

FOR IMMEDIATE RELEASE

ASTI To Re-commence Thailand Operations, Strengthening Its Asia-Pacific Production Network

- **ASTI leases building facilities in the Free Zone at Amata City Chonburi to restart its Thailand operations**
- **The Thailand operations complement the Group's established production capabilities in the Philippines and Malaysia**
- **The move positions ASTI closer to customers in one of Asia-Pacific's most active semiconductor corridors, ready to serve growing regional demand**

Singapore, 12 August, 2026 – ASTI Holdings Limited ("**ASTI**" or the "**Company**", and together with its subsidiaries, the "**Group**") today announced that its wholly-owned subsidiary, Telford Service (Thailand) Company Limited ("**Telford**"), has entered into an agreement to lease building facilities in the Free Zone at Amata City Chonburi, Chonburi Province, Thailand ("**Facility**").

The move re-establishes the Group's presence in Thailand, having previously operated in the country before its facility in Ayutthaya was shut down in the wake of severe flooding in 2011. The Facility will house semiconductor back-end taping production services and related activities. It adds to ASTI's existing production footprint in the Philippines and Malaysia, and position the Group closer to customers in one of Asia-Pacific's active semiconductor corridors. The Facility marks a key step in re-establishing the Group's operating base in Thailand, positioning the Group to capture growing demand and support customers seeking production capacity in the region as the Group scales its capabilities.

Mr. Eddie Ng Yew Nam, Executive Chairman and CEO of ASTI Holdings, commented:

"The leasing of the building facilities marks the re-commencement of our Thailand business. Thailand is a market we know well, having operated here before our previous facility in Ayutthaya was forced to close in the aftermath of severe flooding. Coming back to Thailand is both a homecoming and a deliberate, well-planned step. The new base at Chonburi creates an immediate demand opportunity that our subsidiary, Telford, is well-placed to serve. Together with our established operations in the Philippines and Malaysia, our return to Thailand strengthens a resilient, well-connected regional production network. We are bringing our proven tape-and-reel expertise, honed over more than 30 years, directly to one of Asia-Pacific's most dynamic semiconductor corridors. This is one of our pillar strategies in action — building the infrastructure to support the growth that lies ahead."
