\* Individual shareholders cannot interact directly with the trust under any circumstances.

\*\* Effective July 17, 2015, the Sponsor receives a fee of 0.40% per year of the daily net asset value, or daily NAV, of the Trust, and is responsible for all ordinary fees and expenses of the Trust. The gross expense ratio is the fund's total annual operating expense ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus.

\*\*\* An allocated account is an account with a bullion dealer, which may also be a bank, to which individually identified units of gold (such as bars) owned by the account holder are credited. The gold held in an allocated gold account is specific to that account and is identified by a list that shows, for each unit of gold, the refiner, assay or fineness, serial number and gross and fine weight.

\*\*\*\* Although shares of GLD have historically been readily tradable on securities exchanges, there can be no assurance that an active trading market will be maintained.

### Important Risk Information

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.

While the shares of ETFs are tradable on secondary markets, they may not readily trade in all market conditions and may trade at significant discounts in periods of market stress.

Commodities and commodity-index linked securities may be affected by changes in overall market movements, changes in interest rates, and other factors such as weather, disease, embargoes, or political and regulatory developments, as well as trading activity of speculators and arbitrageurs in the underlying commodities.

Frequent trading of ETFs could significantly increase commissions and other costs such that they may offset any savings from low fees or costs.

The use of short selling entails a high degree of risk, may increase potential losses and is not suitable for all investors. Please assess your financial circumstances and risk tolerance prior to short selling.

### Investing in commodities entails significant risk and is not appropriate for all investors.

GLD is not an investment company registered under the Investment Company Act of 1940 (the "1940 Act") and is not subject to regulation under the Commodity Exchange Act of 1936 (the "CEA"). As a result, shareholders of the Trust do not have the protections associated with ownership of shares in an investment company registered under the 1940 Act or the protections afforded by the CEA.

Investing involves risk, and you could lose money on an investment in GLD. Please see the GLD prospectus for a detailed discussion of the risks of investing in GLD shares. The GLD prospectus is available by clicking here.

GLD shares trade like stocks, are subject to investment risk and will fluctuate in market value. The value of GLD shares relates directly to the value of the gold held by GLD (less its expenses), and fluctuations in the price of gold could materially and adversely affect an investment in the shares. The price received upon the sale of the shares, which trade at market price, may be more or less than the value of the gold represented by them. GLD does not generate any income, and as GLD regularly sells gold to pay for its ongoing expenses, the amount of gold represented by each Share will decline over time.
