(Company Registration Number: 201108075C)

(Incorporated in the Republic of Singapore)

CERTIFICATION OF MATERIALS FOR RENEWABLE ENERGY APPLICATIONS WITH VESTAS WIND SYSTEMS A/S

The board of directors (the “**Board**” or the “**Directors**”) of NauticAWT Limited (the “**Company**”, and together with its subsidiaries, the “**Group**”) wishes to announce that its ultra high performance cementitious (“**UHPC**”) NAX™ products have been certified and approved for use in onshore wind turbine foundations by Vestas Wind Systems A/S (“**Vestas**”).

Vestas is a wind turbine manufacturer and have installed more than 56,000 wind turbines across 75 countries and 6 continents generating more than 90 million megawatt hours of energy per year which is enough electricity to supply millions of households.

The Company has over the last year worked together with Vestas to get its UHPC NAX™ products certified and approved for use in onshore wind turbine foundations. The approval process involved rigorous and comprehensive testing of mechanical and operational parameters at Material Prufanstalt fur das Bauwesen (“**MPA**”) in Hannover, Germany and included trial installations of our materials in wind turbines in Europe and Africa.

The renewable energy industry is strictly regulated and the rigorous approval process provides a high barrier to entry into this market. The Company’s materials are currently one of only two cementitious products that are now certified and approved for use in Vestas onshore wind turbine foundations worldwide.

The Company entered the renewable energy industry in 2015 as a key market to provide diversity of revenue and expand the application of its unique range of materials produced at the Group’s production facility in Nusajaya, Malaysia. The certification by MPA and approval with Vestas increases the Company’s capability in this market which is considered a key driver for growth in the coming years.

By Order of the Board

John Grønbech

Executive Director and CEO

7 April 2016
