CIVMEC AWARDED CONTRACTS ON THE NORTHERN GAS PIPELINE

SINGAPORE – 27 September 2017 – Australia-based **Civmec Limited** (“**Civmec**” or the “**Group**”), has been awarded several contracts by Jemena Northern Gas Pipeline Pty Ltd (Jemena) including camp setup, site civil, structural steel fabrication and the Structural, Mechanical, Piping, Electrical and Instrumentation (SMPEI) installation works at the Phillip Creek Compressor Station (PCCS) for Jemena’s Northern Gas Pipeline (NGP) project, located near Tennent Creek in the Northern Territory, Australia.

The scope of work includes the establishment of a 200-man camp, site civil works involving underground services, earthworks, concrete works, fencing, while the SMPEI works involves installation of the Gas Treatment Equipment, residue gas compressor packages, export gas compressor packages, control room, switch room, as well as various other components.

With site civil works commenced and the SMPEI work scheduled to commence in late September 2017, the project will require more than 160 personnel to be employed at its peak, with completion scheduled for August 2018.

Utilising Civmec’s modern facilities and equipment to completely fabricate the structural steel as well as carrying out the site SMPEI, Civmec ensures their onsite activities have the best opportunity for success.

Mr. Patrick Tallon, Chief Executive Officer said: “This is a significant and strategic award for us and combined with the scope growth at the Inpex project in Darwin, it will see an enlargement of our on-site capabilities within our Oil & Gas division and an expansion of our brand in the Northern Territory. We are delighted to secure Jemena as a new client and are very focused on ensuring that together we deliver these contracts safely and effectively.”

Including this project, the Group’s order book stands at approximately S\$640M.

About Civmec Limited

Civmec is an integrated, multi-disciplinary construction and engineering services provider to the oil and gas, metals and minerals, infrastructure and defence sectors. Headquartered in Henderson, Western Australia, Civmec has regional offices in Broome (Western Australia), Darwin (Northern Territory, Australia), Newcastle and Sydney (New South Wales, Australia), and Gladstone (Queensland, Australia). It also has a presence in Singapore where it has been listed since 2012. Its core capabilities include heavy engineering, modularisation, SMP (structural, mechanical, piping), EIC (electrical, instrumentation and control), precast concrete, site civil works, industrial insulation, maintenance, offshore logistics, refractory, access solutions and training.
