SEMBCORP HOSTS CHINA'S MINISTER FOR WATER RESOURCES AT ITS OPERATIONS ON JURONG ISLAND, SINGAPORE

SINGAPORE, June 1, 2014 – China's Minister for Water Resources, Chen Lei, visited Sembcorp's facilities on Jurong Island today while in Singapore for the Singapore International Water Week. During the visit, Minister Chen was given an overview of Sembcorp's industrial water and wastewater treatment facilities on Jurong Island, where the company has served industrial companies' specialised water and wastewater treatment needs for over 15 years.

These facilities include industrial wastewater treatment plants employing advanced processes and technologies to treat multiple streams of high concentration and high salinity industrial wastewater. They also include facilities which reclaim water from the treated effluent and use this reclaimed water to produce various industrial waters for supply back to Sembcorp's customers. The unique "total water solutions" model applied in Sembcorp's facilities – where industrial wastewater treatment, water reclamation and water supply are integrated – is more environmentally friendly, as it promotes water reuse and helps to conserve precious water resources.

Minister Chen's visit comes at a timely juncture, with Sembcorp increasingly working with companies and authorities in China to introduce advanced water management solutions that meet the growing needs of industries there and support the country's sustainable development. As a world leader in industrial water and wastewater management, Sembcorp currently serves the water and wastewater needs of companies in 11 leading industrial sites in China, in addition to being a trusted provider of essential energy and urban development solutions in the country.

Sembcorp has applied a total water solutions model, similar to what it has on Jurong Island, to its water plants in the Zhangjiagang Free Trade Port Zone in China's Jiangsu province, as well as in the Wangqiao Industrial Park in Changzhi city, Shanxi province. Both the Zhangjiagang and Changzhi facilities have received high-level recognition, with the governments of China and Singapore designating them as joint showcases for integrated water management. Earlier in March, Sembcorp was also named "Leader in Wastewater Treatment for Chemical Industrial Parks" by ChinaWaterNet, China's most influential trade media for the water sector, at its prestigious China Water Industry Annual Awards 2013.

ABOUT SEMBCORP INDUSTRIES

Sembcorp Industries is a leading energy, water and marine group operating across six continents worldwide. With facilities of over 7,200 megawatts of gross power capacity and over eight million cubic metres of water per day in operation and under development, Sembcorp is a trusted provider of essential energy and water solutions to both industrial and municipal customers. It is also a world leader in marine and offshore engineering as well as an established brand name in urban development.

The Group has total assets of over S\$14 billion and employs approximately 10,000 employees. Listed on the main board of the Singapore Exchange, it is a component stock of the Straits Times Index and several MSCI and FTSE indices.

ABOUT SEMBCORP IN CHINA

Sembcorp has invested in the China market for close to two decades and its presence spans 15 provincial regions across the country.

The Group has the expertise to provide essential solutions in sustainable ways. With its renewable energy and high-efficiency power generation facilities, innovative water and wastewater treatment solutions, as well as sustainable, self-sufficient urban developments, Sembcorp supports China's continued growth. In addition, its commitment to sustainability is aligned with the strong emphasis on environmental protection in China's 12th Five-year Plan.

Note to Editors: Please refer to the company as “**Sembcorp**” (with “**S**” in upper case and “**c**” in lower case), or “Sembcorp Industries” in full. Please also note that “Sembcorp” is not an abbreviation of “Sembawang Corporation” but a brand name in itself, and it is therefore incorrect to refer to our company as “Sembawang”, “Sembawang Corporation” or similar.
