HCLTech achieves AWS Competencies in Supply Chain, Security and High Performance Computing

NEW YORK and NOIDA, India, Feb 09, 2026 — [HCLTech](https://www.hcltech.com), a leading global technology company, has achieved AWS Competencies in three categories: Supply Chain, Security and High Performance Computing (HPC). The recognitions underscore HCLTech's continued investment in building deep cloud capabilities and delivering meaningful outcomes for clients on Amazon Web Services (AWS).

These Competencies were awarded following a rigorous audit process validating HCLTech's customer success and compliance with AWS best practices for architecture, performance and security. They reflect HCLTech's deep technical expertise and proven ability to deliver high-quality cloud solutions for complex, business-critical workloads, enabling enterprises to confidently adopt and scale cloud-first strategies.

Across these three Competency areas, HCLTech supports a broad range of transformation initiatives. In High Performance Computing, it enables compute-intensive workloads such as engineering simulations, scientific modeling, advanced analytics and AI/ML. In Security, it strengthens cloud security through identity and access management, threat detection, regulatory compliance and risk management. In Supply Chain, it drives cloud-based modernization across demand and supply planning, network management, compliance, risk management, procurement and manufacturing operations.

"Achieving these AWS Competencies reflects the depth of technical expertise, domain knowledge and commitment demonstrated by our teams across HCLTech. It strengthens our collaboration with AWS and positions us to collaborate more closely with our clients, helping them accelerate cloud adoption, drive innovation and realize sustained business value," said Prabhakar Appana, SVP and Global Head of AWS Business Unit, HCLTech.

About HCLTech

[HCLTech](https://www.hcltech.com) is a global technology company, home to more than 226,300 people across 60 countries, delivering industry-leading capabilities centered around AI, digital, engineering, cloud and software, powered by a broad portfolio of technology services and products.
