Selling Expenses

Selling expenses mainly comprised of freight and loading expenses, which increased by IDR 5 billion and IDR 73 billion to IDR 94 billion in 4Q2019 and IDR 353 billion in FY2019, respectively. Higher selling expenses were mainly attributable to higher CPO sales with CIF terms compared to previous periods as well as additional barge rented to expedite loading and delivery of palm products to customers during the year.

General and Administrative Expenses

General and administrative expenses increased by 12.0% to IDR 63 billion in 4Q2019 and 12.1% to IDR 295 billion in FY2019 mainly due to increase in salaries and employee benefits.

Foreign Exchange Gain/(Loss)

The Group recorded a net foreign exchange gain of IDR 82 billion in 4Q2019 and IDR 160 billion in FY2019 mainly due to translation on USD denominated borrowings in the Group's IDR financial statements as a result of the appreciation of IDR against USD during the year.

During FY2019, the Group recorded a decrease in income tax expense to IDR 353 billion which was in line with the decrease in profit before income tax.

REVIEW OF STATEMENT OF FINANCIAL POSITION

Non-Current Assets

As at 31 December 2019, the Group's total non-current assets increased by IDR 809 billion from IDR 14,129 billion to IDR 14,938 billion. This was mainly due to the increase in plasma receivables by IDR 726 billion to IDR 2,442 billion arising from advances given to plasma farmers mainly for the maintenance of immature plasma plantations.

Current Assets

The increase in current assets by IDR 96 billion was mainly due to the increase in cash and short term deposits after the net off by the decrease in trade and other receivables. The increase in cash and short term deposit can be seen from the cash flow section on page 14. The decrease in trade and other receivables was mainly due to lower revenue during the year.

Current Liabilities

Decrease in current liabilities by IDR 4,707 billion as at 31 December 2019 from IDR 6,427 billion to IDR 1,721 billion was mainly due to repayment of the first and second tranches of Islamic Medium Term Notes ("IMTN") which matured in March and September 2019 respectively, as well as realisation of their related derivative financial liabilities.

Non-Current Liabilities

As at 31 December 2019, the Group's total non-current liabilities increased by IDR 5,181 billion from IDR 1,112 billion to IDR 6,292 billion, arising mainly from the issuance of a 5-year term loan along with third and fourth tranches of IMTN as refinancing for the matured IMTNs during the year.

REVIEW OF STATEMENT OF CASH FLOW

The Group reported a net increase in cash and cash equivalents of IDR 207 billion as at 31 December 2019, bringing the cash and bank balances to IDR 504 billion, as follows:

- The Group's net cash flows generated from operating activities during 4Q2019 was mainly due to
 the increase in cash receipts from customers, arising from improved palm oil price during the
 period. However, the palm oil price was still lower for FY2019 as compared to FY2018 and this
 reflected in lower revenue and cash receipt from customers during the year.
- The Group recorded lower net cash used in investing activities amounting to IDR 242 billion in 4Q2019 due to lower investment in bearer plants. In FY2019, the Group recorded higher net cash used in investing activities amounting to IDR 930 billion which was mainly due to higher advances given to plasma farmers as well as purchase of property, plant and equipment.
- The Group recorded net cash flow used in financing activities amounting to IDR 38 billion in 4Q2019 mainly due to proceeds from loan repayment from associate company. In FY2019, the Group recorded net cash used in financing activities amounting to IDR 69 billion as affected by the refinancing of first and second tranches of IMTN by the issuance of the 5-year term loan as well as third and fourth tranches of IMTN. It was offset by higher interest paid as a result of the increase in borrowings from refinancing activities as well as dividend payments.
- 9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

Not applicable.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

We had seen strong support of palm oil prices since the end of 2019 arising from lower supply of oil palm from Indonesia and Malaysia but the call of global emergency for coronavirus by WHO had caused some pullback on palm oil prices. We expect prices of palm oil to maintain at its current level until middle of 2020 due to marginal growth in supply and the increase in demand of palm oil and its derivatives with biodiesel of B30 in Indonesia and B10 in Malaysia.

The Group will continue to drive for efficiency and innovation, look at improving processes with latest technologies in its work place and manage cost.
