

Foxcom, a Global Invacom Company, Ships World's First Iridium/GPS Repeater for Aircraft Hangars

London/Singapore, 11 May 2017 - Global Invacom Group Limited (“Global Invacom” or “the Group”), a satellite communications (“Sat Comms”) equipment provider listed on the Singapore Exchange and the U.K. AIM Market, today announces that Foxcom, one of its R&D and manufacturing arms, will ship its low-cost iridium/GPS repeater to a leading international airline for installation in one of its aircraft hangars.

Foxcom will install the new fibre repeater in the airline’s hangar at the end of May 2017. The repeater, which debuted in October 2016, is the latest solution for aircraft hangars in the highly successful range of iridium and GPS repeaters that Foxcom launched in 2013.

With the ability to provide Iridium/GPS satellite signals inside hangars, the airline can undertake avionics testing indoors at any time, regardless of the weather, without having to move aircraft in and out of the building. This greatly reduces aircraft-on-ground time, man-hours and overall maintenance costs, therefore providing an immediate return on investment.

Iridium satellite equipment is used worldwide but has traditionally been limited to outdoor use, as building structures block the satellite signals. Foxcom’s Iridium and GPS repeater allows communication inside buildings, using fibre optic for a long distance between Outdoor Units (“ODU”) and Indoor Units (“IDU”), or coax for a low-cost repeater solution where ODU and IDU that are just a few metres apart.

Beyond hangars, Iridium repeaters are used across a range of locations and industries. These include underground civil defence and military bunkers, oil rigs and ships, and large buildings.

Established in 1993, Foxcom specialises in radio frequency over fibre equipment. It is a top supplier to satellite operators, broadcasters and integrators worldwide, with products that offer high performance, bandwidth and reliability. For more information, visit: www.foxcom.com

About Global Invacom Group Limited

Global Invacom Group Limited (“Global Invacom”) is listed on the Singapore Exchange Securities Trading Limited Mainboard (“SGX-ST”) and its shares are admitted to trading on the AIM Market of the London Stock Exchange in the U.K.

Global Invacom is a fully integrated satellite equipment provider with six manufacturing plants across China, Israel, Malaysia, U.K. and the U.S. Its customers include satellite broadcasters such as BSkyB of the U.K. and Dish Network of the U.S.A.

On 24 August 2015, Global Invacom completed the acquisition of Global Skyware, a leading U.S.-based designer and supplier of satellite antennas products and services for C-band, Ku-band and Ka-band frequency platforms, positioning itself as the world's only full-service outdoor unit supplier.

Global Invacom provides a full range of dish antennas, LNB receivers, transmitters, switches and video distribution components and electronics manufacturing services in satellite communications as well as manufacturing services in TV peripherals, computer peripherals, medical, and consumer electronics industries.
