Lima, April 3rd, 2021

Reference: PERU LNG's Plant Shutdown

To whom it may correspond,

We hereby inform of an unexpected event occurred on April 27, 2021 in connection with a turbine that operates the Propane Compressor at PERU LNG's Plant. As a result, we confirm the Plant was fully stopped on the same date as a preventive measure and after the corresponding analysis, repair works have started on May 1, 2021 to solve this issue. The work progress as of May 3, 2021 is 6%, and we are estimating resume of operations by June 8, 2021.

Furthermore, please be informed that local authorities have been reported of this event and according to Article 2 of Supreme Decree N° 017-2018-EM, it has been declared an emergency situation for the supply of natural gas from the Natural Gas Distribution System through the North Concession Pipeline Network and the Natural Gas Distribution System through the South West Concession Pipeline Network from April 28, 2021, until conditions to normal LNG loading are reestablished at the PERU LNG's Plant.

Sincerely yours,

Ursula Calle
