JULY 2025 OPERATING RESULTS

In July 2025, the Singapore Airlines (SIA) Group saw strong passenger demand across both airlines and all route regions, supported by the traditional summer peak. Passenger traffic for the Group increased by 6.2% from a year before, outpacing the 2.8% expansion in passenger capacity.

As a result, the Group's passenger load factor (PLF) rose by 2.9 percentage points year-on-year to 88.5%, with SIA and Scoot posting monthly PLFs of 87.4% and 92.2% respectively. The two airlines carried a combined total of 3.5 million passengers, 9.7% higher than last year.

In anticipation of the uncertainty related to tariffs, cargo demand continued to be supported by front-loading activity, although at a reduced pace as compared to earlier months. Cargo loads increased by 2.1% year-on-year, tracking slightly below the 2.7% expansion in cargo capacity. As a result, the cargo load factor declined by 0.3 percentage point to 57.1%.

At the end of July 2025, the Group's passenger network¹ covered 129 destinations in 37 countries and territories. SIA served 78 destinations, while Scoot served 73 destinations. The cargo network¹ comprised 133 destinations in 38 countries and territories.
