

PRESS RELEASE

LAUNCH OF TOTM.AI

Singapore, 29 April 2026 – TOTM Technologies Limited (the “**Company**”, and together with its subsidiaries, the “**Group**”) wishes to announce that the Company’s wholly owned subsidiary, TOTM Labs Pte Ltd (“**TOTM Labs**”), has launched TOTM.AI (the “**Launch**”).

TOTM Labs is an AI-enabled venture builder that builds and scales next generation products through emerging technology capabilities, commercial intelligence, and capital alignment, anchored on the foundations of trust, security, and stable value exchange. Artificial intelligence (“**AI**”) sits at the core, driving venture sourcing, operational co-pilots, ecosystem mapping, and exit intelligence.

Since its official launch on 8 April 2026, TOTM Labs has formalised a series of strategic Memorandum of Understanding with key ecosystem partners across Southeast Asia, including the PILA, Global On-Chain Economy Alliance, Sky Mavis, Vlinder and Asia Blockchain Association.

These partnerships demonstrate TOTM Labs’ commitment to building trusted, AI-enabled on-chain products and services. One such collaboration is the demonstration of the On-chain Finance Network (OFN), showing that cross-border on-chain transactions enabled by verifiable credentials between Vietnam and Indonesia are technically achievable. This underscores TOTM Labs’ focus on unlocking the broader economic value enabled by identity, while laying the foundation for future verified cross-border economic activity on-chain.

TOTM Labs today introduces its first venture, **TOTM.AI**, a landmark step in the Group’s expansion into artificial intelligence and blockchain digital infrastructure. TOTM.AI introduces the next generation of enterprise collaboration through Digital Employees—context-aware AI partners that mirror human capabilities, optimize operations, and drive efficiency while adhering to enterprise policies.

By equipping organizations with secure, verifiable, and intelligent Digital Employees, TOTM.AI ushers in a new era of autonomous workforce, working alongside human teams to accelerate productivity, scale outcomes, and continuously refine industry-specific expertise. This evolution positions enterprises to achieve exponential efficiency gains and long-term value creation in the digital economy.

“The Launch represents an important milestone for us to demonstrate our cutting-edge AI and blockchain technology abilities. We believe in users-first principle as we build secure and risk managed ventures to drive sustainable adoption. TOTM.AI marks the beginning of how we aim to shape the future of the emerging technology-oriented economy.” said Chan Wei Jie, Head of TOTM Labs.

TOTM Labs continues to broaden its portfolio in frontier technologies—including AI, blockchain, and digital asset infrastructure—while deepening collaborations with regional partners across Southeast Asia to drive strategic growth.

About TOTM Technologies Limited

TOTM Technologies Limited (“**TOTM Technologies**” or the “**Company**” and together with its subsidiaries, the “**Group**”) is an integrated solutions and services provider specialising in identity management and biometric technologies. The Group continues to diversify its service offerings, expanding into web3 and artificial intelligence, with a focus on building and scaling next-generation digital products.

Leveraging its execution experience and technology platforms from strategic partners, the Group has delivered and supported identity and biometric solutions for public sector and enterprise projects primarily in Indonesia and Singapore. The Group has experience in managing and maintaining large-scale national biometric identification systems, including databases with over 200 million enrolled citizens. Its solutions are built on core multimodal biometric technologies, including facial, fingerprint and iris recognition, which have achieved top-tier performance rankings in National Institute of Standards and Technology (“**NIST**”) benchmarks. The Group also provides electronic Know Your Customer (“**eKYC**”) services to financial institutions for biometric-based customer onboarding and identity verification, as well as to law enforcement for biometric-based identification and surveillance.

In addition to government-led identity programmes, the Group has developed sector-specific platforms, including the Maritime Cloud Platform (“**MCP**”), which is designed to support digital identity, access control and operational requirements within the maritime industry.

The Company is listed on the Catalist Board of the SGX-ST.
