Australia

Recovery ramps up with move towards endemic approach

Some restrictions imposed in Dec 2021 to curb the Omicron spread; easing took place in Feb 2022 as cases fell

Fully vaccinated citizens, permanent residents and eligible visa holders can travel to and from Australia with minimal self-isolation requirements from Feb 2022

Interstate travel allowed

13% of total assets: **4** serviced residences (SRs) under master leases;
6 hotels and **3** SRs under management contracts

Management Contracts – SRs & Hotels

- **1Q 2022 RevPAU was 6% higher y-o-y at AUD 71¹ as Australia moved towards an endemic approach**, progressively lifting restrictions and reopening its borders to vaccinated international travellers
- Demand for travel was impacted in early 2022 when restrictions were reimposed to curb the spread of Omicron, partially mitigated by the Australian Open tennis event in Jan 2022
- When measures were eased, **pent-up demand led to a surge in bookings** in Mar and Apr 2022
- **Demand from the corporate segment**, which has remained largely lukewarm throughout the pandemic, **spiked in Mar 2022 and is expected to continue into 2Q 2022** as companies restart travel

- Revenue from the hotels declined y-o-y in 1Q 2022 as hotels which were previously under block bookings transited to welcoming public guests, in line with the government's reopening plan
- **Performance of the hotels is expected to pick up in 2Q 2022**
- **Outlook positive as overall travel confidence improves; events**, including the F1 Grand Prix, are expected to provide **some uplift in 2Q 2022**

Master Leases – SRs

- **Fixed rent continued to provide income resilience**; some rental waivers remained in place, in compliance with Australia's mandatory code of conduct, which has been extended until Mar 2022

Notes: Updates on travel and movement restrictions above as at April 2022

China

1. Excluding Somerset Xu Hui Shanghai which was divested in May 2021

4% of total assets: **5** SRs under management contracts

- 1Q 2022 RevPAU decreased 21% y-o-y mainly due to the divestment of Somerset Xu Hui Shanghai in May 2021; on a same-store basis¹, **1Q 2022 RevPAU was 4% lower y-o-y at RMB 221** due to the impact from Omicron outbreaks
- Demand for transient travel was curtailed** in provinces with lockdowns; for provinces which were not under lockdowns, demand was similarly limited as movement curbs restricted travel via affected major cities
- Occupancy of ART's China properties remained resilient at above 50%**, as the long stays continued to provide a strong base in the absence of transient travel
- Pipeline of corporate and project group bookings remains healthy**, underpinned by a pick-up in business activity, and bookings are expected to increase when lockdowns are lifted

France

Demand for accommodation swiftly returns with lifting of restrictions

Some restrictions were tightened in Jan 2022 to curb the Omicron spread; easing took place in Feb 2022 as cases fell

- Demand for accommodation was temporarily impacted** in early 2022 on the back of Omicron-induced curbs, but **swiftly returned in Mar 2022** when restrictions were eased
- Long stays, corporate and cultural group bookings** formed a good occupancy base for the properties, while **international leisure travel**, mainly from within Europe, **drove the recovery in ADR**
- While the recovery in transient travel has largely been driven by the leisure segment, **individual business travel has started to return** as well, particularly in Paris
- 10 properties registered **higher variable rent y-o-y**; the higher revenue was offset by the divestments of Citadines Didot Montparnasse Paris and Citadines City Centre Grenoble in 1H 2021, and change in rent structure for 5 properties in Oct 2021
- Occupancies are expected to remain high, and ADR is expected to improve gradually in 2Q 2022** as the recovery continues to pick up in pace

- Demand for accommodation, which was dampened during the Omicron wave, returned swiftly and continued its uptrend when restrictions were lifted in Feb 2022

- Bookings from international travellers have grown and comprised about 40% of the properties’ business in 1Q 2022
- Events provided additional uplift in 1Q 2022; holidays in 2Q 2022 are similarly expected to bring about an increase in transient stays

Management Contracts – Hotels

- **1Q 2022 RevPAU increased 31% y-o-y to USD 76¹** as the performance of Element New York Times Square West and voco Times Square South improved y-o-y, partially offset by the softer performance of Sheraton Tribeca New York as the property was previously block booked for healthcare workers in 1Q 2021

Brighter Outlook as Reopening Picks Up Pace

More countries have embraced an endemic approach and reopened international borders

A stronger 2022 expected as the return to normalcy gains speed

- Barring the emergence of new variants of the virus or protracted periods of resurgence, the **outlook for travel is expected to improve** in 2022 as more countries have eased international border controls post-Omicron
 - The International Air Transport Association expects **overall traveller numbers to improve to 83% of 2019 levels in 2022**, as more countries relax or eliminate travel restrictions¹
- Forward bookings at ART's properties indicate a **sustained underlying demand from leisure and corporate travel segments, with some uplift expected from events and conventions**
- **Pace of recovery is expected to remain varied** and largely driven by the domestic segment, with Europe and USA leading the recovery; countries with long stays expected to remain resilient
- While operating costs are expected to increase over time, **higher room rates, fixed-rate utility contracts, technological and go-green initiatives** are expected to **mitigate some of the impact** on ART

Longer-stay accommodation offers stability as the hospitality properties capture growth from recovering markets

- ART's serviced residences and hotels in gateway cities and large domestic markets **position it well to ride the recovery**
- Rental housing and student accommodation properties offer **stable income base** and **downside protection against resurgence and new variants** of the virus
