating the 0,8 million ton per year capacity cement plant since 2013, Yguazú reached high standards of production and profitability.

With an attractive valuation multiple, the asset sale positively contributes to InterCement Group liability management. The proceeds of this transaction will be applied primarily to repay existing debt.

After this sale, InterCement will count with 34 cement production facilities across Latin America and Africa, with an installed capacity of approximately 37 million tons per year.

Sincerely,
