1(d)(ii) Details of any changes in the Company's share capital arising from rights issue, bonus issue, share buy-backs, exercise of share options or warrants, conversion of other issues of equity securities, issue of shares for cash or as consideration for acquisition or for any other purpose since the end of the previous period reported on. State also the number of shares that may be issued on conversion of all the outstanding convertibles, as well as the number of shares held as treasury shares, if any, against the total number of issued shares excluding treasury shares of the issuer, as at the end of the current financial period reported on and as at the end of the corresponding period of the immediately preceding financial year.

There was no change in the Company's share capital since the end of the previous period reported on.

In connection with the warrants restructuring exercise that was completed in September 2015, the Company has on 26 October 2016, issued 107,692,308 new warrants to Ocean King Group Limited (OKGL). This represents \$\$1,400,000 of the remaining 1st tranche of the drawdown amount disbursed by OKGL to the Company on the same date.

As a result, as of 31 December 2015, the number of outstanding warrants has increased from 3,618,306,966 to 3,725,999,274. If all the outstanding warrants were converted to shares, there will be 8,292,852,106 shares issued.

The Company did not have any treasury shares as at 31 December 2015.

(iii) To show the total number of issued shares excluding treasury shares as at the end of the current financial period and as at the end of the immediately preceding year.

The total number of issued shares as at 31 December 2015 is 4,566,852,832 shares (31 December 2014: 3,637,941,547 shares).

(iv) A statement showing all sales, transfers, disposal, cancellation and/or use of treasury shares as at the end of the current financial period reported on.

Not applicable.

2. Whether the figures have been audited or reviewed and in accordance with which auditing standard or practice.

The figures have not been reviewed or audited by the auditors.

3. Where the figures have been audited or reviewed, the auditors' report (including any qualifications or emphasis of a matter).

Not applicable.

4. Whether the same accounting policies and methods of computation as in the issuer's most recently audited annual financial statements have been applied.

The Group has applied the same accounting policies and methods of computation in the financial statements for the current financial period as those applied in the Group's most recently audited financial statements for the year ended 31 December 2013.

5. If there are any changes in the accounting policies and methods of computation, including any required by an accounting standard, what has changed, as well as the reasons for, and the effect of, the change.

Not applicable.

6. Earnings per ordinary share of the Group for the current financial period reported on and the corresponding period of the immediately preceding financial year, after deducting any provision for preference dividends.

Sales of live marine products decreased by RMB5.4 million or 59% in 12M 2015 to RMB3.8 million from RMB9.2 million in 12M 2014. The Company took risk precautions by retaining a minimal level of biological assets in view of the substantial impact of frugality measures imposed by the China government.

The Group's losses for 12M 2015 narrowed 30.1% or RMB58.9 million to RMB136.6 million compared to loss of RMB195.5 million for the same period last year, mainly due to:

- (1) Direct Production Costs refer to Feed, Electricity and Staff costs. Direct Production Cost for the 12 months ended 31 December 2015 amounted to RMB6.4 million. This is RMB20.8 million or over 99% lower as compared to the same period last year. The decrease appears to be directly due to a lower abalone population and cost cutting measures implemented by the new management since the last quarter of 2014.
- (2) Other operating expenses for the 12 months ended 31 December 2015 amounting to RMB10.1 million. This is RMB14 million or 58% lower as compared to RMB24.1 million in same period last year.
- (3) Finance costs for the 12 months ended 31 December 2015 reduced 66% or RMB54.9 million to RMB28.8 million from RMB83.7 million for the same period last year. This is mainly due to reversal of notional interest from old loans previously taken up, no longer necessary subsequent to the restructuring exercise in September 2015 whereby old convertible loans extinguished and derivatives liabilities reversed.

An analysis of the results by key business segment is as follows:-

Live Marine Products

Biological assets : Standing population & valuation as at 31 December 2015

I. <u>Total Population (figures expressed in Thousands)</u>

| Sizes: | Total | | |
|--------------------------|-----------|---------|--|
| | Units | RMB'000 | |
| Smaller Size (2.0-3.7cm) | 8,224,460 | 2,418 | |
| Total Abalones | 8,224,460 | 2,418 | |

II. Caged Abalone Population (in '000 units)

| | 4Q2015 | 4Q2014 Fav | ourable /(Adverse) | |
|----------------------------|--------|------------|--------------------|--|
| Large Size (5.8-8.2cm) | - | 8 | (100%) | |
| Smaller Size (2.0-3.7cm) | 8,224 | 84 | >100% | |
| Total Abalones | 8,224 | 92 | >100% | |
| III. <u>Tanks Utilized</u> | | | | |
| No. of Juvenile tanks used | 648 | 1,142 | (43%) | |
| No. of Grow-out tanks used | - | 16 | (100%) | |
| | 648 | 1,158 | (44%) | |

The new management has now taken over for more than a year. During this period, management had not only carried out a series of cost cutting measures resulting in significant costs reduction, management have also carried out extensive studies and analysis of the existing business model. With newly acquired understanding, it is concluded that the turnover time of the current business model is too lengthy and comes with too much risks and uncertainty (spawning of abalone juveniles and growing them out into bigger sizes of commercial value for resale typically takes 2 to 3 years).

Our preparations towards a 'hybrid' model are well underway, as we focus on both our core 'land-based' farming methods, whilst working closely with 'sea-based' farmers. By supplying these sea farmers with abalone juveniles or spawns, we will be able to mitigate our risks and obtain full-grown abalones from them at prices that are 30 to 40 per cent lower than what land farming offers, putting us in a good position to substantially reduce our risk and cost of operations.

Sales for live marine products in 12M 2015 amounted to about RMB3.8 million representing a 59% decrease from the same period last year.

Direct Production Costs refer to feed, electricity and staff costs. Direct production cost in 12M 2015 amounted to RMB6.4million, a significant reduction of approximately RMB20.8 million or more than 99%, compared to RMB27.2million in the period 12M 2014. This reduction was mainly the result of several cost cutting measures implemented by the management since 2014, measures which include mainly consolidation of operations into the same location for greater economies of scale.

Concurrently, management made strong efforts to eliminate wastage and redundancy, resulting in scrap sales amounting to more than RMB1 million accounted for in other operating income.

Other operating expenses in 12M 2015 amounted to about RMB2.4 million, a significant reduction of RMB6.3 million or 73% lower compared to last year. Main components of other operating expenses include security fee, professional fee, repair and maintenance and amortization of land lease rights amounting to RMB0.5 million, RMB0.6 million, RMB0.2million and RMB0.5million respectively.

Other operating income

Other operating income comprises mainly discount received from trade suppliers and scrap sales.

(b) any material factors that affected the cash flow, working capital, assets or liabilities of the Group during the current financial period reported on.

REVIEW OF BALANCE SHEET

Total assets of the Group decreased approximately RMB62.7 million from RMB467.5 million at 31 December 2014 to RMB404.8 million at 31 December 2015. This movement is attributable to the following:-

1. **Property, plant and equipment** decreased by RMB63.6 million to RMB385.3 million as at 31 December 2015 from RMB448.9 million as at 31 December 2014, mainly due to depreciation in the period 12M 2015.

Total current liabilities decreased by RMB58.5 million to about RMB508.8 million as at 31 December 2015 from RMB567.3 million as at 31 December 2014. The decrease was mainly due to:

- 1. The old convertible loan and derivative liabilities have been extinguished and new and restructured warrants were issued upon the completion of Proposed Restructuring.
 - Repayment of outstanding interest payables due to old warrants in the form of issuance of new settlement shares and accrued interest shares amounting to RMB29.4 million and RMB11.6 million, respectively.
 - ii) Repayment of investor loans in the form of issuance of settlement shares and new warrants amounting to RMB12.6 million and RMB37.4 million, respectively.
- 2. Offset against:
 - iii) Additional loans received from investor amounting to RMB17.2 million during the period 12M2015.

Non-current liabilities, increased by about RMB29.8 million mainly due to additional loans received from new warrants issued as the loan has a term of five (5) years commencing from the 1st Drawdown Date of 3 September 2015, hence classified as non-current.

Total equity decreased by RMB34.0 million to negative RMB139.6 million as of 31 December 2015. This is mainly due to allotment and issue of new shares amounting to RMB39.6 million, increase in currency translation reserve of RMB2.7 million and the restructured Convertible Loan of RMB60.4M offset against the losses in the period 12M 2015 amounting to RMB136.6 million.

REVIEW OF CASH FLOW STATEMENT

The Group generated a negative cash flow of about RMB2.5 million for the 12 months ended 31 December 2015. In this quarter, the Group has received additional RMB7.1 million loans from new warrant holders. These amounts were solely used for working capital purposes.

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

Not applicable.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the Group in the next reporting period and the next 12 months

Under new leadership, the Group embarked on its turnaround roadmap in 12M 2015, focusing on a series of cost-cutting measures, which has already been reflected favourably in the 12M 2015 financials as can be seen from the 30.1% narrowed losses due to substantial reduction in production costs and operating expense.

During the year under review, the Group also re-evaluated its business strategies to drive greater productivity and improve profitability. For instance, preparations are underway for a 'hybrid' model for the Group to work closely, instead of competing, with sea farmers by obtaining full-grown abalones from them at prices that are 30% to 40% lower than land farming, putting the Group in good stead to substantially reduce operational risks and costs.

Concurrently, the Group is working with an Australian processor for the supply of abalone meat for canning and making dried abalones. This business segment has already gained traction, as shown in the maiden RMB 1.8 million earned under sales of processed marine products in 12M 2015.

For the coming financial year ending 31 December 2016 (12M 2016), the Group will focus on putting in place strong business fundamentals to accelerate its turnaround roadmap. Firstly, the Group plans to diversify downstream to the retailing of halal-certified, Australia-processed, MSG and preservatives-free canned abalones. These premium canned abalones had received warm reception during an independent surveyor report or 'blind test' conducted, and is slated to be made available to consumers via e-commerce platforms by 3Q2016. Secondly, the Group is looking at converting freed up farm space to explore the feasibility of other aquaculture products such as sea cucumbers, fish and shrimps, in addition to renting out un-utilised farming assets to keep operation costs low.

The Group will also continue to explore and work with technology partners and global aquaculture groups on possible joint ventures as well as pursuing possible merger and acquisition opportunities with strategic partners to strengthen and to achieve growth in market share whilst gaining competitive advantage.

In addition, the Group is currently in active negotiations with its warrant holders to restructure its loans and warrants due in FY2016 to ensure that the Group is able to satisfy its financial obligations. Should negotiations and the restructuring be successful, the Group's cash flow is expected to improve.

Amidst macro-economic uncertainties and a slowdown in the Chinese economy, the Group is cautiously optimistic on the outlook of 12M 2016. It looks forward to reaping the results of the fundamentals put in place in 12M 2014 and 12M 2015, as well as the start of new business ventures for greater sustainability and diversification of the Group's businesses.
