Amended Complaint Filed In Amkor Technology Inc. Proceedings

Singapore, 25 February 2015 – United Test and Assembly Center Ltd (“UTAC”) previously announced that the Superior Court of Arizona, Maricopa County had on 5 January 2015 issued a ruling in relation to the Company’s motion to dismiss Amkor Technology Inc’s (“Amkor”) complaint. Subject to the applicable rules of Court, the Court granted the dismissal of seven out of nine claims made by Amkor. On 13 February 2015, Amkor filed an amended complaint in which it reasserted the two claims that had not been dismissed and reasserted one claim that the Court had dismissed relating to Amkor’s claim that it has a right to purchase certain patents belonging to ASAT Ltd (now UTAC Hong Kong Ltd).

Amkor’s amended complaint confirmed that it is not seeking to reassert six of the claims that were dismissed, but is reserving a right to appeal the dismissal of those claims.

Updates relating to the other pending proceedings will be announced on SGX and UTAC’s website in due course.
