Performance Review

Changes in Accounting Policies
The Group adopted the following changes with effect from 1 January 2018:

(i) New financial reporting framework
Singapore listed companies are required to apply a new financial reporting framework - Singapore Financial Reporting Standards (International) ("SFRS(I)") that is equivalent to the International Financial Reporting Standards ("IFRS") with effect from 1 January 2018. Accordingly, the financial statements have been prepared based on the new reporting framework. SFRS(I) 1 First-time Adoption of Singapore Financial Reporting Standards (International) was applied with no impact on the financial statements.

(ii) SFRS(I) and SFRS(I) Interpretations
SFRS(I) and SFRS(I) Interpretations effective from 1 January 2018 have been applied. The following represents a change from the requirements previously applied under Singapore Financial Reporting Standards ("FRS").

- SFRS(I) 9 Financial Instruments
- SFRS(I) 15 Revenue from Contracts with Customers
- SFRS(I) INT 22 Foreign Currency Transactions and Advance Consideration
- Amendments to FRS incorporated within SFRS(I):
    - Amendments to FRS 40: Transfers of Investment Property
    - Amendments to FRS 102: Classification and Measurement of Share-based Payment Transactions
    - Amendments to FRS 104: Applying FRS 109 Financial Instruments with FRS 104 Insurance Contracts

(iii) Revised Monetary Authority of Singapore ("MAS") Notice 612 Credit Files, Grading and Provisioning
The revised Notice requires Singapore-incorporated Domestic Systemically Important Banks to maintain a minimum level of regulatory loss allowance equivalent to 1% of the gross carrying amount of the selected credit exposures net of collaterals. Where the loss allowance provided for under SFRS(I) 9 for the selected credit exposures falls below the minimum regulatory requirement, an additional loss allowance in a non-distributable regulatory loss allowance reserve through an appropriation of retained earnings is required.

The adoption of the above changes did not have a significant impact on the Group’s financial statements on transition date. The impact of adopting SFRS(I) 9 on retained earnings and other reserves is shown in Appendix 4 - Consolidated Statement of Changes in Equity. No additional loss allowance was required by MAS Notice 612 on transition date.

Other than the above changes, the accounting policies and computation methods adopted in the financial statements for the first half of 2018 are the same as those applied in the audited financial statements for the financial year ended 31 December 2017.

1H18 versus 1H17

The Group reported net earnings of $2.05 billion for 1H18, 24% higher than the same period a year ago.

The 13% year-on-year increase in net interest income to $3.01 billion was supported by an uplift in net interest margin and broad-based loan growth of 10%. Net interest margin improved 9 basis points to 1.83%, driven by an increase in net loan margin of 7 basis points amid a rising interest rate environment. Active balance sheet management was also a contributor, resulting in a higher blended interbank and securities margin by 24 basis points.

Net fee and commission income increased 15% to $1.02 billion as compared with the first half of last year, attributed to the strong performance in loan-related, wealth management, fund management and credit card fees. Other non-interest income decreased 12% to $546 million, mainly due to lower net trading income from fair value changes on hedges of structural positions in 1Q18 and lower net gain from investment securities.

All business segments achieved strong income growth in 1H18 as compared with a year ago. Total income for Group Retail rose 5% to $1.94 billion, mainly driven by double-digit growth in fee-based income from wealth management and credit cards. Group Wholesale Banking income grew 11% to $1.93 billion, led by volume growth and higher loan margin, coupled with increased contribution from fee income. Global Markets also delivered high single-digit growth of 9% to $271 million, attributable to higher trading income and favourable foreign exchange movements.

Total expenses increased 11% to $2.01 billion, driven by higher performance-related staff costs and planned IT-related investments as the Group continued to invest in talent and infrastructure to support its digitalisation initiatives and to enhance productivity, product capabilities and customer experience seamlessly across all touchpoints. The cost-to-income ratio for 1H18 rose marginally to 43.9%, reflecting the Group’s discipline in cost management.

Total allowances decreased 54% to $170 million from a year ago, mainly due to the favourable operating environment resulting in a resilient loan portfolio, and lower residual risks from the oil and gas and shipping sectors as compared with prior periods. Credit costs on non-performing loans (“NPL”) for 1H18 were 11 basis points.

2Q18 versus 2Q17

The Group reported net earnings of $1.08 billion in 2Q18, 28% higher as compared with the same quarter last year, attributed to strong overall operating income.

Net interest income grew 14% to $1.54 billion, supported by loan growth of 10% and an improvement in net interest margin by 8 basis points to 1.83%.

Net fee and commission income rose 11% to $498 million, contributed by broad-based growth in loan-related, fund management, credit card and trade-related fees. Other non-interest income decreased by 3% to $302 million mainly due to lower net gain from investment securities.

Total expenses for the quarter increased 10% from a year ago to $1.02 billion, primarily from staff expenses and planned IT-related investments. The cost-to-income ratio for the quarter stood at 43.6%.

Total allowances halved to $90 million in 2Q18 as the prior year's higher allowances were mainly driven by specific allowance set aside for NPLs from the oil and gas and shipping sectors.

2Q18 versus 1Q18

Compared with the previous quarter, net earnings for the quarter were 10% higher at $1.08 billion, led by healthy growth in net interest income and other non-interest income.

Net interest income grew 5% to $1.54 billion. Given the Bank's strong capital and liquidity position, the Group priced competitively for growth resulting in loans increasing 4% and a marginal decline of 1 basis point in net interest margin to 1.83% for the quarter.

Net fee and commission income decreased 4% to $498 million as the growth in credit card and loan-related fees was offset by lower wealth management fees. Other non-interest income rose 24% compared with last quarter, mainly from higher net trading income.

Total expenses increased 4% to $1.02 billion in tandem with income growth, mainly from higher staff and IT-related expenses. The cost-to-income ratio improved to 43.6% due to higher operating income recorded for the quarter.

Total allowances increased to $90 million for the quarter largely driven by higher allowances for non-impaired assets on the back of a higher quarterly loan growth.

Balance sheet and capital position

The Group continued to maintain a strong funding position with a healthy loan-to-deposit ratio of 85.7%. Customer deposits and gross loans both grew strongly to $288 billion and $250 billion respectively as at 30 June 2018.

Total allowances as at 30 June 2018 decreased 3% to $3.93 billion as compared with a year ago mainly due to the reversal of excess general allowance in the last quarter of 2017. The quarter-on-quarter increase of 1% was mainly from allowances for non-impaired assets on a higher asset base. Total allowances for non-impaired assets stood at $2 billion as at 30 June 2018. This amount is above the Minimum Regulatory Loss Allowance under the revised MAS Notice 612 Credit Files, Grading and Provisioning. The coverage for non-performing assets remained stable at 89%, or 190% after taking collateral into account, with the NPL ratio steady at 1.7% as at 30 June 2018.

The average Singapore dollar and all-currency liquidity coverage ratios for 2Q18 were 206% and 142% respectively, well above the corresponding regulatory requirements of 100% and 90%.

The net stable funding ratio was 110% as at 30 June 2018, above the minimum requirement of 100%.

Shareholders' equity increased 9% from a year ago to $37.7 billion from higher retained earnings, the issuance of US$650 million perpetual capital securities and scrip dividend participation.

As at 30 June 2018, the Group's Common Equity Tier 1 Capital Adequacy Ratio increased to 14.5% from 13.8% a year ago primarily due to higher retained earnings. The Group's leverage ratio of 7.7% was more than double the regulatory minimum requirement of 3%.

The cost-to-income ratio for 1H18 rose marginally to 43.9%, reflecting the Group’s discipline in cost management.

Compared with the same quarter last year, total expenses for the quarter increased 10% to $1.02 billion, primarily from staff expenses and planned IT investments. The cost-to-income ratio for the quarter stood at 43.6%.

Quarter-on-quarter, total expenses increased 4% in tandem with income growth, mainly from higher staff and IT-related expenses. The cost-to-income ratio improved to 43.6% due to higher operating income recorded for the quarter.

Total allowances decreased 54% to $170 million from a year ago, mainly due to the favourable operating environment resulting in a resilient loan portfolio, and lower residual risks from the oil and gas and shipping sectors as compared with prior periods. Credit costs on non-performing loans ("NPL") for 1H18 were 11 basis points.

Compared with same quarter last year, total allowances halved to $90 million in 2Q18 as the prior year's higher allowances were mainly driven by specific allowance set aside for NPLs from the oil and gas and shipping sectors.

Quarter-on-quarter, total allowances increased to $90 million largely driven by higher allowances for non-impaired assets on the back of a higher quarterly loan growth.

Notes:
1 Allowances for impaired loans by geography are classified according to where credit risks reside, largely represented by the borrower's country of incorporation/operation (for non-individuals) and residence (for individuals).

Performance by Business Segment

Business segment performance reporting is prepared based on the Group's internal organisation structure and the methodologies adopted in our management reporting framework. Our business segments' results include all applicable revenue, expenses, internal fund transfer price and cost allocations associated with the activities of the business. Transactions between business segments are operated on an arm's length basis in a manner similar to third party transactions and they are eliminated on consolidation.

Following the adoption of SFRS(I) 9 with effect from 1Q18, business segment results now include both allowances for impaired and non-impaired assets as compared to previous year where allowances for non-impaired assets were reported under Others segment.

The Banking Group is organised into three major business segments - Group Retail, Group Wholesale Banking and Global Markets. Others includes non-banking activities and corporate functions.

Group Retail ("GR")
GR segment covers personal and small enterprise customers.

Customers have access to a diverse range of products and services, including deposits, insurance, card, wealth management, investment, loan and trade financing products which are available across the Group's global branch network.

Profit before tax increased 4% to $923 million in 1H18 as compared to a year ago. Total income rose 5%, mainly driven by double-digit growth in fee-based income from wealth management and credit cards. Net interest income increased 4% supported by loan and deposit volume growth, partially offset by lower loan margin. Expenses grew 8% to $927 million mainly from investments to support retail franchise growth.

Compared to the same quarter last year, profit before tax grew 3% to $457 million. Total income increased 4% largely supported by net interest income, partially offset by higher staff and revenue-related expenses. Profit before tax declined 2% against the previous quarter. Total income grew 2% as the increase in net interest income was partially offset by lower contribution from fee-based income. Expenses were 5% higher at $474 million.

Group Wholesale Banking ("GWB")
GWB encompasses corporate and institutional client segments which include medium and large enterprises, local corporations, multi-national corporations, financial institutions, government-linked entities, financial sponsors and property funds.

GWB provides customers with a broad range of products and services, including financing, trade services, cash management, capital markets solutions and advisory and treasury products.

Compared to a year ago, operating profit in 1H18 rose 11% to $1.48 billion. Net interest income increased 11%, led by healthy volume growth, coupled with margin lift on the back of rising interest rates. Non-interest income grew 13%, largely from loan-related fees, investment banking and treasury. Expenses were 13% higher, primarily from staff and revenue-related expenses. Profit before tax rose 49% to $1.46 billion as credit costs normalised.

Against the same quarter last year, operating profit rose 19% to $772 million. Total income increased 19% to $1.01 billion from broad-based growth in income, partially offset by higher expenses. Compared to the previous quarter, profit before tax grew 4% to $743 million, led by stronger net interest income from loan growth and higher fees. Expenses were 11% higher at $234 million.

Global Markets ("GM")
GM provides a comprehensive suite of treasury products and services across multi-asset classes which includes foreign exchange, interest rate, credit, commodities, equities and structured investment products to help customers manage market risks and volatility. GM also engages in market making activities and management of funding and liquidity.

Income from products and services offered to customers of Group Retail and Group Wholesale Banking are reflected in the respective client segments.

Operating profit grew 8% to $145 million in 1H18 as compared to a year ago, attributable to higher trading income and favourable foreign exchange movements. Expenses increased to $127 million primarily from staff and IT-related costs.

As compared to the previous quarter and same quarter last year, operating profit was lower at $65 million as higher contribution from trading income was offset by lower net interest income. Expenses remained relatively flat.

Others
Others includes corporate support functions and decisions not attributable to business segments mentioned above and other activities, which comprises property, insurance and investment management.

Others recorded a loss of $39 million in 1H18 as compared to a net profit of $43 million a year ago, mainly driven by higher operating expenses and reversal of general allowance in the prior period.

Net profit of $10 million was recorded in 2Q18 as compared to a loss of $49 million in the previous quarter and $17 million in the same quarter last year, on the back of higher income from central treasury activities and improvement in share of associates' profits.

The Group's CET1, Tier 1 and Total CAR as at 30 June 2018 were well above the regulatory minimum requirements.

Year-on-year, total capital was higher mainly from retained earnings and the issuance of AT1 capital instruments, partly offset by redemption of old-style Tier-2 subordinated notes. RWA was lower, largely due to enhancements in RWA computation methodology, partly offset by asset growth.

Total capital was lower quarter on quarter, mainly due to payment of dividends, partially offset by quarter earnings and shares issued pursuant to the scrip dividend scheme. The higher RWA was mainly due to asset growth.

As at 30 June 2018, the Group's leverage ratio was 7.7%, above the regulatory minimum.

Notes:

1 Singapore-incorporated banks are required to maintain minimum CAR as follows: CET1 at 6.5%, Tier 1 at 8% and Total at 10%. In addition, with the phased-in implementation of the capital conservation buffer (CCB) and the countercyclical capital buffer (CCyB) commencing 1 January 2016, the Group is required to maintain CET1 capital to meet CCB of 1.875% and CCyB (computed as the weighted average of effective CCyB in jurisdictions to which the Group has private sector exposures) of up to 1.875% for the year 2018. With effect from 1 January 2018, all regulatory adjustments are fully phased-in, i.e., CET1 CAR is reported on fully-loaded basis.

2 Leverage ratio is calculated in accordance with MAS Notice 637. A minimum ratio of 3% is required effective 1 January 2018.

3 Disclosures required under MAS Notice 637 are published on our website: www.UOBGroup.com/investor/financial/overview.html.
