# 9M FY25 Financial highlights

## REVENUE

## EBITDA

## NET GEARING

**30.6%**  
Comfortable debt headroom

## WEIGHTED AVERAGE DEBT MATURITY

**1.6 years**

## MARKET CAPITALISATION

**\$3.4 billion**  
Unit price of \$0.870 as at  
31 Dec 24

# Fibre connection trends

<sup>(1)</sup> The decrease was largely due to delayed terminations of lower-speed broadband plans from end-users who had earlier upgraded to higher-speed broadband plans, as well as termination of dormant connections by Requesting Licensees (RLs). The net increase in 9M FY25 was 10,329 connections (or 0.7%) as compared to 31 Mar 2024 (FY24).

<sup>(2)</sup> The decrease was largely due to churn between RLs with delayed terminations and RL consolidation.

<sup>(3)</sup> Segment connections comprise, *inter alia*, Point-to-Point, Central Office to Central Office and Central Office to MDF room fibre connections provided to RLs.

# Key focus for FY25

1. Grow NBAP & Segment connections by supporting deployments related to Smart Nation and cloud-based services
2. Continue to support digitalisation of SMEs by lowering the cost of connections
3. Enhance our Colocation facilities to support the upgrade of the Nationwide Broadband Network to offer up to 10 Gbps per connection
4. Complete the construction of our new Central Office to achieve operational readiness in 2025 to serve the northern part of Singapore
5. Execute our sustainability initiatives and strive for continued and sustained emissions reduction

Profit after tax	74,134	85,106	(12.9)

## REVENUE

Regulated Asset Base (RAB) revenue remained stable YoY. For the 9M FY25, overall revenue declined by \$1.3 million, primarily due to lower contributions from ancillary projects (non-RAB revenue). This was partially offset by higher installation-related revenue.

**EBITDA** decreased by \$11.6 million, impacted by lower revenue and non-operating income, along with higher operating costs. In the prior corresponding period, the operating costs were lower partly due to one-off reversal of \$6.2 million following the resolution of disputed power charges.

**Profit After Tax (PAT)** declined by \$11.0 million, mainly due to lower EBITDA and higher depreciation and amortisation, partially offset by a higher income tax credit.

# Pricing model

## PRICING OF NLT'S PRINCIPAL SERVICES ARE REGULATED BY IMDA

- IMDA holds a review of pricing terms every five years, or at any such time as IMDA may consider appropriate (which may include a mid-term review in the third year from the last price review).
  - ❑ IMDA's most recent review of the prices in NetLink Trust's Interconnection Offer was completed in November 2023. The revised prices are effective from 1 April 2024.
  - ❑ Pricing terms are regulated using the Regulated Asset Base (RAB) framework, which allows NetLink Trust to recover the following components: (a) return of capital deployed (i.e. depreciation); (b) return on capital employed; and (c) operating expenditure.
  - ❑ The WACC determined by IMDA is 7%.
  - ❑ NetLink Trust will set aside a Capex Reserve of \$40 million for the new pricing period.
- NetLink Trust may propose to conduct a mid-term price adjustment in the third year, in the event of any significant changes to cost or demand forecasts due to unforeseen circumstances.
