Overview of UOB Group

Founding

Founded in August 1935 by a group of Chinese businessmen and Datuk Wee Kheng Chiang, grandfather of the present UOB Group CEO, Mr. Wee Ee Cheong

Expansion

UOB has grown over the decades organically and through a series of strategic acquisitions. It is today a leading bank in Asia with an established presence in the Southeast Asia region. The Group has a global network of more than 500 branches and offices in 19 countries and territories.

Trade Tensions Cloud China's Outlook but Low Risk of Hard Landing

- Despite ongoing structural slowdown, the Chinese economy has its underlying momentum, supported by rebalancing reforms and steady jobs market.
- Low central government debt underpins China's fiscal capacity, which could help mitigate "black swan" events.
- Baseline GDP growth est for China at 6.2% in 2019 & 2020 (2018: 6.6%). Greatest near-term risk from protracted US-China trade negotiations (30% prob of talks breakdown). Growth to slow to 5.8% should all Chinese exports to the US be targeted in trade conflicts.

The FOMC cut its policy Fed Funds Target Rate by 25bps in its 31 Jul meeting, in light of the implications of global developments for the economic outlook as well as muted inflation pressures even with the view that US domestic conditions remaining robust. The FOMC did not commit to a further rate cut but said that it will continue to monitor the incoming economic data growth. We expect the Fed to go into a period of wait-and-see as more US data becomes available, and then to follow up with another 25bps cut only in Dec, bringing the upper bound of FFTR to 2.00% by end-2019. That said, an escalation of the US-China trade tensions may also influence the Fed's timeline for the next rate cut.

We see downside risk to our base call for MAS to keep policy unchanged in October. SG\$NEER is coming from a position of strength that is inconsistent with underlying weakness displayed in the domestic economy. Convergence of views towards MAS easing in October will reinforce downside pressure on SG\$NEER. Potential for weaker domestic currency will cause SORs to lag US rates when the latter is repricing lower.

China's growth is expected to slow further due to its structural reforms and trade tensions with the US but policymakers have been able to manage downside risks with proactive fiscal and monetary measures. On balance, with China's growth within target (6-6.5%) and more dovish Fed, capital flight risk from Asia will remain low. Asian central banks are also likely to move towards easing monetary policy to support growth, albeit those with current account and fiscal deficits, would likely do so in a cautious approach.

- Includes 2% for D-SIB (domestic-systemically important banks) buffer for the three Singapore banks.
- Each regulator determines its own level of countercyclical capital buffer.
- According to the regulations, Indonesia D-SIBs will initially be subject to a D-SIB buffer of up to 2.5%.
- In China, G-SIBs (global-systemically important banks) are only subject to the higher of G-SIB and D-SIB buffer.
- Minimum ratios on fully-loaded basis, including capital conservation buffer and D-SIB surcharge, but excluding countercyclical capital buffer and G-SIB surcharge.

Banking Regulations Still Evolving

“ Banks need to be profitable in order to be strong. Retained earnings are one of the major sources of equity – which is the highest quality capital that banks hold. Banks also need to be profitable to be able to support the real economy. They have to earn a decent return for intermediating credit, otherwise they will do less of it. ”

– Mr Ravi Menon, Managing Director,
Monetary Authority of Singapore, 20 April 2017

“ ...certain liabilities should be excluded from the scope of bail-in because their repayment is necessary to ensure the continuity of essential services and to avoid widespread and disruptive contagion to other parts of the financial system. The proposed scope of bail-in would hence exclude liabilities such as ... senior debt and all deposits. ”

1. Please refer to http://ec.europa.eu/finance/bank/docs/regcapital/acts/delegated/141010_delegated-act-liquidity-coverage_en.pdf and check for details. At the time of this presentation and subject to any relevant matters which are within the control of a relevant EU investor (including its compliance with the transparency requirement referred to in article 129(7) of Regulation (EU) 575/2013) and to the issuer and the covered bonds being regarded to be subject to supervisory and regulatory arrangements regarded to be at least equivalent to those applied in the EU, this bond should satisfy the eligibility criteria for its classification as a Level 2A asset in accordance with Chapter 2 of Regulation (EU) 2015/61 supplementing Regulation (EU) 575/2013. Notwithstanding the foregoing, it should be noted that whether or not a bond is a liquid asset for the purposes of the Liquidity Coverage Ratio under Regulation (EU) 575/2013 is ultimately to be determined by a relevant investor institution and its relevant supervisory authority and neither the issuer nor the manager accept any responsibility in this regard

2. Only entered into if and when required by either Rating Agency in order to ensure that the then current rating of the Covered Bonds would not be downgraded

Covered Bond Structure

Notwithstanding that CPF's consent is required for the transfer or assignment of mortgages relating to CPF Loans, no such consent is required for a declaration of trust over mortgages relating to CPF Loans. The Seller is acting as the Assets Trustee and the CPF Loans are held on trust for the benefit of the Covered Bond Guarantor (CBG). Both EA and DOT mechanisms are permissible under MAS Notice 648 and such hybrid structure has been used in Covered Bond programmes in other jurisdiction

Credit Structure (Dual Recourse)

- (A)** Covered Bond issued directly from UOB constitutes direct, unsecured and unsubordinated obligations of the Issuer
- ▶ CBG guarantees the payment of interest and principal on the Covered Bonds, secured by the Cover Pool

Hedging

- (B)** Cover Pool Swap¹ –to hedge interest rate risk between the mortgage loans and CBG's SGD interest/swap payments¹
- ▶ Covered Bond Swap (if necessary) –to hedge against the currency risk between the amount received by the CBG against its payment in other currency

Segregation of mortgage loans

- (1)** UOB provides an intercompany loan to the CBG
- (2)** CBG pays UOB consideration for the purchase of the mortgage loans
- (3)** A dual ring-fencing structure which uses both equitable assignment (EA) and declaration of assets trust (DOT) mechanisms:
 - ▶ DOT – for the sale of DOT loans²
 - ▶ EA – for the sale of EA Loans³ via equitable assignment

1. Only entered into if and when required by either Rating Agency to ensure that the then current rating of the Covered Bonds would not be downgraded
2. DOT Loans mean: (1) the borrowers had used CPF funds in connection with a residential property (CPF Loan) or (2) the required documentation for the borrowers' use of CPF funds, in connection with a residential property, is prepared
3. EA Loans mean a non-CPF Loan and the required documentation for the borrowers' use of CPF funds, in connection with a residential property, is not prepared
