

MEDIA RELEASE

***RafflesMedicalGroup* is the First in Asia to Join the
Mayo Clinic Care Network**

29 July 2015, Singapore – **RafflesMedicalGroup** ('Group'), a leading integrated private healthcare provider in Singapore and the region, announces its membership with the Mayo Clinic Care Network, a growing network of organisations committed to better serving patients and their families through collaboration. The Group is the first in Asia to join the network.

As part of this network, the Group's physicians now have access to the latest Mayo Clinic knowledge to complement their expertise. Through information-sharing tools and services, Raffles' physicians will collaborate with Mayo Clinic physicians, enabling patients to get answers to their medical questions while staying close to home. This will allow the Group to treat patients with complex medical conditions through these shared resources.

"Our patients have always looked to **Raffles** to provide them with quality care," says Dr Donald Poon, General Manager, **RafflesHospital**. "We share a commitment to enhance care and add value for patients, which has become increasingly important in a changing health care landscape. By working with Mayo Clinic, we will be in an even stronger position to deliver high-quality and best-practice care. This is especially true for both our Centres of Excellence – Raffles Heart Centre and Raffles Cancer Centre."

"We are pleased to welcome **RafflesMedicalGroup** to the network," says David Hayes, M.D., medical director, Mayo Clinic Care Network. "As we have worked together towards today's announcement, we have been impressed by the cultural alignment of our two institutions. Raffles continues to raise the bar on the ways in which an integrated, team-based approach can be used to meet the needs of patients, and we're very proud of our shared purpose — to bring the highest quality patient care to the region."

As a member of the Mayo Clinic Care Network, the Group will collaborate with Mayo Clinic in ways that will benefit patients and their communities. The list of network tools and services include:

- **eConsults** - allow physicians and specialists of the Group to connect electronically with Mayo specialists and subspecialists when they want additional input on a patient's care.
- **AskMayoExpert** - provides the Group with point-of-care Mayo-vetted information on disease management, care guidelines, treatment recommendations and reference materials for a variety of medical conditions.

- **eTumor Board Conferences** - allow physicians and specialists of the Group to present and discuss management of complex cancer cases with a multi-disciplinary panel of Mayo Clinic specialists and other network members.
- **Healthcare Consulting** – allows Mayo Clinic to share their expertise through quality management improvement projects within the organisation.

Under the agreement, the collaboration extends Mayo Clinic's expertise and clinical care resources to subsidiaries of the Group, which include **RafflesHospital**, **RafflesMedical** and **RafflesDental**.

RafflesMedicalGroup, which will remain an independent organisation, is the latest addition to the network which launched in 2011 and now has more than 30 members across the USA and Mexico.
