10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the Group operates and any known factors or events that may affect the Group in the next reporting period and the next 12 months.

The performance of the sterilisation segment of the Group has been consistent. Barring any unforeseen circumstances, we do not expect any substantial variation in its performance.

The Group's investment holding segment and the portfolio of quoted financial assets, available-for-sale, including the portfolio under the mineral and energy resources ties to the changes in the financial market and global economy with uncertainty and volatility in the investment outlook. The mineral and energy resources segment is a highly risky business and requires time, effort, investment and development.
