

PRESS RELEASE**Rex subsidiary Lime Petroleum AS participates in
small gas discovery in Norwegian Sea**

SINGAPORE, 2 November 2020 – Rex International Holding Limited (“Rex International Holding”, “Rex” or the “Company”, and together with its subsidiaries, the “Group”), wishes to announce that the operator, Equinor Energy AS (“Equinor”), has completed drilling an exploration well on the Apollonia prospect in the Norwegian Sea licences PL263D/E, in which Rex’s 90 per cent subsidiary Lime Petroleum AS (“LPA”) has 20 per cent interests. The well was drilled approximately nine kilometres east of the Maria field. The primary exploration objective was to prove hydrocarbons in Middle Jurassic sandstones in the Garn and Ile formations. The well penetrated 83 metres of good reservoir-quality sandstone in the Garn formation. No hydrocarbons were identified in the Garn and Ile formations.

A gas column of nine metres was found in the shallower Lower Cretaceous Lange Formation. Preliminary analysis suggests a small gas discovery with recoverable reserves of between three and 10 million barrels of oil equivalent. This discovery will be evaluated together with other discoveries and prospects in the vicinity for further exploration and commerciality.

About Lime Petroleum AS

Lime Petroleum AS (“LPA”) was established in 2012 and is located in Oslo. The company was pre-qualified in February 2013 and has since built a portfolio of licences focusing on mature areas close to existing oil and gas infrastructure. The organisation has vast expertise in oil & gas exploration and production, both from Norway and internationally and uses high-quality seismic data and the unique Rex Virtual Drilling technology together with conventional seismic attributes and analysis of the petroleum systems in its exploration efforts. LPA benefits from the Norwegian tax system with 78 per cent cash-back for exploration expenditures.

Disclaimer

This press release may contain projections and forward-looking statements that reflect the Company's current views with respect to future events and financial performance. These views are based on estimates and current assumptions which are subject to business, economic and competitive uncertainties and contingencies as well as various risks and these may change over time and in many cases are outside the control of the Company and its directors. Actual future performance, outcome and results may differ materially from those expressed in forward-looking statements as a result of a number of risks, uncertainties and assumptions. Representative examples of these factors include (without limitation) general industry and economic conditions, interest rate trends, cost of capital and capital availability, availability of real estate properties, competition from other companies and venues for the sale/distribution of goods and services, shifts in customer demands, customers and partners, changes in operating expenses, including employee wages, benefits and training, governmental and public policy changes and the continued availability of financing in the amounts and the terms necessary to support future business. No assurance can be given that future events will occur, that projections will be achieved, or that the Company's assumptions are correct. The Company does not assume any responsibility to amend, modify or revise any forward-looking statements, on the basis of any subsequent developments, information or events, or otherwise. These statements can be recognised by the use of words such as "expects," "plans," "will," "estimates," "projects," or words of similar meaning. Such forward-looking statements are not guarantees of future performance and actual results may differ from those forecast and projected or in the forward-looking statements as a result of various factors and assumptions. There is no assurance that Rex Virtual Drilling will consistently deliver accurate analyses and results, as it is dependent on many external factors such as data quality. Shareholders and investors are cautioned not to place undue reliance on these forward-looking statements, which are based on the current view of management of future events.

About Rex International Holding

Rex International Holding was listed on Singapore Exchange Securities Trading Limited's Catalist Board on 31 July 2013. The Company de-risks its portfolio of exploration and development assets using its proprietary liquid hydrocarbon indicator Rex Virtual Drilling technology to identify the location of oil reservoirs in the sub-surface through analysis of seismic data. Since the Company's listing in July 2013, the Group has achieved three offshore discoveries, one in Oman and two in Norway. The Group also offers Rex Virtual Drilling screening services to other oil exploration companies as an additional tool to increase the success rate of finding oil.
