**Notes:**

- i. The above aviation operating data are for Singapore operations only.
- ii. With the exception of unit and gross meals produced, all data include LCC operations.
- iii. Unit services & flights handled relate to Apron handling. Unit services represent workload handled by Apron staff - whereby each different aircraft/flight type (e.g. A380, B747, etc.) is given a different unit service weightage factor.
- iv. Unit meals represent workload handled by Catering staff - whereby each meal type (e.g. dinner, lunch, etc.) is given a different unit meal weightage factor.
- v. Unit services in 1Q FY2014-15 have been restated due to the introduction of newer versions of aircraft-type with larger configurations.

**Commentary:**

All operating metrics improved in the second quarter of FY2015-16 except for cargo/mail processed. The increases in passengers handled, flights handled, and unit services were driven by both full-service and low-cost carriers.

In the first half of FY2015-16, cargo throughput registered a slight decline, while both gross and unit meals recorded broad-based growth. Flights handled and passengers handled declined due mainly to the loss of Jetstar Asia account in October 2014. However, SATS has resumed service for Jetstar Asia and is also serving the other Jetstar branded airlines since July 2015.
