10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

The global oil and gas industry continues to experience significant challenges in light of the current oil price environment. Oil prices have gradually stabilizing in the fourth quarter of 2016 (Brent US\$51.06/bbl average), the higher and more stable oil price will be a trigger point on inspection, repair and maintenance activities in Oil and Gas industry.

Oil and gas operators have reduced budgets and non-essential and/or non-profitable projects have been generally put on hold or cancelled. The flow down effect has affected contractors across the supply chain with many reportedly facing financial difficulties and some ceasing operations. The industry has entered a credit void for offshore debt and oil service stocks are testing all time lows. Cost optimization and project re-evaluation is noted to be gathering pace. The rebalancing process is volatile and appears to be underway. Oil fundamentals are showing silent stability which sets the path for recovery. However, there is no indication that the level of business activity will improve in the near term through 2017.

The subsea business remains the Group priority. Inspection, repair and maintenance services in shallow water production fields continue to contribute to the Group's performance. The Group is actively pursuing any new work including additional survey, cable lay, decommissioning projects, and engineering related services with the aim to maintain profitability levels. The Group is leveraging on its reputation and stability to access additional geographical markets and to cross-sell its services across regions in order to position itself as a key contractor of choice.

There is otherwise no activity in tender rig drilling and the 'MTR-1' and 'MTR-2' remain cold stacked and marketed for sale. The Group's two newbuild tender rigs 'MTR-3' and 'MTR-4' and the DP2 Subsea Dive Construction and Support Vessel under construction in China contracts have been cancelled by mutual agreement, remaining financial obligation USD 378.8m for all of three newbuilds have been cancelled. The Group had mitigated its downside risks on earnings since 2015 by recorded as asset-impairment.

Cash preservation remains a top priority. In the fourth quarter of 2016, the Group continued to execute its cost savings program to counter the negative effect of the market downturn whilst aiming to maintain safety, quality and efficiency.

The Group's balance sheet remains in a strong position with net positive cash balance which is expected to financially help the Group weather the downturn better. The Group is also well

(Registered in the Kingdom of Thailand) (Company Registration No. 0107550000017)

positioned to capitalize on opportunistic expansion if and when potential distressed assets become available for sale.

In our drilling business joint venture under Asia Offshore Drilling ("AOD"), the Group's three high specification jack-up drilling rigs still remained near full utilization during the fourth quarter of 2016. AOD III had successfully contract extended until the end of December 2019, the renewal for AOD III and also AOD I and AOD II contracts in last quarter have reduced earning uncertainty for next 3 years.

AOD's liquidity requirements relate to servicing debt amortizations, interest payments, and funding working capital requirements. Sources of liquidity include existing cash balances, and bareboat revenues. AOD has historically relied on the cash generated from operations to meet working capital needs, and on funding provided by its majority shareholder Seadrill Limited ("Seadrill"). AOD's \$360 million Senior Secured Credit Facility ("SSCF") is guaranteed by Seadrill, and cross default clauses exist between this facility and Seadrill's other credit facilities. The outstanding balance of the SSCF as at December 31, 2016 is \$237 million, of which \$36 million is classified as current liabilities. The SSCF matures in April 2018 with a balloon payment of \$180 million.

As a result of the downturn in the offshore drilling industry, Seadrill will be required to obtain additional liquidity to fully meet its short term liquidity requirements over the next twelve months. As part of the Seadrill group's refinancing program, AOD's SSCF is also being refinanced. Over the past year Seadrill has engaged discussions with its banks, potential new investors, and bondholders to extend approximately \$8 billion in first lien secured debt and raise \$1 billion of new capital. Seadrill are targeting reaching an agreement prior to April 30, 2017, and Seadrill expects the implementation of an agreement to occur during the second quarter of 2017. Seadrill are also actively preparing various contingency plans in the event a consensus agreement is not reached. AOD's going concern assumption is based on management's expectation that Seadrill's refinancing program will be completed successfully.
