Revenue

Revenue for the 3-month period ended 30 September 2015 ("2Q2016") decreased by approximately RMB 38.2 million or 39.4%, from RMB 97.0 million of the 3-month period ended 30 September 2014 ("2Q2015") to RMB 58.8 million in 2Q2016. The decrease in revenue is mainly due to lower sales across all products segments during 2Q2016 as compared to 2Q2015.

Our products can be categorised mainly into (a) explosive devices such as boosters; (b) industrial fuse and initiating explosive devices such as detonating cords and non-electric tubes; (c) industrial detonators such as non-electric detonators and piston non-electric detonators; and (d) ammonium nitrate. The breakdown and comparison of our revenue by the above product types and geographical segments between 2Q2016 and 2Q2015 and between the 6-month period ended 30 September 2015 ("6M2016") and the 6-month period ended 30 September 2014 ("6M2015") are as follows:

Note :

(1) Others include sales of raw materials and packaging materials

(2) These were sales to export distributors in the PRC in which they export the products to their customers overseas.

8. **A review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. It must include a discussion of the following :-**
- **any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors; and**
 - **any material factors that affected the cash flow, working capital, assets and liabilities of the group during the current financial period reported on. (Cont'd)**

Revenue (cont'd)

a) **Sales within PRC**

During 2Q2016, sales within PRC decreased by approximately RMB 17.8 million or 31.3% as compared to 2Q2015. For 6M2016, sales within PRC decreased by approximately RMB 51.7 million or 37.4% as compared to 6M2015. The decline was mainly due to the lower PRC sales across all our product segments.

As mentioned in our previous announcements, China has been experiencing a slowdown in its economic growth and the broad-based weakness in global commodity prices continues to impact mining activities in China. Moreover, due to the challenging market conditions for ammonium nitrate, there was no production of ammonium nitrate during the current period under review and as such, the sale of ammonium nitrate declined significantly by 95.6% in 6M2016 as compared to 6M2015.

b) **Sales through export distributors**

There were no export sales through export distributors during the current period under review.

c) **Sales to Australia**

During 2Q2016 and 6M2016, sales to Australia decreased by approximately RMB 17.7 million or 51.2% and RMB 6.4 million or 10.5% respectively. The decline is mainly attributed to the temporary closure of ports, namely the Port of Qingdao and Port of Weihai during September 2015, which were indirectly affected by the explosions at the unrelated warehouses situated at the Port of Tianjin.

The temporary closure of these ports and stoppage of port activities for commercial explosives at the Port of Qingdao and Port of Weihai have affected our customers' vessels from docking at the ports and thus Yinguang Technology was not able to load the commercial explosive products onto our customers' vessels during this period.

However, the Group managed to successfully load our commercial explosives products onto the vessel arranged by Orica Australia through the Port of Weihai on 21 September 2015. For more information, please refer to our earlier announcements on 7 September 2015 and 25 September 2015.

d) **Sales to other countries**

During 2Q2016 and 6M2016, sales to other countries decreased by approximately RMB 0.8 million and RMB 3.4 million respectively. The decline is mainly due to lower sales to other countries, namely Indonesia, Mongolia and Kyrgyzstan.

All domestic PRC sales contracts and export applications sought by export agents have been approved by the Ministry of Industry and Information Technology, Department of Work Safety ("MIIT").

8. **A review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. It must include a discussion of the following :-**
- **any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors; and**
 - **any material factors that affected the cash flow, working capital, assets and liabilities of the group during the current financial period reported on. (Cont'd)**

Gross profit margin

During 2Q2016, the Group's gross profit margin decreased marginally by approximately 0.3 percentage points, from 34.2% in 2Q2015 to 33.9% in 2Q2016. For 6M2016, the Group's gross profit margin improved by approximately 2.4 percentage points, from 31.4% in 6M2015 to 33.8% in 6M2016.

The improvement in the Group's gross profit margin was mainly due to the Group's product mix being skewed towards higher margin products as sales of ammonium nitrate (which accounted for the lowest gross margin among the Group's four product segments) declined significantly during the current period under review since the production of ammonium nitrate was halted.

Interest income / (Finance costs)

For 2Q2016 and 6M2016, interest income decreased by approximately RMB 183,000 and RMB 184,000, respectively, mainly due to lower average bank deposits during the current period under review.

For 2Q2016 and 6M2016, finance costs decreased by approximately RMB 512,000 and RMB 707,000, respectively, mainly due to lower bank lending interest rate.

Other gains / (Other losses)

For 2Q2016, other gains relate to foreign exchange adjustment gain of RMB 566,000, government grants of RMB 305,000 and a reversal of allowance for impairment on trade receivables of RMB 26,000. For 2Q2015, other gains relate to government grants of RMB 205,000 and a reversal of allowance for impairment on trade receivables of RMB 3,000.

For 6M2016, other gains relate to foreign exchange adjustment gain of RMB 531,000, government grants of RMB 517,000, and a reversal of allowance for impairment on trade receivables of RMB 26,000. For 6M2015, other gains relate to foreign exchange adjustment gain of RMB 676,000, government grants of RMB 327,000, and a reversal of allowance for impairment on trade receivables of RMB 3,000.

For 2Q2016 and 6M2016, other losses relate to loss on disposal of property, plant and equipment of approximately RMB 19,000. For 2Q2015, other losses relate to foreign exchange adjustment loss of approximately RMB 67,000.

Foreign exchange adjustment gain/(losses) arose mainly from foreign exchange rate fluctuation among Renminbi (RMB), United States Dollar (US\$) and Singapore Dollars (S\$). Government grants relate to a grant for certain plant and equipment which will be amortised over 3 years and other ad hoc government grants for various purposes including safety awareness.

Operating expenses

Corresponding to lower revenue registered in 2Q2016 and 6M2016, the Group's distribution costs decreased by approximately 30.2% and 28.1%, respectively. Administrative expenses also declined by approximately 8.7% and 8.2% for 2Q2016 and 6M2016, respectively. During 6M2016, amortisation expenses decreased by approximately RMB 594,000 due to amortisation charges for intangible assets during 6M2015. Intangible assets were fully written-off as at 31 March 2015, thus no further amortisation charges for 6M2016.

Income tax expenses

The effective tax rate for 2Q2016 and 6M2016 was 57.0% and 44.0%, respectively (2Q2015: 37.8% ; 6M2015: 39.9%). This is higher than the PRC tax rate of 25.0% mainly due to the loss-making position of Hebei Yinguang and the non-deductible expenses of the Group.

8. **A review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. It must include a discussion of the following :-**
- **any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors; and**
 - **any material factors that affected the cash flow, working capital, assets and liabilities of the group during the current financial period reported on. (Cont'd)**

Statement of Financial Position

Property, plant and equipment decreased by approximately RMB 4.5 million, mainly due to the depreciation charged for the current period under review of approximately RMB 9.4 million, which was partially offset by the acquisition of property, plant and equipment of approximately RMB 4.9 million.

Other assets, non-current relate to the Group's land use rights, which decreased by approximately RMB 1.3 million mainly due to the amortisation charges of approximately RMB 1.3 million recognized during the current period under review.

Deferred tax assets relate mainly to the deferred tax differences for the allowance for impairment on trade and other receivables and provision for safety expenses.

Inventories, trade and other receivables, other assets and cash and cash equivalents, represented approximately 14.8%, 28.8%, 8.6% and 47.8% respectively of our total current assets as at 30 September 2015.

Inventories decreased by approximately RMB 16.0 million or 25.8% to RMB 45.9 million as at 30 September 2015, as compared to RMB 61.9 million as at 31 March 2015. The decrease was mainly due to the decrease in raw materials and finished goods.

During the current quarter under review, trade and other receivables increased marginally by approximately RMB 1.8 million or 2.1%.

Other assets, current comprising the Group's prepayments, increased by approximately RMB 14.7 million or 124.0% to RMB 26.6 million as at 30 September 2015. The increment was mainly due to a prepayment for land use rights of approximately RMB 10.4 million relating to the new storage facility.

As at 30 September 2015, our current liabilities comprised of income tax payable of RMB 2.1 million, trade and other payables of approximately RMB 106.1 million, other current financial liabilities of approximately RMB 105.6 million and other liabilities of RMB 9.9 million. Non-current liabilities comprised of deferred tax liabilities of RMB 2.0 million.

Trade and other payables decreased by approximately RMB 9.3 million mainly due to the decrease in bills payables due of RMB 7.0 million.

As at 30 September 2015, other current financial liabilities of RMB 105.6 million comprised of bank loans of RMB 97.4 million and a third party loan of RMB 8.2 million. The increment of RMB 22.0 million from RMB 83.7 million as at 31 March 2015 was mainly due to the additional bank loans obtained by the Group during 1Q2016 upon repayment of those loan amounts that were due before 31 March 2015. Adhering to the customary banking practices in the PRC, the Group's bank loans are for a period of one year or less.

Other liabilities of RMB 9.9 million relate to the Group's provision for safety expenses and advances from customers.

Deferred tax liabilities of RMB 2.0 million relate mainly to the deferred tax difference upon the finalisation of the PPA exercise in relation to the acquisition of Hebei Yinguang in 2008 and the deferred tax liabilities for the withholding tax on dividend payable by our subsidiary in China.

8. **A review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. It must include a discussion of the following :-**
- **any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors; and**

Cash flow

For 2Q2016, the Group has net cash from operating activities of approximately RMB 15.5 million, net cash used in investing activities of approximately RMB 2.5 million and net cash used in financing activities of approximately RMB 5.0 million.

For 6M2016, the Group has net cash from operating activities of approximately RMB 21.8 million, net cash used in investing activities of RMB 14.9 million and net cash from financing activities of approximately RMB 15.0 million.

The net cash from operating activities for 2Q2016 and 6M2016 was mainly due to trade receivables collections and lower inventories held on hand.

The net cash used in investing activities of approximately RMB 14.9 million during 6M2016 was mainly due to the acquisition of property, plant and equipment of approximately RMB 4.9 million and the prepayment for land use rights of approximately RMB 10.4 million, which was partially offset by the interest received and proceeds from the sales of property, plant and equipment.

The net cash used in financing activities during 6M2016 was mainly due to the payment of dividends of approximately RMB 3.2 million and payment of interest of RMB 1.8 million. The net cash from financing activities during 6M2015 was mainly due to the net increase in bank loans by RMB 21.9 million, which was partially offset by the payment of dividends and interest expenses.

9. **Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.**

The current second quarter results for the 3-months period ended 30 September 2015 are in line with the Company's commentary as disclosed under paragraph 10 of the first quarter results announcement for the financial period ended 30 June 2015 and the Company's announcements made on 7 September 2015 and 25 September 2015.

10. **A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.**

Resumption of the production of commercial explosive products except for boosters

An announcement issued by the Company on 30 October 2015 highlighted an unrelated explosion incident at a booster production plant in Shandong Province, Linyi City, Pingyi County. As a precautionary measure, the authorities required all commercial explosives manufacturers in Shandong Province to temporarily cease all production of commercial explosive products for safety inspections and clearance by the relevant authorities.

As of the date of this announcement, Yinguang Technology has already completed the safety inspection. However, Yinguang Technology has yet to resume production of commercial explosive products as we are awaiting for the relevant authorities to provide the clearance confirmation to resume production.

The management will continue to follow up with the relevant authorities in order to resume production and we will update Shareholders of any other material impact to the Group accordingly.

Update on the new ammonium nitrate production facilities

Following our earlier announcements on the new ammonium nitrate production facilities, the construction of the new facilities remained halted due to the negative market outlook for the demand of ammonium nitrate.

In light of the weak market conditions for ammonium nitrate, this product segment is projected to continue to experience an operating loss.

The management will continue to monitor the situation and update Shareholders of any other material impact to the Group accordingly.

China market updates

China continues to experience a slowdown in its economic growth and the broad-based weakness in global commodity prices continues to impact mining activities in China. In addition, as pollution and environmental issues remain key issues in China, the Chinese authorities have increased their scrutiny and regulations on industrial activities (such as refinery and power plant facilities) that are major causes of such issues. As a result, these factors have led to reduced mining activities in China and will continue to affect our local sales in China as most of our commercial explosives products are used in mining related activities.

The management will continue to monitor the situation and update Shareholders of any other material impact to the Group accordingly.
