NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
For the six months ended 30 June 2024

2. Basis of preparation (continued)

2.2 Use of judgements and estimates (continued)

Construction contracts:

The Group has significant ongoing construction contracts for building works. For these contracts, revenue is recognised over time by reference to the Group's progress towards completing the building works. The measure of progress is determined based on the proportion of contract costs incurred to date to the estimated total contract costs ("input method"). Management has to estimate these total contract costs to complete, which are used in the input method to determine the Group's recognition of construction revenue. When it is probable that the total contract costs will exceed the total construction revenue, a provision for onerous contracts is recognised immediately. Significant judgement is used to estimate these total construction contract costs that will affect the revenue and profit margins recognised from construction contracts. In making the judgement, the Group evaluates and places reliance on past experience, estimates from quantity surveyors and value of work performed as determined by the architects. If the estimated total construction cost of uncompleted contracts increase/decrease by 2%(2023: 2%) from management's estimates, the effects on the Group's net profit after tax will be as follows:

	Increase/(Decrease)	
	6 months	6 months
	ended 2024	ended 2023
	\$'000	\$'000
Estimated total construction cost		
- increased by 2% (2023: 2%)	(5,683)	(8,013)
- decreased by 2% (2023: 2%)	5,836	7,688

3. Seasonal operations

The Group's businesses are not affected significantly by seasonal or cyclical factors during the financial period.

4. Segment and revenue information

2. Review of performance of the Group (continued)

(b) Consolidated statement of balance sheet

Total assets increased by S\$14.6 million from S\$252.5 million as at 31 December 2023 to S\$267.1 million as at 30 June 2024, mainly due to (i) increase in cash and cash equivalents of S\$11.5 million due to reasons as explained in consolidated statement of cash flows under Point 2(c), (ii) increase in trade and other receivables of S\$9.2 million mainly due to increase in operating activities and timing difference in collections from customers; and (iii) increase in other assets of \$0.9 million mainly due to prepayments made for purchase of materials and equipment. The increase in total assets was partially offset by (i) decrease in property, plant and equipment of S\$5.2 million mainly due to depreciation of property, plant and equipment, and (ii) decrease in inventories of \$1.8 million due to timing differences in deliveries of precast and prefabrication materials to customers.

Total liabilities increased by S\$8.4 million from S\$207.4 million as at 31 December 2023 to S\$215.8 million as at 30 June 2024, mainly due to (i) increase in trade and other payables of S\$12.6 million mainly due to increase in operating activities and timing difference in payment to suppliers and sub-contractors. The increase in total liabilities was partially offset by (i) decrease in borrowings of \$3.1 million due to repayment of bank loans, (ii) decrease in provision for other liabilities of \$0.9 million; and (iii) decrease in current income tax liabilities of S\$0.2 million mainly due to income tax paid of \$0.3 million.

The Group's and the Company's current liabilities exceed its current assets by \$10,019,000 and \$33,401,000 respectively as at 30 June 2024.

The negative working capital position was mainly due to the significant operating losses in the prior financial years due to adverse impact of COVID-19 on the construction industry and from the capital investment by the Group (i.e. investment in the Group's Integrated Construction and Precast Hub (ICPH) project, 2 factories in Tuas South Link, and the acquisition and expansion of manufacturing plants in Malaysia). The Group is expected to be able to pay its debts as and when they fall due to the following reasons:

- (i) The Group has generated net profit amounting to \$7,389,000 and positive cashflows from operating activities amounting to \$18,617,000 for the financial period ended 30 June 2024. Management expects the Group to be able to meet its cash flow requirements from its normal course of business through its existing and future order books. The Group has order books amounting to approximately \$1,183,000,000 as at 30 June 2024, which is expected to generate positive cash flows over the next twelve months.

In addition, the Group has existing banking relationships with a number of banks and will be able to obtain additional funding from the banks when required.
- (iii) Subsequent to 30 June 2024, a total of 179,079,831 2019 Warrants were exercised by the Company's warrant holders. The proceeds from the 2019 Warrants exercised subsequent to 30 June 2024, amounted to approximately \$13,072,000.
- (iv) The Company's current liabilities mainly relates to loans from subsidiaries and amount due to subsidiaries amounting to a total of \$40,244,000. Management does not expect that the subsidiaries would demand for repayment of these amounts within the next 12 months.

Management has prepared a cash flow projection for the next 12 months after balance sheet date which has taken into account the above considerations, and has been approved by the Board of Directors. Based on the projection, management believes that the Group will be able to pay its debts as and when they fall due for the next 12 months.
