1Q 2023 Business Updates

Market Outlook

Grab Headquarters, Singapore

Market Outlook

Macro Environment

- In its April 2023 report, the International Monetary Fund (IMF) has forecast global growth to fall from 3.4% in 2022 to 2.8% in 2023, and then rise to 3.0% in 2024. Advanced economies are expected to see an especially pronounced growth slowdown, from 2.7% in 2022 to 1.3% in 2023.
- According to the IMF, the major forces that shaped the world economy in 2022 is set to continue into 2023. The decline in growth in 2023 reflects the tight policy stance by central banks to bring down inflation, the fallout from the recent deterioration in financial conditions, the continuing war in Ukraine and rising geopolitical tensions.

Market Outlook

Singapore

- Based on advance GDP estimates by the Ministry of Trade and Industry (MTI) for 1Q 2023, the Singapore economy expanded by 0.1% y-o-y, slower than the 2.1% growth in 4Q 2022. The manufacturing sector contracted by 6.0% y-o-y, deteriorating from the 2.6% contraction in the previous quarter, due to output contractions across all the manufacturing clusters except for the transport engineering cluster.
- In February 2023, MTI maintained its GDP forecast for the Singapore economy to grow by “0.5% to 2.5%” in 2023, after taking into account the continuing uncertainties in the global economy.
- Consumer Price Index (CPI-All Items) fell to 5.5% y-o-y and MAS Core Inflation, which excludes the costs of housing and private road transport, fell to 5.0% y-o-y in March 2023. These were driven by lower inflation for private transport and services and offset by higher inflation for electricity & gas. For 2023 as a whole, MAS expects CPI-All Items and MAS Core Inflation to average 5.5-6.5% and 3.5-4.5%, respectively.
- In April 2023, the Monetary Authority of Singapore (MAS) maintained its monetary policy from its last tightening in October 2022 of the prevailing rate of the Singapore dollar nominal effective exchange rate (S\$NEER) policy band. There is no change to the slope and width of the policy band. This policy stance is to reduce imported inflation and curb domestic cost pressures.
- CapitaLand Ascendas REIT’s (CLAR) multi-asset portfolio in Singapore, worth S\$10.4 b as at 31 March 2023, serves a wide range of customers from industries such as technology, biomedical sciences, manufacturing and logistics across their entire chain of operations.
- As part of CLAR’s asset rejuvenation plan, several asset enhancement initiatives and redevelopment projects are ongoing to upgrade property specifications, unlock value through repositioning or meet green rating requirements.

Market Outlook

United States (US)

- Based on the advance estimate for 1Q 2023, the US economy grew by an annualised rate of 1.1%, a slower pace as compared with 2.6% in 4Q 2022. The increase in GDP reflected increases in consumer spending, exports, federal government spending, state and local government spending and nonresidential fixed investment that were partly offset by decreases in private inventory investment and residential fixed investment. IMF estimates the GDP growth for the US to be 1.6% y-o-y for 2023.
- The CPI All Urban Consumers index increased 5.0% over the last 12 months ended March 2023, the smallest 12-month increase since the period ended May 2021. The All Items less food and energy index rose 0.4% in March 2023. The energy index decreased 3.5% as acquisition of the gasoline prices declined, while the food index was unchanged at 0.3% in March 2023.
- In March 2023, the US Federal Reserve raised the target range for the federal funds rate by another 25 basis points to 4.75% to 5%, the highest level in 15 years. The US Federal Reserve also anticipated that some additional policy firming may be appropriate in order to attain a stance of monetary policy that is sufficiently restrictive to return inflation to 2% over time. In addition, it noted that the US banking system remains sound and resilient despite the recent financial sector developments.
- With the acquisition of the seven logistics properties in Chicago in June 2022, CLAR's diversified US portfolio was worth S\$2.5 b as at 31 March 2023. The US portfolio comprises business spaces and logistics properties, underpinned by a long WALE period of 4.5 years.

Market Outlook

Australia

- In 4Q 2022, the Australian economy grew 0.5% quarter-on-quarter (q-o-q). Although this is the fifth consecutive rise in quarterly GDP, growth slowed in each of the last two quarters. Continued growth in household and government spending fuelled the rise in final consumption, while increased exports of travel services and continued overseas demand for coal and mineral ores drove exports. The IMF projects the Australian economy to achieve a GDP growth of 1.6% in 2023.
- In March 2023, All groups CPI rose 6.3% y-o-y, down from 6.8% in February 2023, due to price rises from Housing, Food and non-alcoholic beverages and Furnishings, household equipment and services categories.
- At its April 2023 meeting, the Reserve Bank of Australia (RBA) maintained its cash rate target at 3.6% and the interest rate on Exchange Settlement balances at 3.5%. This follows a cumulative increase in interest rates of 3.5 percentage points since May 2022. The Australian economy has slowed, with growth expected to be below trend due to a combination of higher interest rates, cost-of-living pressures and a decline in housing prices. RBA expects that some further tightening of monetary policy may be needed to ensure that inflation returns to its target.
- The two newly completed logistics properties in 2022, 7 Kiora Crescent in Sydney and 500 Green Road in Brisbane, are 100% occupied and contributed positively to the rental income of the Australian portfolio in 1Q 2023.
- MQX4, a new suburban office property in Sydney, is expected to complete in 2Q 2023, which will expand CLAR's footprint within the Macquarie Park innovation district. The total value of properties in Australia is expected to grow to S\$2.5 b after the inclusion of MQX4.

Market Outlook

United Kingdom (UK)

- UK's GDP registered a 0.1% growth q-o-q in 4Q 2022, with higher services and construction outputs and a flat production output. IMF projected UK's economy to contract by 0.3% in 2023.
- The Consumer Prices Index (including owner occupiers' housing costs) rose 8.9% in the 12 months to March 2023, down from 9.2% in February 2023. The largest upward contributions to the inflation rate came from housing and household services (principally from electricity, gas and other fuels), and food and non-alcoholic beverages.
- In March 2023, the Bank of England's Monetary Policy Committee (MPC) increased the Bank Rate by 0.25% points to 4.25%. CPI inflation increased unexpectedly and the labour market has remained tight. 12-month CPI inflation rose from 10.1% in January to 10.4% in February 2023. In addition, the MPC will continue to assess the economic implications of the recent financial market and banking sector developments.

Europe

- The economies in Western Europe continue to face broadening inflationary pressures, with monetary tightening exerting a drag on investments and persistent weakness in consumption. The European Commission projected its GDP growth expectations for the European Union to be 0.8% in 2023.
- In UK/Europe, CLAR's assets under management amounted to S\$1.5 b as at 31 March 2023. The portfolio comprising logistics properties and data centres has a long WALE period of 6.1 years and is expected to benefit from the strong adoption of e-commerce and digitalisation of activities.

Market Outlook

Summary

- We continue to face challenges from high interest rates and inflation, as well as from increased economic uncertainties from the recent US financial sector turmoil and liquidity situation faced by certain sectors due to tighter monetary conditions.
- These ongoing issues may have some impact on tenants' businesses as well as on CLAR's operating costs.
- The Manager will proactively manage these challenges in a prudent manner and is well-positioned to leverage on CLAR's strong financial position to take advantage of any growth opportunities should they arise to deliver sustainable returns to Unitholders.
