FY2023 Financial Results

Market Outlook

Grab Headquarters, Singapore

Market Outlook

Macro Environment

- According to the International Monetary Fund (IMF), global growth is estimated to slow from 3.5% in 2022 to 3.1% in 2023 and remain at 3.1% in 2024, well below the historical 10-year average of 3.8%.
- The outlook is weighed down by elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity and low underlying productivity growth, even as inflation is falling faster than expected in most regions.

Market Outlook

Singapore

- Based on advance GDP estimates by the Ministry of Trade and Industry (MTI) for 4Q 2023, the Singapore economy expanded by 2.8% y-o-y, faster than the 1.0% growth in 3Q 2023. For the whole of 2023, the economy grew by 1.2%, moderating from the 3.6% growth in 2022. In November 2023, the MTI maintained its forecast for the Singapore economy to grow by 1.0% to 3.0% in 2024, with growth expected to improve gradually in 2H 2024 although uncertainty over the strength of global external demand remains.
- Singapore's core inflation rate (excluding accommodation and private transport) for December 2023 rose slightly to 3.3% y-o-y from 3.2% in November 2023, driven by higher inflation for services. The Monetary Authority of Singapore (MAS) continued to maintain its monetary policy since its last tightening in October 2022 to dampen imported inflation and curb domestic cost pressures for medium-term price stability.
- CLAR's portfolio in Singapore was valued at S\$10.8 billion as of 31 December 2023. The multi-asset portfolio, comprising Business Space and Life Sciences, Logistics and Industrial and Data Centre assets, serves a wide range of customers from industries such as technology, biomedical sciences, manufacturing, and logistics across their entire value chain of activities.
- The Manager will continue to identify opportunities to optimise returns and improve the quality of the existing portfolio through repositioning, upgrading property specifications or meeting green rating requirements as part of CLAR's asset rejuvenation plan.

Market Outlook

United States (US)

- In 4Q 2023, the US economy grew at an estimated annualised rate of 3.3% on higher consumer spending, exports, government spending and investments, compared with 4.9% in 3Q 2023. For 2023, the economy grew by 2.5%, higher than the 2.1% growth in 2022.
- In January 2024, the US Federal Reserve continued its pause on rate hikes with interest rates maintained at the target range of 5.25% to 5.5% since July 2023. While inflation has eased over 2023, it remains elevated and the US Federal Reserve is prepared to adjust its monetary policy stance should risks emerge that could impede its commitment to returning inflation to the 2% objective.
- The US portfolio, comprising Business Space and Life Sciences, and Logistics properties, was valued at S\$2.1 billion as of 31 December 2023. Anchored by a long WALE of 4.4 years, the portfolio is expected to generate stable returns.

Sources: US Bureau of Economic Analysis, US Federal Reserve

Market Outlook

Australia

- In 3Q 2023, the Australian economy grew by 0.2% q-o-q. While this was the eighth consecutive rise in quarterly GDP, growth has slowed over 2023. The IMF forecasts a GDP growth of 1.8% in 2023 for Australia.
- In 3Q 2023, Australia's All groups consumer price index rose 5.4% y-o-y. In December 2023, the Reserve Bank of Australia (RBA) held steady its interest rate at 4.35%, in view of moderating goods inflation and expectations of limited wage growth. It had raised interest rates by 25 basis points in November 2023 to ensure that inflation returns target in a reasonable timeframe.
- The Australia portfolio, comprising Business Space and Logistics properties, was valued at S\$2.3 billion as of 31 December 2023. Logistics properties account for approximately 70% of the portfolio value and logistics leases account for 93.8% of leases expiring in FY2024. The low vacancy rate for industrial and logistics properties across Australia¹ is expected to support positive rental reversions.

Market Outlook

United Kingdom (UK)

- GDP was estimated to have contracted by 0.1% q-o-q in 3Q 2023, following a previous quarter of no growth, due to a fall in the services sector which offset increases in the construction and production sectors. According to the IMF, the UK economy is projected to grow by a modest 0.5% in 2023.
- The Consumer Price Index (including owner-occupiers' housing costs) rose by 4.2% in the 12 months to December 2023.
- In December 2023, the Bank of England's Monetary Policy Committee (MPC) maintained the Bank Rate at 5.25% as inflation had fallen broadly in line with expectations. The MPC expects its restrictive monetary policy to remain for an extended period and further tightening would be required if there were evidence of more persistent inflationary pressures.

Europe

- In November 2023, the European Commission projected EU GDP growth to be 0.6% in 2023, a downward revision of 0.2 percentage points from its September 2023 forecast.

With the completion of an acquisition of The Chess Building in Watford in the UK, CLAR's assets under management in UK/Europe amounted to S\$1.7 billion as of 31 December 2023. The UK/Europe portfolio, comprising Logistics and Data Centre properties, has a long WALE period of 5.7 years and is expected to benefit from the strong adoption of e-commerce and digitalization, and generate stable returns.

Market Outlook

Summary

- Uncertain outlook for inflation, geopolitical tensions, and risk of faltering growth in China will continue to pose challenges to tenants' businesses and CLAR's operating costs.
- The Manager will remain nimble and proactively reshape CLAR's financial and portfolio management in response to changing market and tenant requirements. We will build on CLAR's strengths for an even stronger future and continue creating value for Unitholders.
